PH.260 (MOLECULAR MICROBIOLOGY AND IMMUNOLOGY)

Courses

PH.260.600. Introduction to the Biomedical Sciences. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.601. Vector-Borne Disease Control. 3 Credits.
Addresses various vector-borne disease control strategies that target any of the complex interactions between the pathogen, vector and host. Emphasizes on malaria, dengue and other arboviral diseases, as well as Chagas, leishmaniasis and schistosomiasis. Discusses some examples of control strategies such as current and future prophylactic, therapeutic and transmission-blocking vaccines and drugs, vector control, and vector-targeted pathogen transmission control. Addresses interactions between control methods and factors that influence efficacy.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.603. Biology of the Next Pandemic. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.604. Academic and Career Essentials. 1 Credit.
Introduces participants to methods for building skills and mindsets needed to complete their thesis and future scientific writing projects. Supports participants in developing a research question, writing a project outline, writing thesis drafts, communicating with reviewers, and formatting the thesis with references. Emphasizes learning how to give and receive helpful feedback. Acquaints participants with the benefits of building peer support networks. Builds career development skills including conducting job searches, CV/resume writing, effective communication, writing a personal statement, and interviewing.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.606. Major Global Infectious Diseases: Prospects for Control. 2 Credits.
Provides in-depth information on the basic pathogenic mechanisms of selected infectious diseases that continue to be of major public health importance worldwide, with an emphasis on underlying problems for development of effective public health interventions. Includes topics: HIV/AIDS, malaria, tuberculosis, measles, as well as infectious disease hazards that may become important in the future. Obtains a working knowledge of the biology of these diseases, including prospects for their effective management and control at both the individual and public health level, and of basic human immunology and vaccinology.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.607. Methods in life sciences, literature and practice. 2 Credits.
Focuses on understanding laboratory research technologies and applying this knowledge to evaluate current scientific literature. Achieves these goals through in-depth small group discussions with a range of faculty expertise, weekly assigned reading, short projects, short writing assignments or other activities. Includes both faculty and student leaders for each session; some sessions held in Core facilities. Includes topic areas: molecular biology, genomics, protein structure and strategies to evaluate the literature (primarily term 1), microscopy technologies, image analysis, flow cytometry and lab notebook archiving (primarily in term 2), cell biology, organelle dynamics, cell signaling, data management and experimental design (primarily term 3).
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.611. Principles of Immunology I. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.612. Principles of Immunology II. 3 Credits.
Introduces biological concepts of immunology; molecular nature of antigens; molecular basis for antibody and T-cell receptor structure and diversity; complement; hypersensitivity reactions; cellular basis for the immune response; cell-mediated immunity; adhesion molecules and coreceptors cell activation; cytokines and other soluble mediators; major histocompatibility complex (MHC) antigens; tumor immunology; transplantation immunobiology; mechanisms of resistance to microorganisms; tolerance; autoimmunity; and immuno-deficiency.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.613. Techniques in Molecular Biology. 3 Credits.
During five days of intensive hands-on laboratory instruction, students develop skills in the use of modern laboratory investigative tools in the area of molecular biology. They learn how to perform polymerase chain reaction (PCR) DNA amplification, quantitative PCR, DNA and protein gel chromatography. Western blotting, transformation of bacteria, and expression of heterologous proteins by bacteria.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.615. Critically Reviewing the Scientific Literature. 2 Credits.
Unlike the typical literature review course, focuses specifically on literature that is flawed in the approach or methods used to examine a scientific question and examines how well the conclusions drawn are justified by the data. Oral discussions of assigned literature are accompanied by weekly 2-3 page written reviews, which provides opportunities for students to get feedback on their writing skills, as well as their critical reading skills.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.623. Fundamental Virology. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.624. Advanced Virology. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.260.625. Scientific Grant Writing. 2 Credits.
Covers the critical components of a scientific grant application, common errors in grantsmanship and how to avoid them, grant application review criteria, ethics related to grant writing and reviewing, and identification of funding sources. Students prepare a short (5-page) draft proposal and a revision of this proposal following review. Proposal topics are selected by the students and developed with the instructor. Students also prepare critiques of other students’ anonymous, instructor-edited proposals for discussion in class.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.627. Pathogenesis of Bacterial Infections. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.631. Immunology, Infection and Disease. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.633. Autoimmune Diseases of the Endocrine Glands. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.635. Biology of Parasitism. 5 Credits.
