REGISTRATION POLICIES

Advising and Registration Periods

All students are required to meet with an advisor for each declared major prior to registering for the fall and spring semesters. Advisor alert(s) for each declared major are placed on all students’ records in SIS well in advance of the registration period; the alert(s) must be released by the advisor(s) to permit the student to register.

In the School of Arts and Sciences, freshman, first-semester transfer students, and undeclared students meet with their academic advisor beginning six weeks in advance of the registration period. Students with declared majors should contact their faculty advisor to schedule a meeting prior to their registration date.

In the School of Engineering, students meet with their faculty advisors during Engineering Advising Week (early November for spring registration, and early April for fall registration).

Undergraduates register for Spring semester in November, for Intersession in December, for Summer in March, and for Fall semester in April.

Schedule Verification

Students are responsible for verifying their schedules in SIS. Students are encouraged to retain a copy of their schedule for their records. In addition, students are advised to check their schedules after performing online registration changes (adding and/or dropping courses) to ensure accuracy.

Students should review their schedule prior to the add, drop, and withdrawal deadlines. Changes to a student’s schedule will not be approved after these deadlines have passed. Failure to review and retain a copy of their registration confirmation will not be considered grounds for approving exceptions to these deadlines.

Interession and Summer Special Registration Information

Summer and Intersession opportunities, such as JHU-sponsored study abroad courses and career exploration courses, may have special registration deadlines, fees, and procedures. Please see the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites for additional information.

Intersession is a period in January for students and faculty to participate in a variety of courses and activities that are offered for credit, and for non-credit. These offerings are designed to enrich the intellectual and social life of the campus. Registration in Intersession is optional.

For Intersession academic exploration courses, the tuition cost of Homewood KSAS and WSE courses is free to undergraduates who were enrolled full-time in the previous fall semester (including approved study abroad); part-time students must pay tuition. All students must pay relevant fees. Students who are returning from a leave of absence may register for Intersession if they pay tuition per credit hour. Students who register for Hopkins Intersession courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Summer courses at JHU are primarily offered during two five-week terms. Some courses run on alternative schedules and may, therefore, have different deadlines. Courses are sponsored by the same academic departments that oversee the university’s full-time degree programs. They are designed to reproduce, as closely as possible, similar courses offered during the spring and fall semesters. Tuition charges, and deadline dates, are published on the Summer Programs (https://summerprograms.jhu.edu/) website. Students who register for Hopkins Summer courses outside of KSAS/WSE are subject to tuition charges determined by the individual school.

Late Registration Fees

Registration in the School of Arts and Sciences and the School of Engineering is not permitted after the end of the second week of the semester, except in extraordinary circumstances as approved by the Assistant Dean in their respective academic advising office. The university provides financing alternatives that permit students to register in most financial situations. Visit https://finaid.jhu.edu/ for information on financial support programs offered at JHU.

Students who for any reason do not complete their registration until after the prescribed registration period may be required to pay a late registration fee.

For late registration fees in the Summer, please see the Summer Programs (https://summerprograms.jhu.edu/) website.

Adding a Course

During the fall and spring semesters, students may add a course until the end of the second week of classes and pay no fees to add courses. During this time students may add courses without written approval, unless the course is filled or will cause a credit overload. If the course will cause a credit overload, Arts and Sciences students need approval from the Arts and Sciences Advising Office, while Engineering students will need the approval of their faculty advisor and the approval of the Engineering Advising Office. Approvals for credit overloads can be processed in the SIS by the student’s respective advising office which will enable students to add the course(s) online.

An instructor’s signature is required to add a course that is filled. By the end of the second week of classes, students should have the schedule they want to keep. As an exception to this policy, students may enroll in Independent Study, Independent Research, Thesis, and/or Internship until the end of the sixth week of the semester.

For fall and spring courses that are scheduled for less than the full semester, the last day to add will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites.

