# ARTIFICIAL INTELLIGENCE FOR BUSINESS, GRADUATE CERTIFICATE

The Artificial Intelligence for Business graduate certificate focuses on developing critical skills needed in artificial intelligence careers. As organizations increasingly rely on AI for business solutions to stay competitive, this certificate equips students with the expertise needed to meet evolving demand. Students can add elective content in AI domain practicum areas through elective courses.

## Program Requirements

| Code | Title | Credits |
|---|---|---|
| Students are required to complete the Graduate Certificate in one year. Students must consult with an academic advisor to ensure that they take courses in the approved sequence. The certificate consists of six courses (12 credits). All courses are two credits. Course waivers are not permitted for this certificate. | | |

| BU.510.650 | Data Analytics | |
| BU.330.750 | AI Development and Business Applications | |
| BU.232.610 | Computational Finance | |

## Certificate Policies

Students in part-time degree programs must be admitted to a graduate certificate prior to the final semester of their degree program. No graduate certificate can be added to a student record in the same semester they graduate from a degree. Students are only allowed to enroll in one Graduate Certificate program at a time.

Students who are currently enrolled in a part-time degree program at the Carey Business School may add either the Graduate Certificate in Financial Management or the Graduate Certificate in Investments, but not both.

Please note that only six credits earned as a non-degree student may be counted toward a Graduate Certificate from the Carey Business School.

Please visit the Changing Degree Program (https://e-catalogue.jhu.edu/business/policies-procedures/changing-degree-program/) section for additional Certificate policy details.