Presents a biological basis of parasitic lifestyles with concurrent laboratory including host responses and parasite evasion of host defense mechanisms, transmission, epidemiology, diagnosis, clinical manifestations, pathology, treatment, and control of the major helminthic and protozoan infections of man.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.636. Evolution of Infectious Disease. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.650. Vector Biology and Vector-Borne Diseases. 3 Credits.
Presents the principles of transmission of human and animal pathogens by insects, mites and ticks. Covers basic arthropod biology with special attention to biological properties of vectors and their interactions with pathogens, basic components of arthropathogen disease cycles and principles of pathogen transmission dynamics. Special topics include emerging pathogens, vector genetics, traditional and next generation control strategies and venemous arthropods.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.655. Pandemics of the 20Th Century. 1 Credit.
Provides students with an overview of protein bioinformatics including computational and experimental approaches. Introduces amino acid and protein physical properties as well as the alignment and evolution of protein sequences. Presents protein structure and methods of structure determination as well as the use of protein databases and software for visualizing proteins and generating publication quality figures. Discusses methods for secondary and tertiary protein structure prediction including homology modeling. Also covers methods for modeling small/molecule-protein interactions within the context of rational drug discovery and design. Finally, introduces students to experimental and computational aspects of mapping protein interaction networks.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.656. Malariology. 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.657. Vector Biology and Disease Ecology Literature. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.658. Advanced Malariology. 2 Credits.
Presents current controversies and issues in malaria research and control in format of topical lecture and discussion each week. Weekly topics include Epidemiology, Pathogenesis, Mosquitoes, Drugs, Diagnostics, Vaccines, Elimination and Control and Economics of Different Interventions.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.663. Biological Response to Biomaterials. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.665. Biological Basis of Aging. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.700. How Do We Know? - Theory, History, and Practice of Science. 3 Credits.
Examines the nature and philosophical foundations of science using an interdisciplinary approach that emphasizes critical thinking and storytelling; discusses the principles of good scientific practice – rigor, reproducibility and responsibility (the 3R’s) - by exploring revolutionary discoveries in the life, public health and natural sciences; elaborates the relationship between theory, practice and serendipity in scientific discovery, and concludes with a discussion of the role of scientists in society.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.701. Anatomy of Scientific Error. 3 Credits.
Examines sources of error in scientific practice (misconduct or honest mistakes, methodological or systematic errors). Presents real-world examples to analyze errors that cause problems in science across the disciplines. Introduces methodological and mathematical approaches to error reduction. Explores the review- and retraction mechanisms for journal articles and grants as methods of science self-correction. Discusses historic and contemporary cases where errors constitute sources of innovation.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.260.704. Critical Dissection of the Scientific Literature: Taking the Scalpel to Journal Articles. 3 Credits.
Challenges the classical format of a journal club by preparing students to critically evaluate literature across the science disciplines. Acquaints students with concrete applications of the 3 R's of good scientific practice: rigor, responsibility, and reproducibility. Discusses techniques for effective research literature analysis and evaluation. Emphasizes in-depth understanding of journal article preparation, data evaluation, and the context of conclusions and discussion points within a given research field.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.705. Fundamentals of Quantitative Reasoning in the Biomedical and Health Sciences. 3 Credits.
Provides a broad introduction to interdisciplinary, scientific reasoning using current problems from science and society. Explores the fundamentals of basic probability and statistics using real-world datasets from a variety of basic science disciplines. Introduces data analysis and visualization in the natural and biomedical sciences. Explains the importance of computational and quantitative methods for hypothesis testing in science, technology, and daily life.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.707. Evidence-Based Teaching in the Biomedical and Health Sciences: Foundations. 3 Credits.
Acquaints students interested in teaching in biomedical and health professional settings with the foundations of how adults learn as well as the science of learning. Explores practical applications of evidence-based teaching techniques most relevant to the biomedical and public health professions. Discusses a variety of assessment techniques, and their alignment with learning objectives and educational strategies using state of the art course design.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.708. Evidence-Based Teaching in the Biomedical and Health Sciences – Practice. 3 Credits.
