

CHEMICAL AND BIOMOLECULAR ENGINEERING, BACHELOR OF SCIENCE

Graduates receive a Bachelor of Science degree in Chemical and Biomolecular Engineering accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. As permitted under the ABET guidelines, we continually update our undergraduate programs to include the latest advances in chemical and biomolecular engineering. Such modifications will enable us to offer the best possible educational experience to our undergraduates. For the latest chemical engineering educational programs, potential applicants are referred to our website at <http://www.jhu.edu/chembe/>

Program Requirements

(See also General Requirements for Departmental Majors (<https://e-catalogue.jhu.edu/engineering/full-time-residential-programs/undergraduate-policies/academic-policies/requirements-bachelors-degree/>))

The Bachelor of Science degree requires a minimum of 128 credits. Additional details are given in the *Chemical and Biomolecular Engineering Undergraduate Advising Manual* available from the department or online (<https://engineering.jhu.edu/chembe/academics/undergraduate-studies/undergraduate-academic-program/>).

The 128 credits must include:

Code	Title	Credits
Chemical and Biomolecular Engineering Core Courses		
EN.500.113	Gateway Computing: Python	3
EN.540.101	Chemical Engineering Today	1
EN.540.202	Introduction to Chemical & Biological Process Analysis	4
EN.540.203	Engineering Thermodynamics	3
EN.540.301	Kinetic Processes	4
EN.540.303	Transport Phenomena I	3
EN.540.304	Transport Phenomena II	4
EN.540.306	Chemical & Biomolecular Separation	4
EN.540.311	Projects in ChemE Unit Operations with Experiments	4
or EN.540.313	Projects in ChemBE Unit Operations with Experiments	
Select one of the following:		3-6
EN.540.314	ChemBE Product Design	
EN.540.309 & EN.540.310	Product Design Part 1 and Product Design Part 2	
EN.660.345 & EN.660.346	Multidisciplinary Engineering Design 1 and	3
EN.540.315	Process Design with Aspen	2
EN.540.409	Dynamic Modeling and Control	4
EN.540.490	Introduction to Chemical Process Safety ¹	1
Engineering Electives ²		
Select 5-8 credits of engineering electives		5-8

Physics Courses and Laboratories		
AS.171.101	General Physics: Physical Science Major I	4
or AS.171.107	General Physics for Physical Sciences Majors (AL)	
AS.173.111	General Physics Laboratory I	1
AS.171.102	General Physics: Physical Science Major II	4
or AS.171.108	General Physics for Physical Science Majors (AL)	
Basic Chemistry Courses and Laboratories ³		
AS.030.101	Introductory Chemistry I	3
AS.030.105	Introductory Chemistry Laboratory I	1
AS.030.102	Introductory Chemistry II	3
AS.030.106	Introductory Chemistry Laboratory II	1
Advanced Chemistry and Biology Courses		
AS.020.305	Biochemistry	3
AS.030.205	Introductory Organic Chemistry I	4
EN.540.307, AS.020.2XX Elective Course, or AS.030.2XX Elective Course ⁴		3-5
Select one of the following: ⁵		1-3
AS.020.315	Biochemistry Project lab	
AS.030.225	Introductory Organic Chemistry Laboratory	
AS.030.305	Physical Chemistry Instrumentation Laboratory I	
AS.250.253	Protein Engineering and Biochemistry Lab	
Mathematics Requirement ⁶		
AS.110.108	Calculus I (Physical Sciences & Engineering)	4
AS.110.109	Calculus II (For Physical Sciences and Engineering)	4
AS.110.202	Calculus III	4
or AS.110.211	Honors Multivariable Calculus	
AS.110.302	Differential Equations and Applications	4
or EN.553.291	Linear Algebra and Differential Equations	
Humanities and Social Sciences/ Writing Requirements		
EN.661.315	Culture of the Engineering Profession	3
Total Credits		95-105

¹ Students also must have a grade point average of at least 2.00 in the chemical and biomolecular engineering core courses to graduate. The core courses for GPA calculation comprise all of the above courses except for EN.540.101 Chemical Engineering Today.