When adding courses in other JHU divisions, or at schools in the Baltimore Student Exchange Program (BSEP), students must follow the deadlines set by the host school or division. In the School of Public Health, the add deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

Dropping a Course

Courses may be dropped from the student’s record until the end of the sixth week of the semester, provided that the student remains registered
for a minimum of 12 credits. For engineering students, faculty advisor approval is required to drop a course after the second week of classes.

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to drop a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

For fall and spring courses that are scheduled for less than the full semester, the last day to drop will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (http://pages.jh.edu/intersession/) or Summer (http://pages.jh.edu/summer/) Programs websites.

When dropping courses in other JHU divisions or at schools in the Baltimore Student Exchange Program (BSEP), undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the drop deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

**Withdrawing from a Course**

After the end of the sixth week and until the end of the eleventh week, a student may withdraw from a course with a W on their academic record. A record of the course will remain on the academic record with a W appearing in the grade column to indicate that the student registered and then withdrew from the course. Students are not allowed to withdraw from a course after the end of the eleventh week of the semester. Course withdrawals must be conducted in person at the Office of the Registrar using an add/drop form. Engineering students need the signature of their faculty advisor on the add/drop form. No signature is required for Arts and Sciences students to withdraw from a course when the student remains able to earn a minimum of 12 credits.

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to withdraw from a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

Even with approval, withdrawing from a course may adversely affect a student’s academic standing and/or financial aid satisfactory academic progress, and students should discuss these topics with the respective offices prior to submitting signed add/drop forms to the Office of the Registrar.

For fall and spring courses that are scheduled for less than the full semester, the last day to withdraw will vary based upon course length and start date. Please see the Registrar’s Office (https://studentaffairs.jhu.edu/registrar/students/registration/) website for details. For Intersession and Summer deadlines, please refer to the Intersession (https://summerprograms.jhu.edu/program/intersession-program/) or Summer (https://summerprograms.jhu.edu/) Programs websites.

When withdrawing from courses in other JHU divisions or at schools in the Baltimore Student Exchange Program (BSEP), undergraduates must follow the deadlines set by the host school or division. In the School of Public Health, the withdrawal deadlines are based on the quarter system, not the semester system that is used in other JHU divisions. Interdivisional Registration information is located at https://registrar.jhu.edu/idr/

**Full-Time Student Status**

Undergraduate students at Johns Hopkins University must be registered for a minimum of 12 credits each semester. Students who have not completed degree requirements after eight full-time semesters may register for less than 12 credits and pay for courses on a per credit basis with the permission of their respective academic advising office.

**University Credit Hour Definition**

JHU defines a credit hour as a reasonable approximation of the student learning outcome equivalency of an amount of work represented in intended learning outcomes and verified by evidence of student achievement that reasonably approximates not less than, at a minimum, the federal definition:

- One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately 15 weeks for one semester or trimester hour of credit, or 10 to 12 weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
- At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Changes to this definition can be found in University Policies. (https://www.jhu.edu/university-policies/) Graduate-level courses completed by undergraduates are generally awarded the same number of credits as an upper-level undergraduate course (3 credits).

**Fall and Spring Semester Credit Requirements and Limits**

For Arts and Sciences (AS) students, the average course load is 15 credits per semester for eight semesters. AS freshmen are limited to 17 credits, while AS upperclassmen are limited to 18.5 credits.

For Engineering (EN) students, the standard load is 16-18 credits. EN freshmen are limited to 18 credits (18.5 if including a foreign language), while EN upperclassmen are limited to 19.5 credits.

Peabody Double Degree students are permitted to enroll in a maximum of 25 credits per semester.

Undergraduate students must be registered for a minimum of 12 credits throughout the fall and spring semesters. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

**Intersession and Summer Credit Limits**

Students may take a maximum of 3 credits during Intersession.

During the Summer, students may take a maximum of 14 credits total, with a limit of 7 credits per session.
Exceptions to These Credit Limits

Unless a student is authorized by the Office of Student Disability Services for reduced course load, any request to drop or withdraw from a course that would result in the student being unable to earn a minimum of 12 credits in a fall or spring semester requires a signature from their respective academic advising office. Students who are authorized for reduced course load through the Office of Student Disability Services require approval from that office.

