PH.300 (HEALTH POLICY AND MANAGEMENT)

PH.300.600. Introduction to Health Policy. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.603. The Tools of Public Health Practice and Decision Making. 3 Credits.
Introduces the core functions of public health and the core competencies for public health professionals. Students assess their strengths and academic goals while building their toolbox of public health competencies. Uses case studies to examine the application of the competencies in public health practices. Provides an opportunity to apply knowledge by working in teams to assess a public health problem and propose potential solutions.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.610. Public Health Policy. 4 Credits.
Introduces MPH students to the many opportunities in public health policy to improve the health of populations in communities around the world. Focuses on identifying decision-makers, framing problems and key questions, developing and evaluating policy options, and advocating for change. Provides an introduction to some major policy challenges facing public health, such as inequity, injury, tobacco, nutrition, addiction, and violence.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.615. The Tools of Public Health Practice. 1 Credit.
Introduces the challenges and rewards of public health practice. Presents and discusses the core functions and essential services of public health in the context of real world practice examples. Provides opportunities for application of the core competencies of public health professionals. Prepares students for their practicum experience.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.650. Crisis and Response in Public Health Policy and Practice. 3 Credits.
Studies the phenomenon of crises in public health. From a historical perspective, demonstrates how much of U.S. public health policy traces back to crises and responses that riveted public attention. Explains how substantial increases in FDA authority came about through serial crises in drug, device, food and tobacco markets. Shows that modern vaccine infrastructure emerged out of both disease and vaccine-related crises. From a management perspective, reviews how public health leaders at all levels respond to crises – the good, the bad and the ugly. From a strategic perspective, explores how health officials effectively manage crisis and response in order to win significant policy advances.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.651. Introduction to the U.S. Healthcare System. 4 Credits.
Focuses on the organization, financing, and delivery of healthcare in the U.S. Contrasts the private and public sectors and examines the effects of market competition and government regulation. Examines the ways that medical providers are paid, and explores the major issues currently facing physicians, hospitals, and the pharmaceutical industry. Discusses several potential small and large scale reforms to the U.S. healthcare system and evaluates their likely effects on healthcare spending, quality of care, and access to care.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.652. Politics of Health Policy. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.690. Designing your MPH Capstone as a Research Report. 4 Credits.
Discusses the importance of clearly articulating a research question and its associated aims. Reviews search strategies and data bases for a literature review and critical appraisal. Critically examines how students can design research plans to answer their research questions, provides tips for formulating a conceptual framework, define variables and decide how to measure them and select the most appropriate study design (taxonomy).
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.712. Formulating Policy: Strategies and Systems of Policymaking in the 21st Century. 3 Credits.
Considers theories, strategies, and participants involved in formulating health and social policies. Discusses defining health and social problems, selecting and assessing policy options, and the role of stakeholders in policy process, as well as the context in which policy decisions are made. Analyzes case studies, discusses theories, participates in service-learning projects and writing exercises.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.713. Research and Evaluation Methods for Health Policy. 3 Credits.
Introduces basic principles and methods for undertaking scientifically rigorous research with a special emphasis on evaluations of interventions intended to improve health and safety. Focuses on evaluations of health policies, health care delivery systems, and public health programs. Also prepares students to apply the results of health policy research done by others. Topics include the relationship between health services research, health policy research, health policy analysis and health program management; approaches for assessing the impact of health policy and health program implementation; common research designs and their strengths and weaknesses; measurement issues of reliability and validity; survey research techniques; qualitative research methods; quality of care and outcomes measurement; use of existing health and safety data; and basic cost benefit and effectiveness analysis.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.714. Policy Analysis in Practice. 3 Credits.
Lectures, lab exercises, and case studies of policy issues develop expertise in analyzing and synthesizing policy issues and in preparing policy documents.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.300.715. Advanced Research and Evaluation Methods in Health Policy. 4 Credits.
Introduces basic principles and methods for undertaking scientifically rigorous research with a special emphasis on evaluations of interventions intended to improve health and safety. Focuses on evaluation of health policies, health care delivery systems, and public health programs. Topics include the relationship between health services research, health policy research, health policy analysis and health program management; common research designs and their strengths and weaknesses; internal and external validity; survey research techniques; qualitative research methods; and basic cost effectiveness analysis with the intent of making students better conductors of research.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.721. Foundations in Health Policy I. 2 Credits.
Familiarizes students with some of the foundational readings in health policy and provides an understanding of the theories and conceptual frameworks used in the development, implementation and analysis of health policies. Explores how different disciplines (political science, ethics, law, economics, sociology, behavioral sciences and history) inform thinking about the development, implementation and analysis of health policies that make a difference in the public's health. Emphasizes critical reading and thinking, informed debate with respect for a range of opinions, and communication skills.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.722. Foundations in Health Policy II. 2 Credits.
Familiarizes students with some of the foundational readings in health policy and provides an understanding of the theories and conceptual frameworks used in the development, implementation and analysis of health policies. Explores how different disciplines (political science, ethics, law, economics, sociology, behavioral sciences and history) inform thinking about the development, implementation and analysis of health policies that make a difference in the public's health. Emphasizes critical reading and thinking, informed debate with respect for a range of opinions and communication skills.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.723. Foundations in Health Policy III. 2 Credits.
Familiarizes students with some of the foundational readings in health policy and provides an understanding of the theories and conceptual frameworks used in the development, implementation and analysis of health policies. Explores how different disciplines (political science, ethics, law, economics, sociology, behavioral sciences and history) inform thinking about the development, implementation and analysis of health policies that make a difference in the public's health. Emphasizes critical reading and thinking, informed debate with respect for a range of opinions, and communication skills.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.724. Foundations in Health Policy IV. 1 Credit.
Supplements and builds upon the course entitled Health Policy Analysis and Synthesis. Students analyze and discuss in depth the materials presented in that course.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.731. Policy Communications: Reading, Writing and Talking About Policy. 3 Credits.
Students develop skills as strong policy writers, but also as critical readers of and participants in the policy literature and conversations. Students learn to write with clarity, confidence and in modes appropriate for different audiences. Covers different forms of communicating policy and various kinds within these modes including executive summaries, annotated bibliographies, short policy briefs, presentations and literature critiques. Replicates challenges policy students will encounter as professionals. Addresses habits, methods and techniques to produce high quality writing, to critically review relevant literature and effectively engage in policy discussions and discourse. To be successful, students constantly read and write and fully engage with faculty and students in editorial discussions.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.741. PhD Seminar in Health Policy: Using Secondary Data to Conduct Health Policy Research. 1 Credit.
Provides a small class-size, doctoral-focused experience and examines some of the most common data sources used in the field to study health policy and management research topics. Emphasizes secondary data sources and discusses: (1) data structure and challenges with conducting research with secondary data; (2) developing research questions and testable hypotheses using these data sources; (3) strategies for data cleaning, work flow management, and replication; (4) data protection and storage related concerns; and (5) orally communicating strengths and weaknesses of datasets in the context of research talks. Exposes doctoral students to faculty research projects and the specific datasets being used to conduct this research.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.750. Teaching, Learning and Leading – in the Classroom, in the Workplace and in the Community. 3 Credits.
Offers students opportunities for exploring how to design, develop, deliver, and evaluate educational approaches for a range of audiences and to attain professional aims. Considers a variety of approaches for integrating educational practices and strategies into professional practice. Engages students in developing educational philosophies and reflecting upon personal educational experiences and use of educational approaches for professional and leadership advancement. Presents strategies for designing an educational plan.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.800. MPH Capstone Health Policy and Management. 2 Credits.
The MPH Capstone is an opportunity for students to work on public health practice projects that are of particular interest to them. The goal is for students to apply the skills and competencies they have acquired to a public health problem that simulates a professional practice experience.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.300.801. The Role of Community-Based Organizations (Cbos) and Non-Governmental Organizations (Ngos) in Improving Global Public Health. 2 Credits.
This course provides an overview of some of the nation's major data collection efforts in households and healthcare establishments in the United States. The course introduces population-based and establishment-based surveys conducted by the National Center for Health Statistics, covering policy-relevant topics including health and nutritional status, health care access and utilization, and the provision of services in inpatient, outpatient, ambulatory, long-term, and hospice care settings.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.830. Postdoctoral Research Health Policy and Management. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.840. Special Studies and Research in HPM. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.862. Current Issues in Public Health. 1 Credit.
Faculty experts present public health topics of current interest in both industrialized and developing nations, such as health promotion and disease prevention, health care delivery systems, environmental problems and the spectrum of factors influencing the health status of populations and communities.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.870. The Research and Proposal Writing Process I. 2 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.871. The Research and Proposal Writing Process II. 2 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.300.895. MPH Practicum: HPM. 1 - 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.635. Policing and Public Health. 3 Credits.
