

# PSYCHOLOGY, BACHELOR OF ARTS

## Psychology Major Requirements

(Also see Requirements for a Bachelor's Degree. (<https://e-catalogue.jhu.edu/ksas-wse/undergraduate-policies/academic-policies/requirements-bachelors-degree/>))

The courses in Psychological and Brain Sciences have four purposes:

1. to acquaint all interested students with a sampling of topics through a variety of introductory and advanced courses;
2. to prepare majors for graduate work in psychology and related disciplines through a program that meets the admission requirements of the outstanding graduate departments in the United States;
3. to offer a distribution of foundational courses in psychology as well as advanced studies representing areas in the social, behavioral, and brain sciences; and
4. to provide an honors track designed for exceptional students who want training beyond that provided by the standard undergraduate curriculum.

### General Requirement

All classes taken for the major (including those for Honors) must be taken for a grade and be completed with a C- or better. Courses taken at another institution that are not directly equivalent to a JHU course may not apply towards the major without permission of the Director of Undergraduate Studies.

### Specific Requirements

- **Intro Level Course Requirement:** Three 100-level psychology courses from an approved list. These are typically taken during Year 1 and Year 2.
- **Experimental Methods, Design & Analysis:** AS.200.200 Research Methods in Psychology and AS.200.300 Design & Statistical Analysis for Psychology should be taken as a two-course sequence in Fall and Spring of Year 2.
- **Upper Level Course Requirement:** Five upper level psychology courses (200-400-level), three of which must be at the 300-400 level. These are typically dispersed through Years 2-4. Courses must be at least 3 credits.
- **Small Group Experience:** 3 credits of either research, internship, independent study or an additional 300-400 level psychology course with an enrollment cap of 19 students or less. Students who are interested in graduate work in psychology are encouraged to get involved in research/internship activity starting in Year 2 and to continue throughout their time at Hopkins.
- **Writing and Communication in the Major:** Students must complete at least 6 credits of Writing and Communication foundational ability coursework in one major. For this major, students would be able to fulfill this requirement by selecting and completing the required courses of the major AS.200.200 Research Methods in Psychology and AS.200.300 Design & Statistical Analysis for Psychology.
- **\*\*Catalogue update 11/04/2024 - 9 Science and Data Credits:** Students must complete 9 additional Science and Data credits using courses

not taught within the psychology department (AS.200.XXX) and not counting otherwise toward the psychology major.

Please note that not all courses offered by the Department of Psychological & Brain Sciences (AS.200.XXX) will fulfill the requirements of the Psychology major/minor (ex. AS.200.162 Childhood Disorders & Treatments). Consult with Academic Advising and your psychology major advisor to ensure appropriate progress toward degree completion.

### Required Courses Within the Department

Code	Title	Credits
AS.200.200	Research Methods in Psychology	4
AS.200.300	Design & Statistical Analysis for Psychology	4
Select three of the following:		9
AS.200.101	Introduction To Psychology	
AS.200.110	Introduction to Cognitive Psychology	
AS.200.132	Introduction to Developmental Psychology	
AS.200.133	Introduction to Social Psychology	
AS.200.141	Foundations of Brain, Behavior and Cognition	
Research, internship, independent study, or a designated seminar course <sup>1</sup>		3
Five additional (3-credit) psychology courses distributed as follows: <sup>2</sup>		15
Two additional courses at the 200-400 level		
Three additional courses at the 300-400 level		
<b>Total Credits</b>		<b>35</b>

<sup>1</sup> The 300-400 level seminar course must have a maximum enrollment of 19 students and these can be identified by the POS-Tag PSYC-SEM. Courses used to fulfill the five upper-level course requirements may not be used to satisfy this requirement. Students may take 1-3 credits of independent work (AS.200.5xx) in any given semester to fulfill this requirement. All students are required to discuss their plans with their faculty advisor before Pre-Graduation Check.

<sup>2</sup> All courses must be AS.200.xxx or cross-listed with Psychological & Brain Sciences, except for up to one upper level course in Cognitive Science (AS.050.3xx-4xx). Research, independent study, and internships may not be used to satisfy these course requirements.