Credit overloads for Arts and Sciences students require approval from AS Academic Advising, and must meet one of the following criteria:

- Seniors in their eighth semester
- Upperclassmen who made Dean’s List in the prior semester

Credit overloads for Engineering students are approved on a case-by-case basis, and require Faculty Advisor’s signature, then final approval by the EN Advising Office, with review of the student’s recent academic performance is a factor in the decision. First-semester EN freshmen are not granted credit overloads.

Restrictions

Registration Alerts

Registration alerts may be applied to student records for a variety of reasons, such as outstanding financial obligations, insurance and health clearances, academic standing, and missing emergency contact information. A student whose registration has been placed on hold for a non-academic reason must obtain clearance from the office or offices that placed the hold on registration. Transcripts will not be released for students with unpaid balances.

Students who have three or more incomplete grades from the previous semester may have a hold placed on registration activity. The student must have approval from their respective advising office to register, add, or drop.

Retaking A Course

Students may retake a course to absolve a grade of C+ or lower. The grade for the second attempt and the associated credits are recorded on the transcript and are calculated into the GPA. The original grade remains along with the notation “R” to indicate the course was retaken, and the original grade does not affect grade point calculations, nor does it carry credit toward graduation. Only the grade in the retaken course accrues credit and applies to the GPA, even when the retaken grade is lower than the original grade. However, if a student drops or withdraws from the subsequent attempt the original grade is calculated into the GPA. A student may retake one course without written permission. Taking the same course a third time or retaking a different course requires written permission of the student’s respective academic advising office.

A course originally taken for a letter grade must be retaken for a letter grade. A course taken under the Satisfactory/Unsatisfactory grading option must be retaken under the Satisfactory/Unsatisfactory grading option.

To absolve a grade, the same course must be taken at Hopkins, not at another college or university. In situations where the same course is no longer offered, students may be able to absolve a grade in one of two ways:

1. by repeating a course of comparable content and level, or
2. as an independent study

Both of these options require approval of the department and/or instructor responsible for the course, and the student’s respective academic advising office.

Approval for course retake can be processed in the SIS by the student’s respective advising office which will enable students to add the course(s) online.

Special Retake Rules Related to Spring 2020, Fall 2020, and Spring 2021

Due to the COVID-19 pandemic, there were special grading policies in effect during Spring 2020, Fall 2020, and Spring 2021 semester. Students who want to retake a course that was taken in one of those three semesters should refer to the chart below for adjusted retake rules.

Other Restrictions on Absolving a Grade

Grades may not be absolved by retaking a course after graduation.

Grades assigned by the Ethics Board due to an academic ethics violation may not be removed from the academic record by retaking the course.

Prohibition on Registering for Courses that Meet at the Same Time

Registering for two classes that meet at the same time or at overlapping times is not permitted, except as a temporary measure during the first two weeks of the semester when students are still deciding on which classes to take. By the end of the first two weeks of classes, students must resolve time conflicts in their schedules.

Restrictions on Equivalent Courses and Courses Taken Out of Sequence

Courses that are sequential in nature, e.g., elementary, intermediate, and advanced language courses, or the Calculus sequence, must be taken in their proper order. One exception to this policy is that AS.210.301 Advanced French for Writing – AS.210.302 Advanced French for Speaking may be taken in reverse order with permission of the department.

Credit will be awarded only once for equivalent courses covering the same material. Examples of equivalent courses are Intermediate French and Advanced Intermediate French, and AP Calc AB and Calculus I. This restriction does not apply to the Expository Writing course which may be taken twice. Be aware that departments may change course numbering or titles without changing the course content. Students who believe that they have registered for an equivalent course should consult with their academic advising office. This rules applies to courses offered by either KSAS or WSE, courses at other JHU schools, and courses transferred from other institutions.