Provides an overview of the history and evolution of policing in the United States and the intersections between policing and public health. Considers both short- and long-term policing impacts, both positive or negative, on the health and safety of communities and individuals through various interactions with the public. Explores how public safety is reimagined through a public health lens to understand the impacts of police on social determinants of health, justice, and equity. Examines needed reforms, police-community relationships, and strategies to co-create public safety.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.645. Health Advocacy. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.650. Crafting Effective Solutions to Gun Violence: Problem Solving Seminar. 3 Credits.
Provides a foundation of data, theory and perspectives on understanding gun violence within the United States. Students apply common public health methods for assessing risk and protective factors for multiple forms of gun violence at many levels (individual, family, community), assessing available evidence on prevention options, and determining how to enhance population-level success. Provides an understanding of the legal, political, and institutional constraints and opportunities for enacting policies to curb gun violence. Opportunities to develop plans to prevent gun violence with examples dealing with urban gun violence, domestic violence, and situations in which someone is threatening to commit an act of gun violence (e.g., school or workplace shooting) and develop creative public health alternatives to current approaches to gun violence that promote equity and justice as well as safety will be available.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.660. Connecting Public Health Research with the U.S. Policymaking Process. 3 Credits.
Considers the contradictory role of public health research in the U.S. policy making process. Examines the question of when does research influence the policy-making process and how is it verified and what role can and should researchers play in the process.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.692. The Role of Community-Based Organizations (Cbos) and Non-Governmental Organizations (Ngos) in Improving Global Public Health. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.771. Case Studies in Communicating With The Media. 1 Credit.
Provides real-life examples of public health communications—both good and bad—and teaches practical skills for effectively sharing messages with the media in the era of “fake news.” Students are exposed to techniques and guidelines to understand and handle the media during both crisis and non-crisis situations. Topics include: an overview of the media needs in a crisis, the essential elements of crisis communication plans, tips and techniques for spokespersons, common pitfalls to avoid, audience psychology, non verbal communication and techniques for communicating complex information to the lay audience. Students review videotapes of news coverage and participate in simulation exercises.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.301.772. Making Effective Public Presentations. 2 Credits.
Enhances skills to construct and deliver oral presentations with clarity and impact. Provides a template for “audience-centered” presentation construction with examples, tools and exercises. Provides individual assessment and feedback for each participant through videotaped exercises and a short formal presentation constructed during the course. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.820. Thesis Research in Health Policy and Management. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.301.861. Graduate Seminar in Health and Public Policy. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.302.610. State Healthcare Policy. 3 Credits.
Acquaints participants with the critical role states play in developing and implementing policies that affect both health and health care. Reviews how the role of states has evolved within the US federal system of government where states and the national government both have significant responsibilities. Drawing upon the experience of implementing the health insurance exchanges in Maryland and Alabama, participants assess how state differences affect the implementation of a major new national health program—the Affordable Care Act.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.302.675. Crisis Response in Public Health Practice: International Perspectives. 2 Credits.
Examines crises from the point of view of an agency leader responsible for designing and implementing an effective response while maintaining credibility and securing long-term policy change. Discusses recent crises including: global response to Ebola and Zika, responses to regulatory failures, foodborne outbreaks, and vaccine controversies. Offers students an opportunity to apply their knowledge by proposing a crisis response plan for a public health agency.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.302.843. SS/R: CRISIS RESPONSE IN PUBLIC HEALTH PRACTICE: INTERNATIONAL PERSPECTIVES. 2 Credits.
Examines crises from the point of view of an agency leader responsible for designing and implementing an effective response while maintaining credibility and securing long-term policy change. Discusses recent crises including: global response to Ebola and Zika, responses to regulatory failures, foodborne outbreaks, and vaccine controversies. Offers students an opportunity to apply their knowledge by proposing a crisis response plan for a public health agency.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.605. Public Health Policy: The Intersection of Science and Politics. 3 Credits.
Employs both lecture and interactive formats to explore the nature of the public health policy process, including how policy is a reflection of knowledge, political will and social strategy. Through presentations by instructors and guest speakers, offers examples of public health policy development highlighting the interaction of science and politics. Deepens and enriches the learning process through field trip(s) that actively engage students with Washington, D.C. public health advocates and policy makers with varying policy roles and perspectives.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.607. Public Health Practice. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.610. Issues in Injury and Violence Prevention. 2 Credits.
Addresses prominent sources of injury, including motor vehicles, falls, fires, and firearms. Explores the biological, behavioral, and social issues related to injury and violence prevention and policy. Emphasizes basic strategies for preventing injuries and deaths in the workplace, home, travel, and recreation, and the relative effectiveness of various types of approaches.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.615. Occupation Injury Prevention and Safety Policy and Practice. 2 Credits.
Provides a link between the public health approach to injury prevention, the traditions of safety science and engineering, and their relationship with ergonomics and biomechanics. Topics covered include identifying the injury problem; using surveillance and record-keeping systems; preventing injuries by government, unions, health departments, and industry; and comparing safety sciences and a public health approach to injury prevention.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.623. Fundamentals of Clinical Preventive Medicine. 3 Credits.
Examines the complex interplay between clinical preventive medicine, population medicine, and the practice of public health. Covers core topics for practice and for the preventive medicine board examination: prevention at the individual and community level; the evidence-based policy approach to prevention; and the creation and use of clinical governance standards and practice guidelines for prevention. Covers high-yield topics in short modules that focus on a clinical prevention frame, including the latest science and best practices in integrative medicine, chronic diseases, communicable diseases, injury and violence prevention. Covers prevention-based approaches to various issues of public health significance including the use of: mind-body medicine, lifestyle medicine, diet and nutrition wellness, motivational interviewing and health coaching, and evidence-based complementary and alternative medicine.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.305.630. Transportation Policy and Health. 2 Credits.
Provides an overview of the significant role of national politics on transportation safety policy in the United States. Using case studies of notable safety enhancement efforts in aviation, highway, and other transportation modes, students discover the significant roles and interactions of lobbyists, industry associations, politicians, and Federal Agencies in transportation safety research and subsequent safety improvement rulemaking. Through informal lectures, readings and a field trip to the Baltimore Washington International airport tower, students learn that transportation safety and injury prevention improvements often require significant efforts to successfully navigate the path from research findings to interventions that improve the traveling public’s safety and health.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.670. Principles and Practice of Injury Prevention. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.684. Health Impact Assessment. 3 Credits.
Since health impact assessment (HIA), is an approach that informs decision-makers about the potential health effects of proposed projects, programs, and policies made in areas outside of the health sector (e.g., education or housing), students learn about HIA through readings, lectures, and hands-on experience. Students study the rationale for conducting HIAs, review a range of analytic methods used to conduct HIAs analyze cases from international and domestic settings, understand its role in policymaking, and walk through the steps of how to conduct a HIA. Students then apply these skills through working on a HIA with a partnering organization.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.846. SS/R INTRODUCTION TO HEALTH IMPACT ASSESSMENT. 2 Credits.
Introduces students to health impact assessments (HIA), a systematic approach that informs decision-makers about the potential health impacts of proposed projects, programs, and policies that do not traditionally focus on health outcomes (e.g., education or housing), but are likely to affect the public’s health. Focuses on the application of HIA for policymaking, both in the U.S. and internationally. Students study the rationale for conducting HIAs, review a range of analytic methods used to conduct HIAs, analyze cases from international and domestic settings, and walk through the steps of how to conduct a HIA.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.861. Graduate Seminar in Injury Research and Policy. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.864. SS/RES: SOCIAL INEQUALITIES IN HEALTH IN LIGHT OF ROAD TRAFFIC SAFETY. 3 Credits.
Provides an overview of the various manners in which the road traffic infrastructure and environment may contribute to the occurrence of accidents and injuries and also to social inequalities in mobility and safety. Examines analytic methods related to injury research and prevention using examples from both LMICs and HICs.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.305.865. Advanced Seminar in Injury Prevention. 2 Credits.
Broadens, advances, and challenges existing skills and knowledge of injury prevention students and/or multi-disciplined injury prevention practitioners. Elaborates on the 9 Core Competencies for Injury and Violence Prevention, as developed by the SAVIR-STIPDA Joint Committee on Infrastructure Development. In addition to interactive lecture, students are given as many opportunities as possible, within the constraints of the 2-day training, to practice skills through practical application sessions for a facilitated hands-on, skills-development experience.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.601. Introduction to Bioethics in Public Health Practice and Research. 1 Credit.