Provides students interested in gaining hands-on teaching experience with opportunities to plan and develop classroom materials on self-selected topics and deliver them in an interdisciplinary classroom setting, mentored by professional educators. Explores evidence-based instructional and assessment strategies to meet identified learner needs in the life and health sciences. Introduces students to a growing community of educational practitioners and scholars across the JHSPH departments and JH divisions.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.709. Evidence-Based Mentoring. 3 Credits.
Examines the literature on evidence-based mentoring. Introduces participants to authentic mentoring situations taken from real-life cases, enriched by practitioner interviews. Discusses responsibilities, reciprocities, and trust-building in mentor-mentee relationships. Emphasizes and nurtures mentorship practices based on self-responsibility, personal growth, active listening, social intelligence, mutual support, goal setting, ethics and equitable leadership, and cultural sensitivity. Focuses on collaborative, reflective practice with the goal of developing one's own, unique mentorship philosophy. Acquaints participants with the benefits of mutual peer support through an inclusive community of practice.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.710. Communication Practice for Health Science Professionals. 3 Credits.
Introduces students to current trends in presentation design and delivery. Focuses on narrative-oriented thinking to improve information dissemination. Emphasizes clarity and simplicity in communication practice in multiple settings, targeting both lay and interdisciplinary expert audiences.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.711. Principles of Neuroimmunology. 3 Credits.
Briefly covers the role of specific cells of the central nervous system (CNS), immune functions of CNS cells, and trafficking of leukocytes into the CNS, both in health and disease. Subsequently, it discusses various immune cells, e.g. monocytes, T cells, B cells, inflammatory molecules such as cytokines, chemokines, metalloproteinases, and prostaglandins in more detail, focusing on their role in either protecting from neurological disease or in causing CNS disease pathologies, including cognitive dysfunction. Presentations from experts in the field address topics and diseases, such as multiple sclerosis (MS), the blood brain barrier (BBB), HIV and other neurotropic microbes in eliciting neurological disease and emerging neurotropic infections.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.712. Clinical Immunology. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.713. R3 Writing Seminar for Graduate Students. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.714. Data Visualization Practice for Non-Expert Audiences. 1 Credit.
Introduces students to Gestalt principles of visual perception and pre-attentive processing in service of creating data visualizations in Excel and presenting in PowerPoint to non-expert audiences. Utilizes multiple chart and graph types in Excel to create diverse visualizations for the general public. Focuses on storytelling in design and visualization techniques in service of creating effective data-driven presentations for non-expert audiences. Concepts around data visualization in Excel are transferrable to other platforms (e.g., Tableau).
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.715. Unleash Your Writing Superpower: Crafting Clear, Concise and Persuasive Prose. 3 Credits.
Introduces a system of planning, organization, writing and revision. Emphasizes the importance of defining the message, audience and purpose for any piece of writing. Illuminates the basic elements of good writing. Focuses on clear, concise and persuasive writing. Explores the use of rhetoric and storytelling to maximize a piece of writing’s impact. Emphasizes best practices in various forms of writing.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.717. Graduate Immunology: the Immune Response. 3 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.260.720. Communications Primer for the Public Health Sciences. 1 Credit.
Acquaints students with the basics of effective oral and written communications in the form of brief exercises. Focuses on clarity and simplicity in presentation practice across disciplines and cultures to emphasize central messages. Introduces students to writing succinctly for advocacy using “compelling writers strategies” for opinion pieces and short speeches.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.730. Civility, Inclusion, and Professionalism in the Workplace. 1 Credit.
Discusses how to create an inclusive and welcoming workplace atmosphere. Emphasizes culturally sensitive and respectful communication. Familiarizes participants with workplace expectations, acceptable behaviors, and general professional deportment.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.800. MPH Capstone Molecular Microbiology and Immunology. 2 Credits.
The MPH Capstone is an opportunity for students to work on public health practice projects that are of particular interest to them. The goal is for students to apply the skills and competencies they have acquired to a public health problem that simulates a professional practice experience.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.801. Topics in Immunology I. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.802. Topics in Immunology II. 1 Credit.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.810. Field Placement Molecular Microbiology and Immunology. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.811. Field Studies in Ecology and Behavior. 3 - 6 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.812. The Performance of Leadership: Foundations. 2 Credits.