The following restrictions apply to overlapping and the sequencing of courses in the Mathematics, and the Applied Mathematics and Statistics Departments:

- Students who earn credit for AS.110.201 Linear Algebra cannot receive credit for the combined course EN.553.291 Linear Algebra and Differential Equations or for the course. AS.110.212 Honors Linear Algebra.
- Students who earn credit for AS.110.405 Real Analysis I cannot receive credit for AS.110.415 Honors Analysis I
• Students who earn credit for AS.110.406 Real Analysis II cannot receive credit for AS.110.416 Honors Analysis II
• Students who earn credit for AS.110.302 Differential Equations and Applications cannot receive credit for EN.553.291 Linear Algebra and Differential Equations.
• Students who earn credit for AS.110.202 Calculus III cannot receive credit for AS.110.211 Honors Multivariable Calculus.
• Students who earn credit for AS.110.311 Methods of Complex Analysis cannot receive credit for AS.110.407 Honors Complex Analysis.

A student who earns credit in EN.553.291 Linear Algebra and Differential Equations may receive credit for further study of linear algebra or differential equations by enrolling for independent study. Normally students will earn 2 credits for such an independent study, but the number of credits may vary and is to be decided by the faculty sponsor. These students may not earn credit for AS.110.302 Differential Equations and Applications, AS.110.201 Linear Algebra, nor AS.110.212 Honors Linear Algebra.

Students who earn credit for EN.553.426 Introduction to Stochastic Processes cannot receive credit for EN.553.427 Stochastic Processes and Applications to Finance.

The following restrictions apply courses in the Economics Department:

• Students who earn credit for AS.180.301 Microeconomic Theory may not earn credit for AS.180.401 Advanced Microeconomic Theory.
• Students who earn credit for AS.180.334 Econometrics may not earn credit for AS.180.434 Advanced Econometrics.

Policy on Statistics Courses Sequencing

Undergraduate students at the Homewood Schools of Johns Hopkins University enjoy a wide selection of courses on statistics; however, it is not allowable for a student to be awarded credit for two courses that cover essentially the same material. Likewise, it is not allowable for a student to receive credit for a more basic course after having received credit for a more advanced course in the same subject.

Our statistics courses fall into one of the following four categories, listed in increasing level of sophistication:

1. Non-calculus based, basic (p. 4)
2. Non-calculus based, intermediate (p. 4)
3. Calculus based, intermediate (p. 4)
4. Calculus based, advanced (p. 4)

A student may take at most one course (or course sequence) from within one of these categories. A student may not take a course in a lower numbered category after having taken a course in a higher numbered category.

Some departments may require their undergraduate majors to take specific statistics courses, however, all students are precluded from receiving credit for two courses that have much the same content, though they may have different emphases. This policy does not imply that a course in one of the above categories may be substituted for another course.

The list below shows the courses and sequences that are allocated to these categories. Examples:

• A student may take EN.553.111 Statistical Analysis I but then may not subsequently take AS.230.205 Introduction to Social Statistics.

• A student who has taken EN.553.310 Probability & Statistics for the Physical Sciences & Engineering may not also take EN.553.311 Probability and Statistics for the Biological Sciences and Engineering or any of the courses in the first two categories.

Category 1: (Non-calculus based, basic course)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN.553.111</td>
<td>Statistical Analysis I</td>
<td>4</td>
</tr>
<tr>
<td>AS.230.205</td>
<td>Introduction to Social Statistics</td>
<td>4</td>
</tr>
</tbody>
</table>

AP Statistics

Category 2: (Non-calculus based, intermediate course)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN.553.211</td>
<td>Probability and Statistics for the Life Sciences</td>
<td>4</td>
</tr>
<tr>
<td>EN.553.230</td>
<td>Introduction to Biostatistics</td>
<td>4</td>
</tr>
<tr>
<td>AS.280.345</td>
<td>Public Health Biostatistics</td>
<td>4</td>
</tr>
</tbody>
</table>