Introduces MPH students to the basic principles and frameworks for research and public health ethics as well as concepts in professional and research integrity as a public health professional. Explores both domestic and global health examples. Focuses on introductory material on public health ethics, research ethics and professional integrity.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.625. Ethical Issues in Health Policy: Public Health and Health Care. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.650. Public Health and the Law. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.655. Ethical Issues in Public Health. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.660. Legal and Public Health Issues in the Regulation of Intimacy. 3 Credits.
Examines the ways in which the state regulates intimate and private relations and the justifications for such regulation. Particularly focuses on the attention paid to the public health and morality justifications offered by the state for the enactment and enforcement of privacy laws. Topics include: when state regulation of intimate decisions, actions and relationships is justified; the regulation of consensual sexual activity; the regulation of contraception and abortion; the regulation of same-sex sexual activity; and the regulation of same-sex marriage.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.662. Public Health Agencies: Law, Policy and Practice. 3 Credits.
Explores the important and expanding role that regulatory or administrative agencies, such as FDA and EPA, play in protecting and promoting the public’s health. Examines agencies’ ability to create and implement health policy, and discusses the legal limits on agency powers. Discusses how agencies develop regulations and employ other regulatory tools. Uses case studies to illustrate key concepts, such as the role of science in the regulatory process and the influence of politics on agency actions. Class sessions involve the interpretation and analysis of judicial opinions, regulations, and other administrative materials. Focuses on U.S. regulatory policy, but also examines examples and implications for international health policy. This course builds on the skills introduced in 306.650, and exposes students to new public health law and policy topics relevant to regulatory agencies.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.306.663. Legal and Ethical Issues in Health Services Management. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.665. Research Ethics and integrity: U.S. and International Issues. 3 Credits.
Acquaints students with an introduction to ethical theory and principles, including ethics requirements when conducting research with human subjects in the U.S. and/or developing countries. Through lectures and case discussions, covers the following topics: ethical theory and principles; informed consent in research; Institutional Review Boards; the just selection of research participants; cultural relativism; genetic research; ethical issues in vaccine research; ethics and human rights; appropriate use of placebos; what is owed to research participants, communities, and countries after research is completed; the use of animals in research; and scientific and academic integrity. Students in this course.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.670. Issues in LGBTQ Health Policy. 3 Credits.
Examines the impact and importance of health policy on the health, well-being, and lives of LGBTQ people. Explores how particular health policies, both historically and currently, have contributed to and/or reduced health disparities within LGBTQ communities.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.861. Graduate Doctoral Seminar in Bioethics. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.864. Fogarty Bioethics Fellows Seminar. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.306.865. Clinic for Public Health Law and Policy. 4 Credits.
Uses current and compelling public health problems to engage students in an interactive learning experience. Offers an opportunity for developing practical skills necessary to solve critical public health problems and interact with policymakers, legislators, regulators and/or litigators to propose and implement feasible legal and policy solutions. Engages clinic students in collaborative work with faculty and in leadership roles, setting the agenda for each class, researching the science and law, and formulating the proposed law and policy recommendations.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.307.864. Mental Health Services and Systems Practicum I. 0.5 Credits.
Part I of a year-long practicum that complements traditional coursework by providing exposure to the real-world settings and organizations that compose the mental health care infrastructure. Through site visits and opportunities to interact with representatives from different components of the mental health care system, students will develop an understanding of the historical evolution of the mental health care system in the U.S. and be introduced to the various settings through which mental health services are delivered, including emergency psychiatric services, intensive outpatient treatment, psychiatric rehabilitation, and early intervention.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.307.865. Mental Health Services and Systems Practicum II. 0.5 Credits.
Part II of a year-long practicum that complements traditional coursework by providing exposure to the real-world settings and organizations that compose the mental health care infrastructure. Through this course, students will develop an understanding of the operational, organization, and financial aspects of service delivery, barriers to implementation of evidence-based services, and the interaction of other service settings (e.g., social services, criminal justice) with the mental health care system.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.600. SS/R: Managing the COVID-19 Pandemic: From Epidemiology to Policy. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.602. Role of Government in Health Policy. 3 Credits.
Students explore the key political dimensions of the health policymaking process in the United States. Examines the roles of government institutions and political actors both inside and outside government in developing and implementing health policy. Uses past and present health care debates to illustrate concepts, theories and frameworks discussed in class. Students acquire an understanding of the political processes in which health policies are considered, and gain practical experience executing political strategies in the context of health policy campaigns. An optional doctoral level health politics "journal club" lab is available to students.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.604. Effective Writing for Public Health Change. 3 Credits.
Sharpen persuasive writing skills for public health change. Focuses on the key elements of successful advocacy writing, including fundamental writing mechanics and grammar, effective argumentation structure, rhetorical awareness, and analysis of the political/policy environment. Addresses and practices a variety of writing techniques, including story-telling, and data presentation. Participants review and analyze a wide range of persuasive writing formats (i.e., white papers, letters opinion-editorsials, and policy briefs), and participate in short in-class writing exercises and writing workshops.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.605. The Impact of the Financial, Economic and Political Crises on Health, Quality of Life and Well-Being of Populations. 3 Credits.
Analyzes the causes of the current worldwide crises, both in developed and developing countries, with a special emphasis on the United States, Canada and Europe. Focuses on the consequences of those crises on health and social policies that affect the quality of life, the well-being and the health of populations. Considers these issues from the political economy, social policy and health policy perspectives.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.610. The Political Economy of Social Inequalities and Its Consequences for Health and Quality of Life. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.308.615. The Opioid Crisis: Problem Solving Seminar. 3 Credits.
Uses interactive case-based and problem-based strategies to provide an overview of the impact of the opioid crisis in the United States. Enables students to develop skills to address different aspects of the opioid crisis. Addresses topics including stigma attached to opioid use and treatment of opioid use disorders, the development of strategies to address such stigma, the importance of data in identifying opportunities for response, assessment of current policy options for addressing the opioid crisis in the United States, and addressing the political challenges to support effective policymaking. Prepares students to undertake data collection at the state level.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.616. REGULATION OF PRESCRIPTION DRUGS & BIOLOGICS BY THE U.S. FOOD & DRUG ADMINISTRATION. 2 Credits.
Reviews FDA’s regulation of prescription drugs and biologics. Discusses the relevant parts of the Food Drug & Cosmetic Act and FDA’s regulations. Includes the development of drugs and biologics from preclinical studies to investigational new drug status to post-approval (“Phase IV”) studies. Discusses generic drugs, orphan drugs, and biosimilars. Examines ‘market exclusivity.’ Explores the public debate on ‘compassionate use’ of unapproved drugs and biologics. Introduces whether FDA should continue to withhold from public disclosure clinical data submitted to support the approval of drugs and biologics.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.630. U.S. Pharmaceutical Policy. 3 Credits.
Examines the pharmaceutical market and addresses the core issues related to pharmaceutical policy within the US health care system, such as drug pricing, regulation, and financing, drug coverage decisions, and ethical aspects of drug regulation. Considers the role of multiple health care system actors involved in and affected by pharmaceutical policy: drug manufacturers, drug regulation agencies, insurers, pharmaceutical benefits managers, health care providers, patients, families, and others. Provides an in-depth analysis of drug pricing strategies, coverage decisions, and access and affordability issues.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.650. Public Health Perspectives on U.S. Drug Policy. 3 Credits.
Provides a critical examination of U.S. drug policy through a public health lens. Course topics include: policy mechanisms for reducing drug-related harm; implications of various drug control policies on population health and wellbeing; drug control enforcement and the role of the criminal justice system; stigma and the politics of drug policy; the organization and financing of services for people who use substances, including treatment of substance use disorders; and policies and services targeting special populations.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.660. Food Industry, Politics and Public Health. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.680. Health Care and Congress: Perspective From K Street. 2 Credits.
Introduces the roles and functions of the entire legislative process -- from bill introduction, to committee markup, to the enactment of legislation. Throughout this process, students also examine the essential role of congressional lobbyists in shaping health care policy stemming from coalition building, knowing your opponents, organizing grassroots and campaign contribution efforts, identifying key Members of Congress and staff, working with the Administration, testifying on Capitol Hill, and knowing what and what not to tell your constituency. Using a case-study approach, students walk through the process of how an idea goes from an organization into federal or state law.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.701. Effective Presentations and News Media Interviews: Practical Skills for Public Health Practitioners. 3 Credits.
Enhances skills to construct and deliver oral presentations with clarity and impact. Provides techniques and guidelines to increase your effectiveness in translating public health information to various audiences, as well as communicating through the news media during both crisis and non-crisis situations. Topics include: basics of effective presentations, non-verbal communications, case studies, giving an interview, preparing talking points, advocacy and the news media, and communicating in a public health emergency. Students review videotapes of news coverage and participate as spokespersons in on-camera simulation exercises.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.810. Field Placement Health Policy-MSPH. 1 - 22 Credits.
