

INTERNATIONAL ECONOMICS AND FINANCE, MASTER OF ARTS

This challenging 11-month, full-time master's degree program is recognized as a STEM degree, and is offered at the Washington, DC campus. The Master of Arts in International Economics and Finance (MIEF) positions early- to mid-career professionals to excel in rigorous economic and financial analysis roles. The curriculum prepares students to understand advanced economic theories, master professional quantitative economics and econometrics skills, and assess a wide range of international economic and financial scenarios. Students in this cohort-based program take courses together that increase in complexity throughout the year.

Economics knowledge, analytical abilities and the capacity to apply economic analysis to real-world problems give our students a distinct professional advantage. Whether you are interested in pursuing a career in international finance, public policy, economic development, or research, the MIEF program provides students with a firm grasp of the theory and tools of international economics and finance.

Students in the MIEF program are encouraged to work with career counselors in the Office of Global Careers and faculty in the International Economics department to explore career options, attend career treks, build professional networks, and improve professional skills.

Degree Requirements

Campus: Washington, DC

Credits: 56

Duration: 11 months, Full-time

Course delivery: In-person

Curriculum

The MIEF degree is conferred upon successfully completing fourteen courses totaling 56 credit hours. In designing your academic plan, you are required to take the core MIEF courses, but you also choose a combination of international economics electives.

The program requires fourteen core courses, including three quantitative methods courses, five economics electives, skills workshops and the capstone course. Students are required to have a minimum 2.67 cumulative GPA to graduate.

Coursework begins with a six-week summer term starting in mid-July, and follows the school's regular fall and spring semesters with the addition of a January intersession. The capstone course begins in the spring semester and is completed in the summer.

Intersession Skills Workshops

Students take two intersession skills workshops to expand their professional skills and knowledge related to careers in international economics. Past workshops have covered working with economic and statistical analysis tools such as EViews, MATLAB, PcGive, R, and Stata, as well as, address topics related to working in strategic consulting, investment banking, and business strategy roles.

Capstone Course

Students apply the knowledge, skills and tools they have learned in the MIEF program to address an international economics issue impacting the public, private or nonprofit sector. Teams present their findings in a detailed presentation to fellow classmates, faculty and outside professionals in mid-June. Examples of topics include current account sustainability, exchange rate exposure, investment case studies, studies on financial markets and growth and debt sustainability studies.