Category 3: (Calculus-based, intermediate course)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN.553.310</td>
<td>Probability &amp; Statistics for the Physical Sciences &amp; Engineering</td>
<td>4</td>
</tr>
<tr>
<td>or EN.553.311</td>
<td>Probability and Statistics for the Biological Sciences and Engineering</td>
<td>4</td>
</tr>
<tr>
<td>EN.560.348</td>
<td>Probability &amp; Statistics in Civil Engineering</td>
<td>3</td>
</tr>
</tbody>
</table>

Category 4: (Calculus-based, advanced course)

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EN.553.420</td>
<td>Introduction to Probability</td>
<td>4</td>
</tr>
<tr>
<td>&amp; EN.553.430</td>
<td>and Introduction to Statistics</td>
<td>4</td>
</tr>
</tbody>
</table>

Some courses do not fall into one of the four categories:

• EN.553.413 Applied Statistics and Data Analysis This course is mostly independent of the other probability/statistics courses, but subsumes enough of the non-calculus, basic course material such that no Category 1 course may be taken after EN.553.413 Applied Statistics and Data Analysis.
• EN.553.112 Statistical Analysis II may be taken after any category 1, 2, or 3 course. However, the preferable sequence is EN.553.111 Statistical Analysis I-EN.553.112 Statistical Analysis II.

Equivalent Statistics Courses

The courses EN.553.310 Probability & Statistics for the Physical Sciences & Engineering and EN.553.311 Probability and Statistics for the Biological Sciences and Engineering are considered equivalent to each other and can be used interchangeably. In accordance with the course retake policy, a grade in one may be abseved by the opposite course.

Important Note About Credit and Grades for Language Courses

Students must take the language elements (or beginning/first year) courses for a letter grade.

Students in the School of Arts and Sciences do not receive an area designation for these elements (beginning/first-year) courses.

Students in the School of Engineering can substitute language elements (or beginning/first-year) courses for humanities courses in meeting the distribution requirement.

Instructor's Permission
Most graduate (600-level and above) courses in the School of Arts and Sciences and the School of Engineering offered in the graduate divisions of the university require undergraduates to obtain permission to register. If permission is required, engineering students need permission from the instructor and their faculty advisor. Arts and Sciences students require permission of the instructor. If online enrollment is not available, students must use an add/drop form to secure the appropriate permissions.

Auditing a Course
Undergraduate students may not audit a course. By the end of the add period, a student may only attend or participate in courses for which they are enrolled.

Registering for Independent Academic Work
Independent Academic Work is the collective term used to encompass independent study, research, and academic internships. Independent study means a program of study and reading under the tutelage of a faculty member. Academic credit for independent study is based on work equivalent to class-based courses. Research involves planning and conducting experiments, collection and analysis of data, and the reporting of results. Academic internships are practical work experiences which have an academic component as certified by a member of the faculty.

All forms of independent academic work require early planning with a faculty sponsor. To receive academic credit, the independent academic work must include activity, exercise, and/or product that can be evaluated by a member of the AS/EN faculty whose field of expertise is closely enough related to the work for the faculty sponsor to competently evaluate the work, and certify that it merits academic credit.

Academic credit for independent academic work must be sponsored by a full-time member of the Homewood faculty. This is the case whether the work is done on-campus or off-campus. The work supervisor and the faculty sponsor may be the same individual. If the faculty sponsor is not the work supervisor, the work supervisor must provide the faculty sponsor with a report on the student’s achievements while doing the independent project, and the faculty member must certify how much academic credit the project merits.

Students who wish to pursue independent academic work begin by discussing their ideas with an appropriate faculty sponsor. That discussion must focus on what type of project the student envisions, and what possibilities for academic credit the faculty member envisions. If the student and faculty member agree on the type of project and its academic value, then the student should find a suitable research or work environment for the project.

- No more than three credits may be earned for independent study or research in one semester or summer (sessions I and II combined); only one credit may be earned for an academic internship during one semester or summer.
- No more than 6 credits of any type of independent academic work may be earned in one academic year (see exception for students graduating in their eighth semester or later). The academic year begins with the first summer session and ends at the conclusion of the spring semester.