Provides students with an intensive “hands on” extension of their academic training under the guidance of one or two senior level health policy professionals and program faculty. Students gain a deeper understanding of how health policies affect the public's health and further develop their professional health policy skills.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.842. SS/R: Emerging Dimensions of Social Determinants of Health Inequalities: A Transdisciplinary Integrated Approach. 3 Credits.
Introduces a novel transdisciplinary approach on Social Determinants of Health Inequalities (SDHI). Provides an in-depth understanding of macro, meso and micro levels, all of which generate health inequalities. Prepares students to examine the changes, causes, and potential policies to address systemic public health and equity-related subjects and the complex interactions between biology, behaviors, society and politics. Integrates a broad range of disciplines, ‘systems thinking’ practices, and methodological pluralism. Reviews research advances, including explanatory case studies and the evaluation of policies and interventions to reduce health inequities.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.308.851. Phase Internship. 1 - 6 Credits.
Public Health Applications for Student Experience (PHASE), offers students the opportunity to gain real world public health practice experience. PHASE internships require students to synthesize, integrate and apply academic theory in public health practice settings. By working on-site, students see first-hand how public health agencies function and engage in public health decision-making on a daily basis.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.308.867. MSPH Seminar in Health Policy. 1 Credit.
Introduces work undertaken in health policy settings and prepares MSPH students in Health Policy and Management for the field placement requirement in the second year of the program.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.600. Evaluating Quality Improvement and Patient Safety Programs. 3 Credits.
Prepares students to evaluate Quality Improvement/Patient Safety (QI/PS), projects by developing their competencies in the following areas: 1) Critiquing evaluations of QI/PS projects; 2) Designing a robust evaluation of a QI/PS project; and 3) Conducting a small scale qualitative study.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.605. Health Issues for Aging Populations. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.607. Innovations in Health Care for Aging Populations. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.609. Palliative and Hospice Care: Quality of Care and Health Policy. 2 Credits.
Addresses the policy problems related to improving access, quality and cost-effectiveness for palliative and hospice care within the current medical system, using case studies and workshop exercises. Also addresses the challenges and opportunities palliative and hospice care face under health reform. Considers questions such as: what communication strategies can be widely applied to help patients understand and choose care in accordance with their goals and values; how palliative care and hospice services should be delivered by accountable care organizations and medical homes; how palliative care can be integrated into the long-term care environment; and what quality measures should be integrated into performance measurement for all providers of the seriously ill.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.616. Introduction to Methods for Health Services Research and Evaluation I. 2 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.617. Introduction to Methods for Health Services Research and Evaluation II. 2 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.620. Managed Care and Health Insurance. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.631. Population Health Informatics. 3 Credits.
Introduces students to concepts, methods, and issues related to the application of health information technology (HIT) to population health. Emphasizes the population health potential of comprehensive electronic health records (EHRs), personal health records (PHRs), mobile health and telemedicine devices; and consumer focused internet-based based tools. Covers the uses of HIT to define and identify populations and sub-populations of interest, describe the health status and needs of populations, improve the health of populations, and evaluate services provided to populations. Emphasizes the use of HIT within both local, regional and federal public health agencies and population-based private health care organizations such as integrated delivery systems and health insurance plans. Lessons are mainly US oriented but are also applicable to other high and middle income countries.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.635. Population Health: Analytic Methods and Visualization Techniques. 3 Credits.
Introduces students to concepts, methods, and issues related to the application of data science to population health. Covers the uses of informatics to define and identify populations and sub-populations of interest, and describe the health status and needs of them. Describes the process of analyzing population health data from checking data quality to developing predictive models of utilization. Examines different data sources / methods to risk stratify a population of interest and compares the advantage and disadvantages of each data source / method. Describes various techniques to visualize data quality, depict the denominator selection process, and illustrate the risk adjustment results for large populations.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.670. Comparative Health Insurance. 3 Credits.
Provides an overview of the organization and financing of health systems in middle and high-income countries – focusing on population coverage, in terms of both how different groups are covered and the benefits package provided. Begins with a conceptual framework of financing flows in the health sector, and proceeds to identify a series of topics and case studies as the subject of specific lectures. Explores in depth the principal models for population coverage – including national health insurance, national health service, social insurance, private insurance, and mixed hybrid models. Provides case studies of health insurance coverage in specific countries, including the United Kingdom, France, Germany, Japan, Taiwan, Chile – with lessons drawn for transitional countries interested in expanding health insurance coverage.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.712. Assessing Health Status and Patient Outcomes. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.715. Advanced Methods in Health Services Research: Research Design. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.716. Advanced Methods in Health Services Research: Analysis. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.309.720. Applied Econometrics for Health Policy Research. 3 Credits.
Advanced econometrics course that builds on techniques introduced in the prerequisite courses. Topics addressed include techniques for risk adjustment and provider profiling, advanced topics in instrumental variables analysis, calculating appropriate marginal effects and standard errors, heterogeneous treatment effects, decomposition approaches, and methods of assessing the robustness of various estimates. Students work on independent research projects that provide hands-on exposure to research design and data analysis with Stata. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.730. Patient Safety and Medical Errors. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.731. Patient Safety in Developing Countries. 2 Credits.
Introduces students to the rapidly evolving field of patient safety in developing countries, focusing on health systems improvement. Explains the role of global organizations, national governments, institutions, local communities, and individuals in improving patient safety in developing countries. Reviews key global patient safety resources that can be utilized to enhance patient safety in developing countries. Students learn how to utilize a “problem solving paradigm” to patient safety, conduct a patient safety situational analysis, and develop an action plan for patient safety at the institutional level. Explores the use of patient safety partnerships between hospitals as a model for intercontinental collaboration. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.732. Human Factors in Patient Safety. 3 Credits.
Provides students with the essential concepts, methods and tools to enable them to design effective patient safety interventions and evaluate their impact. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.750. Applied Research Methods for Health Policy and Management. 3 Credits.
Helps Tsinghua DrPH cohort students synthesize methods content to conduct a valid statistical analysis applied to a Chinese-relevant data set or topic area. Students develop advanced skills in modeling and methods for conducting health policy, healthcare management, and health services research analysis. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.861. Graduate Seminar in Health Services Research and Policy. 1 Credit.
Provides opportunity to learn about the PhD process, faculty research, discuss issues and concepts relevant to the field of health services research, and learn skills important for academic and professional success in the field of health services research. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.864. Quality, Patient Safety, and Outcomes Research Practicum. 3 Credits.
Provides students in the Quality, Patient Safety, and Outcomes Research Certificate Program with an integrated experience in quality, patient safety, outcomes research, or a combination of the 3 domains in any one of a wide variety of settings in the health service delivery environment. Students are placed based on their individual goals and interests and the preceptors’ needs. Students join an active work group and are supervised directly or indirectly by the practicum preceptor. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.309.871. Health Services and Outcomes for Aging Populations Practicum I. 0.5 Credits.
Focuses on Home-Based Care and provides an in-depth overview of home-based medical care, skilled home health care, and telehealth. Complements traditional coursework by providing exposure to the real-world settings and organizations that comprise aging services delivery and infrastructure. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.615. Quality of Medical Care. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.720. Tsinghua DRPH Capstone. 2 Credits.
Helps Tsinghua DrPH students synthesize course content with a specific focus on problem identification and the development of testable hypotheses; how to develop a conceptual model, approaches for conducting a literature review and synthesis. Provides an overview of the DrPH written qualifying examination. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.820. Thesis Research HPM-DRPH. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.861. Graduate Seminar in Health Care Management and Leadership. 1 Credit.
Provides opportunity to discuss concepts and issues related to organizational performance improvement, organizational performance indicators, and change strategies. Facilitates preparation for comprehensive exams and the design and conduct of dissertation projects. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.865. Tsinghua DRPH Seminar. 1 Credit.
Provides opportunity to learn about faculty research, discuss issues and concepts relevant to the field of health management and leadership, and learn skills important for academic and professional success in the field. Intended for DrPH students from the Tsinghua cohort. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.311.867. Tsinghua Graduate Seminar. 1 Credit.
Provides opportunity to discuss concepts and issues related to organizational performance improvement, organizational performance indicators, and change strategies. Facilitates preparation for comprehensive exams and the design and conduct of dissertation projects. Intended for DrPH students in the Tsinghua cohort program. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.312.600. Managing Health Services Organizations. 4 Credits.
