AS.371.177. Design Studies: Detail, Product, Prototype. 3 Credits.
When we undertake the design of an artifact—something material, perhaps interactive—we do more than create a pretty little sculpture, or simply enclose the inner workings of a product. We think about aesthetics; about ergonomics; about material heft and surface texture. In a successful product, toy, or building detail it is often something ineffable—the way the object interfaces with the human hand, or the way it takes on a personality in the mind—that results in its success as an object of design. The course is structured as a series of design exercises, each intended to develop the graphical and manual skill-set of the designer. Our subject, broadly speaking, is the design of small things: from building details to useful products and tools, the act of drawing iterative design sketches, and creating prototypes, will guide us in the development of practical design intelligence.

AS.371.178. Making of Masks: Inspired by World Tradition. 2 Credits.
Since before written history, humankind has conceived masks for a range of purposes using forms and materials to help develop, protect and preserve physical and spiritual existence. Great care and specificity went into these visages to obtain these various goals. These historical cultural roots will be examined, honored and transformed as students consider these elements and create their own versions of masks to produce these goals in a personal way. This investigation will provide the historical examples of masks from Native Americans to PTSD American soldiers, from Africa to Anime, Kabuki to Carnivale. Materials and sculptural methods used will arise from the needs of the artist. Such methods will likely include, paper mache, collage, wood construction and various painting and surface techniques. No pre-reqs. Attendance in first class is mandatory.

AS.371.180. Exploring Line. 2 Credits.
This challenging yet creatively playful course presents abstract, perceptual and conceptual concepts in art to understand line, one of the elements of art, from multiple perspectives, materials and practices. Be prepared to collaborate and experiment! Through an intense exploration of line, students will create artworks exploring line as marks on a flat surface (drawing), lines that communicate data (design), lines that build form (sculpture) and lines that embody movement (performance and video). Possible assignments will include projects with drawing, printmaking, fiber, cell phone video, installation, unconventional or recycled materials and collaboration. • This is not a drawing class but a multimedia course on one of the elements of art. Instructor approval and attendance at first class is mandatory.