- Independent work done for academic credit must be unpaid. Credits for research and independent study vary from 1-3 credits, and may be graded with either letter grades (A, B, etc.) or Satisfactory/ Unsatisfactory. Each credit hour should reflect 40 hours of work on the project.
- Credit for an internship is limited to 1 credit, and the grading method is Satisfactory/ Unsatisfactory only.
- Students must register for independent academic work by the end of the sixth week of the semester. Students must adhere to the registration and add/drop deadlines during Intersession, and Summer. In the rare circumstance that a student must change the number of independent academic work credit for which they are registered, the deadline for these changes aligns with the deadline to withdraw from a course. The typical minimum and maximum credit limits must be observed.

Although academic credit is awarded for independent academic work, area designations are not assigned and the credit may not be used to satisfy the distribution requirement. All courses registration at the 500-level, which is by definition undergraduate independent academic work, except for courses that are Honors Thesis and the Senior Essay in English, are not allowed to be writing intensive. The use of credit for independent academic work to satisfy the requirements of a major or minor is subject to prior written approval by the appropriate department or program.

Additional policy information can be found in the Credit Hour Policy (https://www.jhu.edu/university-policies/).

Language Courses at the School of Advanced International Studies
Course credit, normally between 3 to 5 credits, will be awarded to AS and EN undergraduate students for the following language courses offered by the School of Advanced International Studies (SAIS) in accordance to the University's credit hour policy and in strict adherence to the hours of instruction scheduled: Burmese, Indonesian, Persian, Russian, Thai, and Vietnamese. Supplemental language tutorials will not be included in the course credit calculations.

Registering for Courses in Other JHU Divisions During the Fall and Spring Semesters
Qualified undergraduates may take courses at other divisions of the university as long as the student has not previously earned credit for the content of the course. Students submit an Interdivisional Registration (IDR) form, which is available in the Homewood Registrar’s Office, in the Office of Academic Advising, or in the Office of Engineering Advising. Courses taken at other JHU divisions must be taken for a letter grade, unless the course at the host division is offered on an S/U basis only. Approval(s) are required for all AS/EN students as indicated on the IDR form. All students must meet the course requirements as defined by the host division. Additional IDR information is located at https://registrar.jhu.edu/idr/.

Peabody Institute
Peabody Conservatory offers courses that must be taken for grade and credit. Homewood undergraduates who are not enrolled in either the Homewood-based music minor or the Peabody Double Degree program may take only one nonperformance course per semester at the
Conservatory, and may also take one performance course concurrently with the approval of the student's respective academic advising office. Performance courses will receive 1 credit per semester unless taken as part of the Peabody Double Degree program.

Students may take private lessons at Peabody. Information is located at https://peabody.jhu.edu/preparatory/registration-financial-aid/placement-information/.

The Conservatory schedule and deadlines can differ from those at Homewood. Students taking courses and lessons at the Conservatory must check these dates in the Peabody schedule of courses located at https://peabody.jhu.edu/academics/academic-calendar-resources/registrar/. Visit https://peabody.jhu.edu/academics/peabody-at-homewood/ for additional information about taking lessons at the Conservatory.

The Carey Business School, and The School of Education

Students may register for approved courses in these two schools on a case-by-case basis. In order to register in the Carey Business School or the School of Education, students in Arts and Sciences and Engineering programs should use the Interdivisional Registration Form, available from the Homewood Registrar's Office, which requires permission of their academic advisor and the appropriate school program director or advisor. Courses must be taken for a grade. Note that the Carey Business School and the School of Education students have priority in registering for these schools’ courses.

School of Medicine, and Bloomberg School of Public Health

Undergraduates may register for courses in the School of Medicine and/or the Bloomberg School of Public Health with the approval of the faculty advisor, the course instructor, and the student’s academic advising office. Students must have an adequate background for the courses, and courses must be taken for a grade. Public Health Studies majors taking courses at the Bloomberg School of Public Health require only the Public Health faculty advisor’s approval signature.

