Courses

BU.132.615. Real Estate Legal Environment. 2 Credits.
Complex legal issues involved in a real estate development and management transaction are reviewed and analyzed in this course. Students explore legal topics, beginning with the basic principles of property law and extending to zoning and comprehensive planning, environmental issues and safeguards of site acquisitions through construction, including leasing, conflict resolution, operation, and sale of a real estate project. Negotiation, legal aspects of entity structures and resolving disputes are discussed.

BU.152.725. Real Estate Entrepreneurship. 2 Credits.
Real Estate is historically and fundamentally an entrepreneurial industry. This class examines how to become a real estate entrepreneur and compete in today's marketplace. Course topics focus on the skills and knowledge real estate entrepreneurs successfully use to thrive. Students will learn techniques such as: how to create wealth, real estate pro-formas, back-of-the-envelope calculations, leverage, attracting external investors, and creating a winning business plan. Students will work in teams on case studies.

Prerequisite(s): BU.241.610 OR BU.231.620 OR BU.920.604

BU.230.640. Development Modeling and Risk Analysis. 2 Credits.
This course emphasizes the estimation of development and investment budgets, including construction costs, construction loan interest, tenant improvements, lease-up reserves, marketing costs, and other soft costs. Ongoing property operations, including lease-up and refit allowances, are also examined. In this context, various capital structures are analyzed including mortgage loans, various equity investors, and possible refinancing opportunities. In addition, critical risks are examined using sensitivity analysis, Monte Carlo simulation, scenario analysis to calculate the most likely returns, and the probability of loss.

Prerequisite(s): BU.241.610 OR BU.231.620 OR BU.920.604

BU.234.610. Real Estate and Infrastructure Finance. 2 Credits.
This course examines selected techniques and issues in the area of real estate finance. Special emphasis will be placed on the design and valuation of mortgage instruments. This class will be conducted using a lecture format. While lectures will follow the textbook to some extent, supplemental readings will be required. Students are assumed to have some knowledge of finance. Before taking this class, it is important for students to have a clear understanding of the time value of money concept and knowledge of how to use spreadsheets to solve time value of money problems. Knowing how to use a calculator to solve present value problems (but without a clear understanding of the underlying concept) is not sufficient for tackling the course material of this class. Use of calculators or spreadsheets will not be taught in this class.

Prerequisite(s): BU.241.610 OR BU.234.610 OR BU.231.620 OR BU.920.604

BU.241.620. Design and Construction Feasibility. 2 Credits.
This course examines site planning, building design, and managing the construction project. The class is divided into two sections. The design section focuses on the conceptualization of the project, and the construction section looks at the management of the implementation of the project. Emphasis is placed on how the selection of materials, equipment, and systems can affect both the function and cost of the building. The course also includes a detailed review of the forms of construction contracts and associated documents commonly used in the industry.

BU.241.630. Real Estate Products and Emerging Trends. 2 Credits.
This course will provide an in-depth examination of the main value determinants, investment characteristics, principal risks, and most likely investors for traditional property types (office, apartment, industrial) and non-traditional property types (self-storage, data center, medical office). Students will learn how to build a valuation model for different property types, and will come away with an understanding of the nuances (quantitative and qualitative) that an investor must consider when determining the present worth of a particular property. The course will also cover emerging trends for financing real estate, such as crowdsourcing and tokenization.

BU.241.640. Net Zero Real Estate. 2 Credits.

BU.241.650. The Evolution of Housing, Property, and Public Finance Policy. 2 Credits.

BU.241.705. Selected Topics in the Real Estate Industry. 2 Credits.
This course will cover key "of the moment" issues that are affecting the real estate industry. Among many questions to be considered are: What is the future of office properties? How will decarbonization and other environmental, social, governance (ESG) regulations affect real estate? How is big data (tokenization) being used in real estate investing? This is a team-taught course that will bring together recognized industry leaders and a Carey faculty. The class includes a broad set of guest lecturers, including asset managers, real estate technology specialists, entrepreneurs, policy makers. Topics will be discussed in a relatively non-technical way, and the course will include a mix of case study, academic readings, and interactions with guest lecturers who handle these "of the moment" topics daily.

BU.241.725. Global Perspectives in Real Estate. 2 Credits.
This course focuses on real estate and infrastructure investment and financing issues around the globe. Using a case approach supplemented by assigned articles and textbook readings, the course examines the global nature of the real estate asset class, the market players and the issues they encounter when identifying opportunities, and executing real estate strategies in various global markets. Topics covered include risks and returns of international real estate investment; challenges in international real estate development; identification of opportunities and execution of real estate strategies around the world; REITs around the globe; and global real estate portfolio considerations.

Prerequisite(s): BU.241.610 OR BU.234.610 OR BU.231.620 OR BU.920.604
BU.241.735. Infrastructure Development for Sustainable Cities. 2 Credits.
This course provides an understanding of the demand and supply of sustainable infrastructure in a context of accelerating urbanization and growing risks related to global warming. The economic principles that make sustainability in cities so challenging are examined. Then, the course presents potential new strategies, new technologies, new business models, and new financing techniques that could make a difference in addressing a full range of infrastructure needs while addressing sustainability objectives. The course includes an understanding of the demand and supply side, cultural factors, politics, and the potential impact of technology and innovation on sustainability of infrastructure, real estate projects and urban policies.