### Sample Program of Study

First Year			
First Semester	Credits	Second Semester	Credits
Required 100-level Psychology course	3	Required 100-level Psychology course	3
		<b>3</b>	<b>3</b>
Second Year			
First Semester	Credits	Second Semester	Credits
AS.200.200	4	AS.200.300	4
Required 100-level Psychology course	3	200- through 400-level Psychology course	3
		<b>7</b>	<b>7</b>
Third Year			
First Semester	Credits	Second Semester	Credits
Small Group Experience or Independent Academic Work	3	300- through 400-level Psychology course	3

200- through 400-level Psychology course	3		
	<b>6</b>		<b>3</b>
<b>Fourth Year</b>			
<b>First Semester</b>	<b>Credits</b>	<b>Second Semester</b>	<b>Credits</b>
300- or 400-level Psychology course	3	300- or 400-level Psychology course	3
	<b>3</b>		<b>3</b>
<b>Total Credits 35</b>			

### Restrictions

No courses through the School of Education and the Carey Business School may be counted toward the requirements for the major in Psychological and Brain Sciences (although a limited number of such courses may be counted toward the 120 credits required for graduation). As most Interession courses are graded S/U or are less than 3 credits, they do not apply towards major requirements. Some courses offered by Psychological & Brain Sciences taught in the summer at Hopkins do not count toward the Psychology major or minor as they do not fit into the requirements of the major. You may make an appointment with Dr. Stephen Drigotas (drigotas@jhu.edu), Director of Undergraduate Advising for Psychological & Brain Sciences, to ensure that your enrollments will be considered toward your academic progress in the manner you intend.

### Preparation for Graduate Work in Psychology

The Department of Psychological and Brain Sciences provides preparation for graduate training in all areas of psychology, including clinical and counseling. Virtually all psychology graduate programs, including those that provide training in clinical or counseling psychology, expect students to have a strong background in scientific psychology, including statistics. The department encourages students to obtain additional practical experiences outside the classroom, including research in a laboratory and/or an internship in a mental health care setting. These additional experiences are particularly salient to graduate school admission committees.

### Honors Program in Psychology

The B.A. degree with honors provides recognition for outstanding achievement in formal course work and research. Students considering applying for honors should begin discussing possible research topics with a faculty sponsor (and research mentor, if different from the sponsor) in the fall semester of their junior year. The requirements for a degree with honors include those for the regular B.A. degree, plus the following:

- A minimum grade point average of 3.5 or better in psychology (200.XXX) courses through the semester before the student graduates.
- A public presentation (poster or talk) at a recognized student research or professional conference either on campus (e.g., DREAMS, Woodrow Wilson, ASPIRE, PURA) or off campus (e.g., APA, APS, VSS, SPSP). The presentation must be on the research conducted specifically for honors (e.g., research for 200.200 or 200.300 does not count).
- The support of a sponsor for honors research. The sponsor must have a full-time faculty appointment at Johns Hopkins and either a primary or a joint appointment in the Department of Psychological and Brain Sciences. Sponsors can sponsor research conducted under the direct supervision of another principal investigator (e.g., a faculty member in the School of Medicine).

- Completion of two 300- or 600-level psychology courses, in addition to those required for the Psychology major. These courses cannot be an independent study, research or internship credits, or a readings course. These additional courses can count toward the 120 credits required for graduation.
- Completion of six credits of research (AS.200.515 Psychological Research) beyond research credits counting toward the major.

Please see the Department of Psychological and Brain Sciences (<https://pbs.jhu.edu/>) website for the application process details.

### Undergraduate Academic Awards

The Department of Psychological and Brain Sciences offers two undergraduate academic awards.

- G. Stanley Hall Prize is awarded for outstanding achievement by an undergraduate in psychology.
- Julian C. Stanley Award is given to the psychology major who most closely approximates Dr. Stanley's personal and professional standards of excellence.