Presented a framework for understanding and managing health services and health sector organizations. Discusses strategic and organizational management [e.g., health care environment, stakeholders and customers, missions, vision and values, governance, organizational structure and design]; management & performance improvement tools [e.g., budgeting and financial management, logistics, continuous quality improvement, balanced scorecard, logical framework, learning networks and collaboratives; management role and functions [e.g., leadership style, employee performance, decision-making, human resource management].
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.601. Fundamentals of Management for Health Care Organizations. 3 Credits.
Discusses how to manage in health care organizations, including management processes, organizational structures, and types of governance and management issues of U.S.-based health care delivery systems. Topics to be examined include introduction to health care systems; managing health care organizations; health care environments, administrative management responsibilities; approaches to performance improvement and financial management concepts.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.602. Applied Methods for Optimizing Performance in Health Care Organizations. 2 Credits.
Performance Optimization Methods for Health Care Organizations is designed for MHA students who seek an understanding of continuous improvement in healthcare organizations. The content and framework of the course are designed to provide students with a broad exposure to current knowledge, competencies and management tools required for the effective operation of health care delivery systems. Focus is on how to apply continuous improvement tools and methodologies in various health care environments. Provides a detailed explanation of Lean and Six Sigma methodologies with opportunity to apply these skills to real world examples within health care settings.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.603. Fundamentals of Budgeting and Financial Management. 3 Credits.
Provides students with an understanding of budgeting as an important management tool. Focuses on budget development, evaluation of the financial status of a department or operating unit and the ability to determine what, if any, corrective actions need to be taken. Includes strategies for measuring and reporting skills. Considers the analytical tools used to support evaluation and decision-making including; volume adjusted variance analysis, benefit-cost ratio analysis, breakeven analysis, process flow analysis, benchmarking, and methods for building cost standards.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.604. Quantitative Tools for Managers. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.607. Quantitative Tools for Managers in Asia. 3 Credits.
Designed to provide concept and real-world application of quantitative tools (methods) commonly applied in the healthcare industry in Asia. Topics to be addressed include: facility location/payout, forecasting and financial analysis, re-engineering and utilization (productivity) management and quality matrix and improvement tools. Applications and case studies will focus specifically on the Asia-Pacific rim.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.610. Foundations of Organizational Leadership. 3 Credits.
Students develop an understanding of the role expectations of the organizational leader and the essential knowledge and skills the role requires. Provides a framework for understanding the process of working effectively with, influencing and leading others. Drawing from a variety of disciplines, emphasizes organizational effectiveness, developing a future vision and direction, leading change and building adaptive organizational cultures.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.617. Fundamentals of Financial Accounting. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.620. Performance Measurement in Health Care. 2 Credits.
Focuses on performance measurement for hospitals and describes key aspects and challenges of measurement initiatives in the current context of health care reform in general, and payment reform more specifically. The faculty, all senior health care professionals from the trenches, describe the regulatory environment, and Joint Commission and CMS requirements. They also summarize key measures used for public reporting and payment such as chart-abstracted clinical process, administrative data based outcomes, satisfaction, and efficiency. Highlights the advantages and disadvantages of each type of measure and discusses appropriate use of analytics and comparison data including patient satisfaction. Covers current public reporting and pay for performance initiatives and associated challenges. Another topic is emerging initiatives in the context of the electronic medical records, such as e-measures and meaningful use.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.621. Strategic Planning. 3 Credits.
Focuses on principles of strategic management and competitive analysis to support strategy development for health care organizations. Provides an understanding of how current business and management knowledge is applied to health care organizations to promote future success and competitive advantage. Examining contemporary theory and models, students learn to assess and develop an organization’s mission and vision; perform an internal and external strategic assessment; evaluate competitive threats and responses; develop organizational strategies and measures of success; and evaluate the decision-making approaches best able to develop and execute the best strategies.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.623. Financial Management in Health Care I. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.624. Financial Management in Health Care II. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.312.630. Healthcare Financial Management. 3 Credits.
Provides managers and professionals, both novice and experienced, with the financially quantitative knowledge needed for planning, controlling and managing in contemporary health care organizations under constantly changing conditions. Provides a foundation in the basic financial management skills as well as their advanced application. Introduces the basic business finance approaches to decision-making and governance. Provides students with a sound conceptual and applied understanding of the role that financial and cost management play in the business setting decision-making process. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.633. Social Determinants of Health. 2 Credits.
Studies the impact of environmental and social conditions on health and health care. Explores the importance of addressing social determinants of health in the design and delivery of health care services. Focuses on the role of health care organizations and professionals in addressing social determinants of health. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.635. Human Resources in Health Organizations. 2 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.650. Non-Traditional & innovative Health Services Partnerships. 1 Credit.
Introduces innovative, non-traditional partnerships as an integral part of achieving a value-based healthcare system. Examines growing trends in healthcare and basic principles and practices of non-traditional partnerships. Discusses the method of building balanced business models to ensure obtainable milestones and returns for all parties. Presents lessons learned by industry leaders who have experienced establishing partnerships with multi-national corporate, investor, and strategic entities focusing on clinical services, population health and health/IT activities. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.655. Organizational Behavior and Management. 2 Credits.
Explores organizational behavior perspectives and theories, which provide the framework for the critical study of management, and the interpersonal skills and knowledge required by managers in the dynamic health sector. Students develop an approach to thinking about health sector organizations and their complexity. Emphasizes current thinking and the application of theory to practice in the areas of management, employee motivation, group behavior and team development, power and influence plus conflict management and negotiation skills. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.660. Marketing in Health Care Organizations. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.670. Negotiation in Health Care Settings. 3 Credits.
Addresses the basic skills needed for effective negotiation of business relationships in health care and other settings. Focuses on understanding and developing a systematic approach to preparing for, structuring, and negotiating key business relationships. Presents basic process and conflict management skills needed for effective negotiation of business relationships in health care. Explores the ethics of negotiation. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.675. Medical Practice Management. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.678. Introduction to Healthcare Quality and Patient Safety: A Management Perspective. 2 Credits.
Introduces students to the latest thinking on healthcare quality and patient safety improvement through didactic sessions, interactive exercises and case studies that have direct relevance for the public health practitioner, healthcare administrator or clinician. Focuses on the specific domains of healthcare quality and patient safety based on the strategies recommended by the Institute of Medicine report "To Err is Human." Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.693. Introduction to Comparative Effectiveness and Outcomes Research. 3 Credits.
Introduces students to the motivation and methods of comparative effectiveness research. Reviews the problems faced by decision makers across the US health care system, and the priority topics for investigation. Examines the role of stakeholders, including payors, manufacturers, health care organizations, professional groups, providers and patients. Explains study designs and methods used in effectiveness research, focusing in particular on observational studies. Also describes the policy implications of this research. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.700. Leading Organizations. 3 Credits.
Focuses on the essential principles of personal and interpersonal leadership that can be used in an organizational setting to enhance performance, align and empower personnel, and assure organizational engagement. Applies leadership skills in a hands-on practical way that encourages students to challenge their own beliefs and assumptions about what constitutes leadership. Offers a comprehensive review of contemporary issues and perspectives on leadership. Explores multidisciplinary and systems-oriented approaches as well as classic leadership theory and evolving contemporary beliefs. Includes topics such as development of leadership theories, personal assessment and development, values and ethics, motivation, power, followership, group dynamics, multiculturalism in leadership, conflict resolution, performance excellence, and the change process. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.701. Strategic Leadership and Decision Making. 3 Credits.
Examines how leaders formulate coherent and effective strategies for policy-making in a complex and unpredictable environment, consider planning, organization, persuasion, and adaptation to changing national and international pressures, as well as broader studies of strategic decision-making in the modern world. Considers what it means to be an effective strategist, policy-maker, agenda-setter, and change agent. Assesses the difficulties involved with fulfilling these often difficult tasks within and outside of the organizational setting. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.702. Leading Change/Change Management. 3 Credits.
Examines the design, management, and leadership of teams in organizational settings. Focuses on the interpersonal processes and structural characteristics that influence the effectiveness of teams, the dynamics of intra-team relationships, and sharing of knowledge and information in teams. Participants will understand the theory and processes of group and team behavior to become successful leaders and adept in leading and managing groups and teams. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.310.703. Learning Organizations & Knowledge Management. 3 Credits.
Explores concepts of organizational learning, analyzes global research trends in how evidence-of-learning is captured in workplace settings around the world, and applies organizational learning models to foster and support innovative workplaces. Discusses how various factors such as diversity, complexity, crises, and increasingly advanced digital solutions (technology) change the pace in which an organization learns, adapts, and competes. Embraces a system perspective of learning at the organizational level-of-analysis grounded in the premise that innovation and sustainable change is contingent upon an organization's ability to create management structures that apply, analyze, evaluate and convey information, enhance decision-making, and achieve desired results through continuous learning.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.810. MHA Residency. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.861. MHA Case Competition. 2 Credits.