Registering for Courses at Other JHU Divisions During the Summer

Degree-seeking students are permitted to IDR enroll during the summer term(s). Students must meet designated course prerequisites and/or be otherwise qualified for the desired course(s) at the following JHU divisions:

- Advanced Academic Programs (AAP) division of the Krieger School of Arts and Sciences
- Bloomberg School of Public Health (excluding offerings through the Summer Institute)
- Engineering for Professionals (EP) division of the Whiting School of Engineering
- Peabody Institute (permission required from Peabody Associate Dean for Academic Affairs)
- School of Advanced International Studies
- School of Education
- School of Medicine

Students should register using the IDR form, and pay for the course at their home division. The course, along with credits and grade, will appear on the student’s home division transcript. Approval from both the home and host divisions is required to ensure that the interdivisional enrollment is appropriate for the student’s degree. Summer courses in other divisions must be taken for a grade.

IDR enrollment is not available during the summer term(s) at the Carey Business School, nor the School of Nursing. Students seeking enrollment at either of these schools should pursue enrollment directly with the respective school. In order to ensure a course will transfer to the student’s undergraduate academic record, students should follow the transfer credit pre-approval directions available from their advising office.

Registering for Courses through the Baltimore Student Exchange Program (BSEP)

Beginning sophomore year, undergraduates may take one course per semester (fall/spring only) at one of the several area colleges and universities that comprise BSEP. This program includes the following colleges in the Baltimore area: Community Colleges of Baltimore County, Coppin State University, Goucher College, Loyola University Maryland, Maryland Institute College of Art, Morgan State University, Notre Dame of Maryland University, Stevenson University, Towson University, University of Baltimore, and University of Maryland Baltimore County.

Students who have received Air Force ROTC scholarships will register for the required ROTC courses at the University of Maryland College Park using the BSEP institution registration process described in this section.

Courses that are equivalent to those offered at the Homewood campus may not be taken through BSEP. Students register by submitting the BSEP registration form to the Homewood Registrar. This form is available on the BSEP website (https://baltimorecollegetown.org/colleges/cross-registration/). The faculty advisor’s approval is required for all courses. An academic advisor from the student’s respective advising office must also approve the form. Submit completed registration materials to the Homewood Office of the Registrar.

Prior to the start of classes at the host institution, students may report to the host school’s registrar for additional assistance (for example, campus maps or id cards). JHU students enrolled through BSEP are not required to complete registration forms at the host institution, and no academic record is established at the host institution. There is no additional fee or tuition charge for courses taken through the BSEP program, except when the host school charges a laboratory or materials fee. In that event, the student pays the fee directly to the host institution.

Courses at these schools must be taken for letter grades. Both grades and credits appear on the Hopkins academic record along with an indication of where the courses were taken. The grades are included in calculations of the grade point average.

Independent undergraduate work, special tutorials, or private study types of courses that consume a large portion of faculty time are generally not included in the BSEP program, nor are weekend or evening courses offered through continuing educational studies programs.

Cooperative Education in Engineering

Engineering students may participate in government or industry-based cooperative education programs. Students who have received an offer from an employer should contact the Engineering Advising Office at 410-516-7395 or wseadvising@jhu.edu.

ROTC

Enrollment in the Johns Hopkins University Department of Military Science ROTC Program prepares students for full- and part-time

**Final Examination Schedule for Fall and Spring Semesters**

The Office of the Registrar establishes the final examination schedule. In rare cases, the official final exam schedule available on the Registrar’s website may slot three final exams on one day for a student. Students should contact their respective academic advising office for assistance in these instances.

Instructors may administer final examinations only at the officially scheduled time, not during class time or during the reading period. Take-home final examinations, and other final exercises (such as papers) that are expected to be prepared for and completed after classes have concluded are due at the end of scheduled in-class final examination time for the course. All other papers can be due at any deadline during the semester set by the professor, including the reading and final examination periods.

Students who are concerned that any of these policies are being violated by their instructors should notify their respective academic advising office.

The final exam schedule (https://studentaffairs.jhu.edu/registrar/students/course-schedule/) is posted on the Office of the Registrar’s website.
