

MOLECULAR AND CELLULAR BIOLOGY, BACHELOR OF SCIENCE

Molecular and Cellular Biology Major Requirements (B.S.)

(Also see Requirements for a Bachelor's Degree. (<http://e-catalog.jhu.edu/arts-sciences/full-time-residential-programs/undergraduate-policies/academic-policies/requirements-for-a-bachelors-degree/>))

The Biology Department offers a B.S. degree in molecular and cellular biology. The B.S. program is designed to provide a rigorous preparation for advanced study in the biomedical sciences. The program is tailored not only to students planning to enter Ph.D. programs or obtain employment in the biotechnology industry but also for premedical students.

All courses required for the molecular and cellular biology major must be taken for a letter grade (not S/U) and be passed with a grade of C- or better with one exception. The department will accept one passing grade below C- in senior year provided that the average for all formal lecture and laboratory courses is at least 2.0.

Electives

At least four courses totaling at least 12 credits (see POS-Tag BIOL-UL in the Schedule of Classes) from the courses approved by the Director of Undergraduate Studies. At least one course must be taught by the Biology Department (AS.020.xxx) and be a 2 or 3 credit course.

Research

Research (totaling at least 6 credits) *	6
Total Credits	77-78

* The supervised research will include participation in group meetings and writing a summary of accomplished work at the end of the year.

Honors in Molecular and Cellular Biology

Students completing the B.S. in molecular and cellular biology major are eligible to receive their degree with honors.

The B.S. in molecular and cellular biology with honors requires, in addition to the regular requirements for the major, a 3.5 GPA for natural sciences and quantitative studies courses, a presentation of a poster describing the independent research, and a recommendation from the research sponsor.

The research requirement must be completed under the direction of a faculty member in a department associated with the Johns Hopkins University or the Johns Hopkins Medical Institutions. If the student's research director for independent research is not a member of the Department of Biology, a Biology faculty member must serve as a sponsor and approve the recommendation from the research director.