Introduces students to the case competition early in the year as part of their seminar. Provides students with the opportunity to apply what they have learned in the classroom setting to a real-world case study.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.862. MHA Capstone. 1 Credit.
MHA students synthesize and integrate the knowledge and skills they have acquired throughout the program and their field placement to the examination and analysis of a current healthcare trend and its potential implications for health care services and delivery systems.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.866. MHS Seminar in Health Finance and Management. 1 Credit.
Introduces students to current health care finance and management issues through a series of discussion sessions and field trips with program directors. Students will work with their advisor to identify appropriate learning opportunities and contacts that will allow students to develop a scholarly research paper on a topic related to health finance and/or management.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.867. MHA Seminar in Health Finance and Management. 1 Credit.
Presents major nutritional problems that influence the health, survival, and developmental capacity of populations in low and middle-income settings. Covers approaches implemented at the household, community, national, and international levels to improve nutritional status. Explores the degree to which malnutrition can be prevented or reduced prior to achieving high-income populations or certain economic development, through targeted public and private sector interventions that address the causes of malnutrition.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.869. Healthcare Consulting Practicum. 2 Credits.
Students are required to meet with the client (hospital sponsor of the consulting project) to develop an understanding of the project requirements. Prior to beginning the consulting engagement students will a) devise a plan for carrying out the consultancy, b) prepare a scope letter describing the project, the scope of work, deliverables, timeline and fee arrangement
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.873. SS/R: ADVANCED CONFLICT MANAGEMENT AND COACHING SKILLS. 1 Credit.
Builds upon the strategies and approaches presented in #312.871.97 SS/R - Leadership Skills: Negotiation & Conflict Management in Health Care. Part One teaches participants how to analyze, prepare for, and conduct a successful conversation or negotiation when emotions are running high. Uses case studies, experiential learning, group discussion, and lecture to introduce the "Difficult Conversation" framework developed by members of the Harvard Negotiation Project and a diagnostic tool for managing conflict. Participants are videotaped while participating in a conflict management simulation. Each participant receives an analysis and critique of her/his taped performance and a copy of their filmed simulation. Part Two equips participants with the skills needed to coach supervisees and colleagues through workplace conflicts and strengthen conflict management capacity in the organization. Develops understanding of and proficiency in the use of a conflict coaching framework by using lectures, case studies, group discussions and experiential learning.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.312.910. LAB for 312.810.
Lab for PH.312.810
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.601. Economic Evaluation I. 3 Credits.
Presents an introduction to the theory, methods, and application of economic evaluation in health care. Provides a specific focus on cost-effectiveness analysis, with an emphasis on identifying and measuring outcomes, understanding incremental cost-effectiveness ratios (ICERs), conducting sensitivity analyses, and incorporating time preferences. Considers decisions about the allocation of funds to different population segments or different types of programs, and to programs with great benefit for a few versus modest benefit for many. Prepares students for advanced topics in Economic Evaluation II-IV
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.602. Economic Evaluation II. 3 Credits.
Builds on the theory and methods taught in Economic Evaluation I to allow students to gain an understanding of intermediate topics in CEA. Provides students with experience of hands on development of decision trees. Focuses on having students become familiar with best practices in this growing field. Establishes the ability to critically appraise published work and construct simple cost-effectiveness models using Excel and other software. Prepares students for more complex modeling covered in Economic Evaluation III-IV.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.313.603. Economic Evaluation III. 3 Credits.
Builds upon the theoretical concepts taught in Economic Evaluation I-II by providing advanced content in the areas of decision analysis, cost-effectiveness, and alternative approaches of modeling research questions for these fields. Include approaches for calculation of costs and effectiveness measures using standard modeling methods. Compares outputs as a result of decision tree and Markov modeling and introduces sensitivity analysis. Includes group projects to produce a well-thought model on a topic of their own choosing in decision analysis or cost-effectiveness.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.604. Economic Evaluation IV. 3 Credits.
Builds upon the theoretical concepts taught in Economic Evaluation I-II and the methodological skills taught in Economic Evaluation III. Examines advanced methods, as well as areas of controversy with applications to international health. Explores methods for performing cost-effectiveness analysis (CEA) and benefit-cost analysis (BCA) with primary and secondary data. Examines alternatives to CEA, including cost-benefit analysis, stated preference methods, revealed preferences, and multi-criteria decision analysis. Emphasizes an applied experience in conducting economic analysis based on survey data as well as secondary data in a global context. Includes additional applications to adjust CEA to account for equity goals, to project program scale-up, and to account for “behavioral” agents.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.610. Health Economics for Managers. 3 Credits.
Applies the analytical tools of economics to issues in health care that are especially relevant to managers and leaders of health care organizations. Examines topics including: the use of economic incentives to influence health behavior; asymmetric information and the role of agency in health care; the application of behavioral economics to health care; government as payer and regulator, and equity/ethical considerations; the role of health insurance; and the theory of the firm as it applies to physicians, hospitals, and systems.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.620. Introduction to Behavioral Economics: Theory and Practice. 3 Credits.
Explores the theoretical framework of behavioral economics, and applies that framework to issues in health and healthcare. Addresses elements of the theory of behavioral economics including: prospect theory, System 1/ System 2 thinking, hyperbolic discounting, loss aversion, the endowment effect, framing and anchoring, mental accounting and commitment contracts, heuristics and biases, the power of the default, and pricing strategies. Applies these concepts to human behavior in general, as well as that of patients and physicians.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.641. Introduction to Health Economics. 3 Credits.
Introduces students to the application of economic tools to the interaction among the many stakeholders in the health care system and the public health system. Intended for those students who want an overview of health economics, but who do not expect to pursue additional courses in the field. Uses a standard health economics text as the main reading; also draws on articles from the popular press and professional journals that illustrate the tools of economics or their application to health care and public health issues.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.643. Health Economics. 3 Credits.
Introduces the analytical tools of economics and applies them to issues in healthcare. Topics include: resource allocation in health care; government as payor and regulator; asymmetric information and the role of agency; the market for health insurance; market structure and competitive strategy as it applies to health care organizations; the market for labor in health care; and the market for innovations and technology. Uses mainstream neoclassical microeconomic theory as the basis for analysis, but also explores the implications when the assumptions of this model are violated. Uses a standard health economics text as the main reading, but uses journal articles in the field to examine how the profession is analyzing health care and public health issues.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.644. Intermediate Health Economics. 3 Credits.
Building on the basic concepts and applications presented in Health Economics I, students in Health Economics II are exposed to some of the seminal topics in health economics, with a particular focus on the issues of human capital, economics of the household and the demand for healthy and risky behaviors. Topics include: the economic returns of education; economics of the household; the demand for health (Grossman Model); addiction; teen sex; obesity, the statistical value of a life, and fertility. While it will not be the focus of the class, some time will be spent on the dynamic modeling and econometric techniques that are used in the papers that we review. Teaching methods include lectures, group discussion and problem solving exercises, and hands on experiments.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.645. Economic Evaluation V. 3 Credits.
Explores the theoretical framework of behavioral economics that is relevant to the field of economic evaluation. Includes approaches for calculation of costs and effectiveness measures using standard modeling methods. Compares outputs as a result of decision tree and Markov modeling and introduces sensitivity analysis. Includes group projects to produce a well-thought model on a topic of their own choosing in decision analysis or cost-effectiveness.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.313.653. Advanced Health Economics I. 2 Credits.
Covers seminal publications in health economics and is targeted towards advanced Ph.D. students. Describes theoretical models in health economics for the determinants of health and demand for healthcare services, the foundations for cost-effectiveness analysis, the supply of healthcare services in competitive, monopolistic, and government-regulated markets, and the provision of private and public health insurance.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.654. Advanced Health Economics II. 2 Credits.
Covers seminal publications in health economics and is targeted towards advanced Ph.D. students. Describes theoretical models in health economics for the determinants of health and demand for healthcare services, the foundations for cost-effectiveness analysis, the supply of healthcare services in competitive, monopolistic, and government-regulated markets, and the provision of private and public health insurance.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.655. Advanced Health Economics III. 2 Credits.
Covers seminal publications in health economics and is targeted towards advanced Ph.D. students. Describes theoretical models in health economics for the determinants of health and demand for healthcare services, the foundations for cost-effectiveness analysis, the supply of healthcare services in competitive, monopolistic, and government-regulated markets, and the provision of private and public health insurance.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.656. Advanced Health Economics IV. 2 Credits.