² All courses offered by the Whiting School of Engineering that hold an Area Designation of E, and are taken for a letter-grade (not S/U) are approved as Engineering Electives. Additionally, up to 4 credits of Research, conducted within a WSE department, are approved. In addition to these, other accepted courses are AS.250.302 Modeling the Living Cell, EN.500.132 Bootcamp: Java, EN.500.133 Bootcamp: Python, EN.500.134 Bootcamp: MATLAB. Further exceptions exist to these courses; please consult the ChemBE Undergraduate Manual for full stipulations.

³ If you are receiving chemistry credits via AP, IB, or GCE exam, consult your academic advisor to discuss which chemistry course(s) may be appropriate for you.

⁴ Students need to take 3-5 elective credits beyond the required courses to meet the 13-credit total Advanced Chem/Bio Requirement. These courses must be chosen from the 030 or 020 Departments, should be at the 200-level minimum, and must carry an "N", Natural Sciences, area designation. Additionally, some courses offered by 250 (Biophysics) may be acceptable. MCB Track students must take EN.540.307 Cell

Biology for Engineers or AS.020.306 Cell Biology, IN Track students must take AS.030.452 Materials & Surface.

- ⁵ Students doing the MCB Track must take either AS.020.315 Biochemistry Project lab, or AS.250.253 Protein Engineering and Biochemistry Lab here. Students doing the IN Track must take AS.030.305 Physical Chemistry Instrumentation Laboratory I here.
- ⁶ Calculus is so essential to Chemical Engineering that a grade of C- or better in both Calculus I and Calculus II is required.

- *Humanities and Social Sciences Courses.* Eighteen credits designated as Humanities or Social and Behavioral Sciences are required (6 courses of at least 3 credits each). At least one of these courses must be an advanced course at the 300-level or higher in addition to Culture of Engineering. See the Chemical and Biomolecular Engineering Undergraduate Advising Manual for more details.
- *Writing Courses.* Two writing-intensive courses are required. One of the courses must be EN.661.315 Culture of the Engineering Profession. The courses that are taken to satisfy the university writing requirement must be passed with a grade of C- or better.
- *Undesignated Electives.* A minimum of 128 credits is required for the degree. Therefore, in addition to all the credits taken to fulfill the requirements mentioned in the various sections above (e.g., chemical engineering core courses, engineering electives, basic science, advanced chemistry electives, mathematics requirement, and Humanities and Social and Behavioral Sciences courses) students will need to take some undesignated credits.

Tracks

Students pursuing a degree in Chemical and Biomolecular Engineering have the option of concentrating on specific fields including Interfaces and Nanotechnology and Molecular and Cellular Bioengineering. These focus areas have additional and/or alternate requirements, as described.

Interfaces and Nanotechnology (IN) TRACK

Students must fulfill the following requirements:

- The Advanced Chemistry and Biology laboratory requirement is fulfilled with AS.030.305 Physical Chemistry Instrumentation Laboratory I.
- AS.030.452 Materials & Surface is required and satisfies 3 credits of the Advanced Chemistry and Biology electives.
- Six credits of interfaces and nanotechnology electives are required- See department for a list of approved electives.

Molecular and Cellular Bioengineering (MCB) Track

Students must fulfill the following requirements:

- Students take either AS.020.306 Cell Biology or EN.540.307 Cell Biology for Engineers. It satisfies 3 credits of the Advanced Chemistry and Biology electives.
- The Advanced Chemistry and Biology laboratory requirement is fulfilled with AS.020.315 Biochemistry Project lab or AS.250.253 Protein Engineering and Biochemistry Lab.
- Six credits of bioengineering electives are required. See department for a list of approved electives.
- Students take EN.540.313 Projects in ChemBE Unit Operations with Experiments instead of EN.540.311 Projects in ChemE Unit Operations with Experiments.