Explores leader and leadership as one’s natural self-expression through the ontological/phenomenological model in which ontology is the study or science of the nature and function of being (as in “being a leader”), and phenomenology is the method of direct access used to study and research the nature and function of being (as in being’s impact on “exercising leadership effectively”). Introduces a new conversational domain and transformative learning paradigm for leadership. Encourages discovery through discussion, exercises, and assignments. Prepares students to develop the skills necessary to create positive, effective, and sustainable change.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.815. The Business of Academic Biomedical Research. 1 Credit.
Addresses topics related to business aspects of academic biomedical research, and focuses specifically on organizational, managerial, political, strategic and economical characteristics of academic biomedical research. Prepares students for a career in academic biomedical research by discussing essential features for success, other than the actual science.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.820. Thesis Research Molecular Microbiology and Immunology. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.821. Research Forum in Molecular Microbiology and Immunology. 1 Credit.
Prepares students for their future careers by creating a forum in which they can practice the essential skills of scientific communication. Focuses on the oral presentation of research findings resulting from laboratory investigations or literature review to faculty and fellow students. Examines the students’ ability to condense and communicate background, hypotheses, experimental design, result presentation, and data analysis in a timed presentation.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.822. Seminars in Research in Molecular Microbiology and Immunology. 1 Credit.
Integrates academic training with current research in microbiology, immunology, and infectious diseases. Presents results of state of the art investigations of microbial diseases of public health significance, emphasizing experimental design and methodology for analysis and discussion by researchers from JHU and other biomedical research institutions.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.829. Summer Thesis Research. 12 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.830. Postdoc Research MMI. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.840. SS/R: Mol Microbiology & Imm. 1 - 22 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.844. Causation. 3 Credits.
Acquaints students with the central concept of causation across the biomedical and public health disciplines. Discusses how cause and effect relationships govern today’s research and evidence-based decision-making based on the social, physical, political, and economic determinants of health. Compares how fields and sub-disciplines in biomedicine and public health approach causation using research case examples that illustrate major morbidity and mortality-related health problems. Examines strategies to mitigate the limitations of causal inference.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
PH.260.848. Community-Based Practice Through Civic Engagement. 2 Credits.
Examines a participatory, online service-learning approach to enable students regardless of geographical location to engage in real-world, community-based, educational projects. Acquaint students to work with Baltimore-based community organizations through critical reflection on issues of equity and professional practice. Emphasizes the application of professional skills to real-world issues. Discusses the limitations and ethical aspects inherent to civic engagement work. Prepares students to develop evaluation plans and materials for the organizations’ identified programs. Emphasizes translation of experiences with Baltimore Community-based organizations into local contexts. Focuses on building reciprocal partnerships that reach beyond “consultancy.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.851. Laboratory Rotations. 4 - 8 Credits.
All departmental Sc.M. and doctoral students spend one and three terms, respectively, participating in the research activities of departmental faculty's laboratories. Students select appropriate rotations in consultation with their academic advisors and the departmental Graduate Program Committee.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.855. Pandemics of the 20Th Century. 1 Credit.
Focuses on major pandemics in the human population that have occurred in the 20th century: the 1918 influenza pandemic; the emergence of HIV; the severe acute respiratory distress syndrome (SARS) outbreak of 2002-03; and viral hepatitis (hepatitis B and C viruses). For each pandemic, discussion groups cover a clinical-, public health- and pathogen-oriented reading topic in order to give students a broad understanding of the overall importance of each, as well as to compare and contrast the key aspects of each disease. Focuses on acute and chronic diseases, as well as diseases with different routes of transmission and incubation times between infection and disease. Provides a comprehensive overview of how each pandemic emerged, what key factors dictated spread in the population, and how each pathogen induced disease.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.895. MPH Practicum: MMI. 1 - 4 Credits.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

PH.260.935. Lab for MMI 260.635. 3 Credits.
Laboratory sessions examine living and preserved parasites, gross pathology, histopathology, and vectors. Journal discussions based on research papers and topics of fundamental importance to parasitology will involve student participation in a seminar format.
Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).