Covers seminal publications in health economics and is targeted towards advanced Ph.D. students. Describes theoretical models in health economics for the determinants of health and demand for healthcare services, the foundations for cost-effectiveness analysis, the supply of healthcare services in competitive, monopolistic, and government-regulated markets, and the provision of private and public health insurance.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.670. MATHEMATICAL MICROECONOMICS I. 3 Credits.
Explores the essential topics of microeconomics: assumptions about markets, theory of the consumer, theory of the firm, market equilibrium, market failure, public goods, government intervention and game theory. Provides students with a graduate level introduction to microeconomics and will utilize both linear algebra and calculus. While discussion focuses predominately on first order conditions, students are encouraged to examine second order conditions, and other advanced theory and methods such as Kuhn-Tucker conditions, duality, and envelope theorems.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.671. MATHEMATICAL MICROECONOMICS II. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.685. The Economics of Tobacco Control. 1 Credit.
Introduces students to the economic tools and analysis used to confront the public health challenges caused by smoking. Reviews the evidence of the health and economic consequences of tobacco use. Emphasizes the rationale for increases in taxes, financial incentives to discontinue tobacco cultivation, and regulatory measures such as bans on smoking in public places and restrictions on access for minors. Provides economic tools and background information for public health specialists, policymakers, the news media, and others interested in using evidence-based policy to prioritize and address public health concerns related to tobacco control.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.790. Introduction to Economic Evaluation. 3 Credits.
Prepares students to read and interpret cost-effectiveness studies. Introduces the basic economic concepts that are needed in order to understand the recommendations from the United States Panel on Cost Effectiveness in Health and Medicine, such as the distinction between opportunity costs and budgetary costs. Considers review recommendations, particularly as they apply to cost-effectiveness research reports. Discusses the relationship between cost-effectiveness results and other elements of the health care policy decision-making process.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.793. Extended Exercises in Cost Effectiveness. 2 Credits.
Provides students with experience in seven short exercises that explore a variety of aspects of cost-effectiveness analysis. Students learn how to link all the steps together to complete a full cost-effectiveness analysis from start to finish. During the two day course, students work in Microsoft Excel to setup a workbook that will allow them to complete a cost-effectiveness analysis, manipulate the results to explore multiple possible assumptions, and have the opportunity to share their work in a format that is easily accessible.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.861. Public Health Economics Seminar. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.313.865. MHS Capstone in Health Economics. 2 Credits.
Produce a scholarly paper that provides a meaningful contribution to knowledge of the health economics. Affords the opportunity to work under the direction of a research mentor and presenting research results to a group of peers.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.315.600. CONCEPTS, THEORIES, AND CURRENT TRENDS IN HEALTH INFORMATICS. 2 Credits.
Introduces students to commonly-used terminology and concepts in health informatics; it is more than just the building and programming of databases and IT. Explores many definitions for informatics, and the difference between public health, population health, and clinical informatics, along with ways to evaluate Health IT through studying informatics frameworks and in-class activities. Offers students a look into the current developments, policies, and trends in the field of informatics from CMS's Meaningful use, Health Information Exchanges, and the growing use of mobile and electronic technology for provider and consumer use. Students have the chance to speak with researchers and developer in the field of mHealth. Students also participate in mock meetings where they assume roles of the different stakeholders that are typically at the table when building new information systems.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.700. Health Information Systems: Design to Deployment. 3 Credits.
Reviews health information systems, such as patient records, patient monitoring, imaging, public health, educational, bioinformatics and scholarly systems. Teaches the core architectures and technologies of these core systems, focusing on commonalities and differences and design.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.703. Leading Change Through Health Informatics. 3 Credits.
This course will review the health information systems through case studies in the evaluation processes. Presents a framework for design and evaluation of systems based on user needs, functions performed, related information activities, and available technology. Skills taught include the use of measures and methods for qualitative and quantitative evaluation of information systems, including cost, performance, effectiveness and benefit/outcome determination.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.707. Introduction to Biomedical and Public Health Informatics. 3 Credits.
This course will contrast differences in roles, needs, and solutions among major players in the national and commercial health IT and informatics communities. The course will define public health informatics and explain why things do or don't happen in IT at the national and institutional levels. The course will apply available sources of data, information, and knowledge to address healthcare and public health problems.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.708. HIT Standards and Systems Interoperability. 3 Credits.
Students learn the data, information, and knowledge standards critical to the successful implementation of local, regional, and national health-related information systems. Target competencies are to identify the appropriate level of HITSP standards for an informatics problem, and select the appropriate standard within that level; create use cases and an organizational process to define an interoperability standard for a specific healthcare/regional situation; participate in a national standards-creation process.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.709. Health Sciences Informatics, Knowledge Engineering and Decision Support. 3 Credits.
Provides a framework for understanding decision support in the workflow of the health sciences. Focuses on the types of support needed by different decision makers, and the features associated with those types of support. Discusses a variety of decision support algorithms, examining advantages and disadvantages of each, with a strong emphasis on decision analysis as the basic science of decision making. Students are expected to demonstrate facility with one algorithm in particular through the creation of a working prototype, and to articulate the evidence for efficacy and effectiveness of various types of decision support in health sciences and practice, in general.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.315.710. Health Information Systems: Design to Deployment 2. 3 Credits.
Reviews health information systems, such as patient records, patient monitoring, imaging, public health, educational, bioinformatics and scholarly systems. Teaches the core architectures and technologies of these core systems, focusing on commonalities and differences and design.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.600. Introduction to the Risk Sciences and Public Policy. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.605. Methods in Quantitative Risk Assessment. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.610. Risk Policy, Management and Communication. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.615. Topics in Risk Assessment. 2 Credits.
Uses a case study approach of a selected risk-based public health issue to integrate student's application of the skills in the risk sciences (risk assessment, risk management, and risk communication).
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.700. Climate Change Adaptation in Public Health: Large World Cities. 3 Credits.
Provides an overview of the science behind climate change and highlights the particular risks of global mega-cities due to their concentrated populations, urban heat-island effect, frequent proximity to coasts and rivers, and locus of transport and trade. Uses the WHO and US CDC Guides to Vulnerability for Public Health and the UN Habitat Guide to Vulnerability Assessment for Cities to identify populations at greatest risk from climate impacts. Critically evaluates through case studies actual climate and health adaptive policies as they are implemented in real-life contexts in several large, innovative world cities including San Francisco, London, Rio de Janeiro, Durban, and Copenhagen.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.317.860. SSR: RISK ASSESSMENT AND FOOD PRODUCTION PRACTICES. 2 Credits.