BU.241.740. Project Finance and Public-Private Infrastructure Delivery. 2 Credits.
Project financing, as an alternative to conventional direct financing, is a well-established technique for large capital intensive projects. It grew in importance in the 1990s as a means of financing projects designed to help meet the tremendous infrastructure needs existing in both developed and developing countries. Whether project financing is suitable for such a purpose will depend, ultimately, on if this financing method offers the most cost-effective means of accomplishing the project after all social and private benefits and costs are considered. This course will discuss the basic project financing framework; the rationale for using project financing as opposed to direct conventional financing; the identification and management of risks associated with a large scale project; evaluating a project’s viability using analytical tools; sources of project funds; using public-private partnerships as a mode of project financing; and the crafting of contractual arrangements to allocate a project’s risk and economic rewards among the parties involved. 
Prerequisite(s): BU.234.610 OR BU.231.620 OR BU.910.611 OR BU.920.604

BU.242.701. Real Estate Investment Trusts: Analysis and Structuring. 2 Credits.
This course examines the role that Real Estate Investment Trusts play in facilitating commercial real estate investments through REITs using real estate capital and investment. Topics include the history, legal structure, and financial basis for establishing REIT portfolios. Students will examine the role of public and private capital markets in facilitating commercial real estate investments through REITs using real world examples. The primary course objective combines public company finance theory with practical real estate capital applications for intelligent business decisions in complex scenarios. Subjects include a history of the REIT industry; how REITs compete for capital and control investment risk; how to value individual REIT stocks and REIT shares generally; the regulatory and capital markets processes for the REIT IPO; quarterly and annual filings; follow-on capital raising; and recent developments and strategies in the REIT industry.
Prerequisite(s): BU.234.610 OR BU.231.620 OR BU.241.610 OR BU.920.604
BU.242.710. Real Estate Funds and Portfolio Management. 2 Credits.
A significant amount of commercial real estate investments is held in the form of large real estate funds. These funds typically range in size from $50 million to over $50 billion. Many of the large office buildings, regional malls, apartment buildings, and industrial parks in the country are held in these funds. Some funds invest in senior housing, student housing, parking, healthcare, and even farm and timberland. The managers of these funds are large institutional investment management firms that manage the properties by behalf of wealthy investors, pension funds, endowments, and sovereign wealth funds. The purpose of this course is to understand how these funds are organized, how they arrive at an investment strategy, and how to evaluate how they have actually performed relative to that strategy. Case studies and actual industry data will be used to reinforce the concepts discussed in the course.

Prerequisite(s): BU.231.620 OR BU.234.610 OR BU.920.604

BU.242.715. Real Estate and Infrastructure Valuation. 2 Credits.
This course integrates the real estate curriculum with the valuation process. The three traditional approaches to value (land and site valuation; building cost estimates, depreciation, direct capitalization; and yield capitalization) will all be covered in the course. This course is integral for students pursuing the appraisal/valuation concentration within the MS Real Estate and Infrastructure Program.

BU.242.720. Real Estate Capital Market Analysis. 2 Credits.
This course examines selected topics and issues related to real estate capital markets. Special emphasis will be placed on mortgage backed securities (MBSs) and real estate investment trusts (REITs). This class will be conducted using a lecture format. While lectures will follow the table of contents of the textbook rather closely, quite often supplemental readings are required. Students are assumed to have some knowledge of real estate finance. Before taking this class, it is important that students have a clear understanding of the design of mortgages and knowledge of how to use spreadsheets to solve mortgage related problems. Knowing how to use a calculator to solve present value problems is not sufficient for tackling the course materials of this class.

Prerequisite(s): BU.234.610 OR BU.231.620 OR BU.920.604

BU.245.790. Real Estate and Infrastructure Capstone. 2 Credits.
The Capstone course provides you with a mentored professional real estate industry experience that integrates all aspects of the MS in Real Estate and Infrastructure curriculum. You may choose one of three options: A real estate and/or infrastructure development project proposal. Students selecting this option work in teams to produce a state-of-the-art development proposal for a challenging site selected by Capstone faculty and judged by a project review board of faculty and industry professionals. A real estate and infrastructure research. Students selecting this option work individually or in teams to conduct original research and analysis of a critical issue in real estate and infrastructure development. An internship with a real estate company. Students selecting this option work on a portfolio of defined assignments mentored by an industry professional in a real estate company, agency, professional or industry association, or portfolio management company. Capstone choices will differ based on individual interests and career goals, but you are encouraged to choose experiences that provide an opportunity for growth and showcase your professional knowledge, skills and talent. Examples include a development proposal for a brownfield site; an analysis of weather-related risks in coastal infrastructure security; or a written participation/observation report based on a supervised internship. The structure of deliverables may vary, but deliverables for all capstone experiences will include a written report, presentation slide deck, and oral presentation. Students must receive approval and permission from their academic adviser before enrolling in this course.