Focuses on applying the environmental health risk assessment framework to examine food production practices and the associated public health risks and benefits. Discussions of animal and crop agriculture and food processing encompass both historical practices and modern methods, and risks faced from the local to global levels. Lectures present case studies which delve deeper into specific topics, including industrial food animal production, veterinary drugs and antibiotic resistance, agricultural policy, chemical exposures, rural communities and food animal worker health, and sustainable production methods. Lectures draw from the literature and from firsthand experiences in research translation and science policy.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.317.864. Advanced Topics in Climate Change Policy. 2 Credits. Focuses on advanced issues at the forefront of climate change and public health policy and practice. Takes a complex-systems view that traverses the boundaries between sectors, spans government levels, and integrates perspectives across public and private actors. Topics to be determined each year according to faculty interest and student need. Uses case studies, policy analysis readings, and discussions to foster student learning. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.603. Applied Microeconomics for Policymaking. 3 Credits. Introduces the basic principles of microeconomics by emphasizing applications to the solutions of public problems. Students examine how markets operate and the role of government intervention. Acquaints students with public versus private goods, externalities, information asymmetry and other issues. Provides a theoretical framework for addressing policy problems. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.607. THE TOOLS OF GOVERNMENT. 3 Credits. Discusses the instruments available to government to achieve its policy and program objectives. Examples of these instruments include grants, contracts, regulation, vouchers, loans, and loan guarantees. Compares the varying outcomes resulting from the choice of instrument. Focuses on the challenges of managing the complex public-private collaborations from either direction. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.610. Statistical Analysis for Policy Making I. 3 Credits. Introduces the basic concepts and methods of statistics as applied to public policy analysis. Demonstrates methods of exploring, organizing and presenting data, and introduces measures of central tendencies, correlation, analysis of variance, and multivariate analysis. Introduces and employs the statistical package STATA, as well as Microsoft Excel to manipulate data and prepare students for the remaining course work in the sequence. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.611. Statistical Analysis for Policy Making II. 3 Credits. Introduces the basic concepts and methods of statistics as applied to public policy analysis. Demonstrates methods of exploring, organizing and presenting data, and introduces measures of central tendencies, correlation, analysis of variance, and multivariate analysis. Introduces and employs the statistical package STATA, as well as Microsoft Excel to manipulate data and prepare students for the remaining course work in the sequence. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.612. Statistical Analysis for Policy Making III. 3 Credits. Presents the core tools that are used in conducting policy analysis. Focuses on the basics of regression analysis and the practical applications to public policy problems. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.613. Statistical Analysis for Policy Making IV. 3 Credits. Presents the core tools that are used in conducting policy analysis. Focuses on the basics of regression analysis and the practical applications to public policy problems. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.615. Program Evaluation for Public Policy I. 3 Credits. Introduces the fundamental principles and practices involved in the design, implementation, and analysis of program evaluations. Topics to be considered include the evaluation of ongoing programs and test of new interventions being considered for broader adoption; determining whether programs are ‘working’; procedures involved in implementing an evaluation in the field, including potential pitfalls; procedures for collecting and analyzing data. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.616. Program Evaluation in Public Policy II. 3 Credits. Introduces the fundamental principles and practices involved in the design, implementation, and analysis of program evaluations. Topics to be considered include the evaluation of ongoing programs and test of new interventions being considered for broader adoption; determining whether programs are ‘working’; procedures involved in implementing an evaluation in the field, including potential pitfalls; procedures for collecting and analyzing data. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.623. Social Policy for Vulnerable Populations in the U.S.. 3 Credits. Explores the social determinants underlying poor health outcomes among vulnerable populations in the U.S. and considers policy approaches to address those determinants. Explores examples of vulnerable populations including but not limited to groups facing extreme poverty, homelessness, serious mental illness, addiction, and disability. Examines definitions of vulnerability, the array of social determinants contributing to poor health outcomes among vulnerable populations in the U.S.; current U.S. social policy approaches for vulnerable populations in the areas of healthcare, disability, poverty, housing, and criminal justice policy; and the politics of social policy in the US. Provides students with opportunities for integrating social policy concepts, theories, and frameworks through an in-depth analysis of the sources of vulnerability and related policy approaches to improve health and social outcomes in specific vulnerable populations. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.625. Management of Nonprofit Organizations. 3 Credits. Provides the necessary tools to effectively manage a nonprofit organization. Emphasizes financial, personnel and operations management, focusing on skills necessary to be an executive running a program within a large institution or heading an independent nonprofit agency. Addresses budgeting (both grant and organizational), reading and interpreting financial reports, grant writing techniques and staff and compensation management. Also examines how to work with the legal restraints and opportunities to maximize organizational effectiveness within the laws and regulations that make nonprofits different from the government and for-profit sectors. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.318.636. Urban Policy. 3 Credits.
Explores urban issues through a policy lens. Examines a wide range of urban characteristics and the challenges cities face from fiscal stress and governance to poverty, homelessness, and drugs. Explores policy remedies proposed or tried in the past, how well they have worked, and what other strategies may be tried. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.640. PRACTICAL POLITICS, POLICY AND PUBLIC HEALTH. 3 Credits.
Explores how one effectively influences policy and the connection between policy and politics. Addresses how the two are related via a practical and hands-on approach, focusing on effectiveness, influencing the legislative process, and practical skills. Addresses how to approach legislators and other policy makers, gain insight into the political process, understand how bills are drafted and amended, develop persuasive arguments, and build strategic political coalitions. A sample of issues, with a focus at the state level, include: insurance regulation, reproductive rights, mental health systems, air/water quality, programs for the disabled, and gun policy. Also considers non-health care issues, including education funding and policy, transportation, criminal justice system and jails, gambling/gaming, building development, and election law. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.654. ADOLESCENTS, CRIME AND JUSTICE. 4 Credits.
Explores theoretical frameworks for childhood transition to adulthood encompassing developmental psychology and neuroscience theories in the context of crime, delinquency and misconduct. Examines the US justice system in both the historical and present context as they relate to the response and treatment of children and adolescents involved in crimes. Explores and debates public policy questions related to the linkages between illicit drug use, crime, gangs, as well as incarceration, institutionalization and capital punishment for youth. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.610. Field Placement - MPP. 3 Credits.
All students must complete an internship to qualify for the MPP degree. Students are required to work at their internship placements for a minimum of 300 hours. Students are required to submit a policy portfolio to the MPP Office at the end of their internship: (1) A memo or paper that reflects on lessons learned during the placement and on the applicability of key concepts and skills learned during the first year of the masters program. (2) A sample of a written work product that was produced on the job. Typically, this would be a background paper or memorandum. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.864. Current Issues in Policy Analysis. 2 Credits.
Provides policy researchers with a set of analytical frameworks to gain a greater understanding of policy issues. Explores all aspects of a topical policy issue from its origins, transformations, and impact on health and social justice. Policy topics are determined each year according to faculty interest, student need, and policy saliency. Uses case studies, policy analysis readings, and discussions to foster student learning. Some sessions focus directly on translating policy research into policy alternatives while others focus on the political and social environment. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.318.867. MPP GRADUATE POLICY SEMINAR. 2 Credits.
Introduces work undertaken in public policy settings and prepares MPP students in Health Policy and Management for the internship requirement in the second year of the program and life after graduation. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.600. Quality Management in Health Care. 3 Credits.
Teaches students the basic concepts of quality in health care, and also equips them with approaches and skills to implement sustainable quality assurance programs in the health system. Introduces students to various quality improvement approaches (QC, QA, COI, TQM), role of standards and norms, use of quality improvement tools, methods of quality assessment, and approaches to operationalize and implement quality assurance programs. Explains the concepts of organization for quality improvement, including Quality Teams (QT) and Quality Control Circles (QCC). Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.601. Health Information Management and Decision-Making. 3 Credits.
The course provides an overview of Health Information Management System, its structure and functions. Identify information needs and indicators in the health systems and public health. Describe uses of information for effective management of health services. Review framework and organizational structure of HMIS. Provide a critical review of current issues problems in information management in the health systems in the context of developing countries. Describes various decision models and reviews decision making process in health care; application of information in performance tracking and analysis; monitoring of services and programs, supervision and impact evaluation. The course emphasizes designing health information systems and uses of IT. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.602. Project Management and Evaluation. 3 Credits.
Covers basic concepts and principles of project management and project management cycles. Provides learning opportunities for developing project management skills, and translates modern management concepts into project planning and management using a Log Frame Approach (LFA). Describes implementation structure, coordination and supervision mechanisms, and project evaluation methods. Reviews human aspects of project management such as motivating people, team building, and improving personal influence and effectiveness. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.603. Strategic Management. 3 Credits.
Presents a practical framework for formulating, implementing and controlling organizational and program strategies in public health. Provides an overview of the sub-systems, processes and models in strategic management as applicable to public health and health care organizations. Critically reviews the major environmental trends affecting healthcare organizations. Discuses how to use internal and external environmental analysis to identify the bases of sustained competitive advantage. Presents frameworks for strategy formulation and implementation including SWOT analysis and decision logic. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.319.606. Health Economics and Cost Effectiveness. 3 Credits.
Introduces economic concepts and principles for better resource management in the health care sector. Examines the public finance approach to policy questions relating to the role of government and other stakeholders. Acquaints students with the methodologies of both cost and demand analyses. Demonstrates how to make use of such analyses in policy planning and evaluation, including practical skills in cost effectiveness analysis of public health services and programs. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.607. Human Resources Management for Health. 3 Credits.
Focuses on the skills necessary for managing people in the health organizations and systems. Introduces concepts of human resource management in the context of organizations including organizational characteristics, learning organizations, human resource planning, recruitment and selection, job analysis and evaluation, performance appraisal, career planning, motivation, leadership, team work, and managing employee relations. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.608. Finance Management, Accounting and Budgeting. 3 Credits.
Explains the role of budgeting as a key component of the administrative process. Describes basic financial management concepts and techniques, and provides a foundation for integrating these techniques into health care organizations. Presents strategies for evaluating the financial status of a department or health unit in order to determine whether corrective actions need to be taken. Presents various analytical methods in management decision making, including benefit/cost ratio analysis, variance analysis, and break-even analysis. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.319.610. Principles of Management in Public Health. 3 Credits.
Introduces the basic principles of management in the context of public health. Covers basic management functions such as planning, organizing, implementation, coordination, monitoring, supervision, leading and controlling. Explores strategic management and decision making tools. Addresses core management areas in public health – planning, human resources management, management information systems, logistics and supply chain, financial management and budgeting, communication, and organizational culture and behavior. Discusses concepts of leadership and motivation. Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
