CIVIL ENGINEERING, PHD

The Ph.D. program at the Johns Hopkins University Department of Civil and Systems Engineering (https://engineering.jhu.edu/case/graduate-programs/phd-program/) aims to inspire the leaders of tomorrow to take on the challenge of creating and sustaining the built environment that underpins our society. Our graduate students work with faculty members who are world-renowned leaders in their fields and contribute to research that has a tremendous impact on society. The graduate program focuses on three fundamental areas of Structural Engineering, Mechanics of Materials, and Systems Engineering. Current projects include fracture and fatigue in materials and structural systems, earthquake engineering, and applying systems approaches to improving patient flow in hospitals.

Students graduate from the program with a sense of the responsibility that the civil engineering profession accepts for applying the principles of engineering sciences for the betterment of the built environment and society. Its graduates have an appreciation of professional ethics and the value of service to their profession and society through participation in technical activities, and in community, state, and national organizations.

Financial Support

Financial support from the Department of Civil and Systems Engineering provides full tuition, health insurance coverage, matriculation fee, and a 12-month stipend for enrollment.

Program Requirements

Ph.D. student requirements for the Civil Engineering Department include:

- 8 Courses at the 600- or 700-level, completed with a grade of B or better
- Department Qualifying Examination (DQE)
- AS.360.625 Responsible Conduct of Research short course
- EN.500.603 Graduate Orientation and Academic Ethics short course
- Final Ph.D. Thesis Defense and Graduate Board Oral Examination (GBO)

There are a number of Whiting School of Engineering policies related to Ph.D. students, which are listed at http://engineering.jhu.edu/graduate-policies (http://engineering.jhu.edu/graduate-policies/).

Typical Timeline for Ph.D. Students

Year 1 Fall:

- Selection of first semester courses (typically 4) with Director of Graduate Studies or research advisor
- Language/communication testing and placement for International Students
- Responsible Conduct of Research (AS.360.625) short course (https://engineering.jhu.edu/wse-research/resources-policies-forms/responsible-conduct-of-research/)
- Academic Ethics (EN.500.603 Graduate Orientation and Academic Ethics) short course
- First semester coursework and research

Year 1 Intersession:

- Intersession research
- Annual review completed by January 31

Year 1 Spring:

- Second semester coursework and research
- Department Qualifying Exam (DQE) (completed in May or June)

Year 1 Summer:

- Research

Year 2 Fall:

- Research
- Coursework (typically finishing up this semester)
- Ph.D. Thesis Committee Meeting encouraged prior to end of Fall semester

Year 2 Intersession:

- Research
- Annual review completed by January 31

Year 2 Spring:

- Research
- Coursework (if necessary)

Year 2 Summer:

- Research

Year 3:

- Research (Year-round)
- Ph.D. Thesis Committee Meeting encouraged
- Annual review completed by January 31

Year 4 and Beyond:

- Research (Year-round)
- Ph.D. Thesis Committee Meeting encouraged every Fall prior to the end of the semester
- Annual review completed by January 31

Final semester:

- Thesis Defense and Graduate Board Oral Examination (GBO)

Note: Teaching assistant duties may also be assigned during one or more semesters.

Language/Communication Testing and Placement

All Ph.D. students who do not have a prior degree from an English speaking university must take an English Language Assessment. If it is determined at the assessment that the student needs further English language instruction, he/she will be required to take AS.370.602 American English Pronunciation or equivalent.

Determination of Permanent Advisor

Students are admitted to work with a specific advisor, the faculty member, listed in the offer letter. If several faculty in the Department of Civil and Systems Engineering expressed a strong desire to work with the student, a nominal advisor will be assigned before the first semester to aid in course selection and provide general advice on Ph.D. degree
requirements. In this case, a permanent research advisor, from the faculty who expressed interest, will be selected by the end of the first semester.

A Ph.D. student will not be able to remain in good standing with their academic and research progress if they do not have a research advisor. A student who is without a research/dissertation advisor for a period of 3 months may be placed on probation or terminated from the Ph.D. program.

**Intersession**

Intersession (the period between Fall and Spring terms) is an important time for research. Intersession is not a vacation. Any leave taken during intersession is subject to the policies outlined in the Graduate Student Assistant Leave Guidelines (http://engineering.jhu.edu/include/content/pdf/RA_TA%20leave%20guidelines%20(FINAL).pdf). Release time (if any) granted in that period must be approved by the advisor.

**Department Qualifying Examination (DQE)**

The DQE is a comprehensive oral exam to determine whether or not the student is properly prepared to continue in the Ph.D. program. All first-year students studying for a Ph.D. take the DQE towards the end of their second semester, typically in May of the first year. This exam evaluates whether the student is prepared to continue in their Ph.D. studies based on their research progress to date and plans for future research, as well as a grasp of the underlying mathematics and engineering concepts. Possible outcomes of the exam are Pass, Retake, or Fail. Only an outcome of Pass considered passing the exam. If the student receives a Retake, they are provided a single retake of the exam, typically in the Fall of the second year. Possible outcomes of this exam retake are Pass or Fail. If the outcome of the exam is Fail, the student may pursue, with approval from the chair, a MSE degree. Financial support for a student beyond a failed DQE is not typical.

**Annual Reviews**

Reviews of all Ph.D. students in Civil Engineering must be performed annually prior to January 31, and are consistent with the WSE policy found in the Graduate Student Academic Review Policy (https://engineering.jhu.edu/include/content/pdf/Acad%20Review%20Policy%20(FINAL).pdf). The review process follows the format given in the annual review form. The completed form must be submitted to the Sr. Academic Program Coordinator by January 31. If this annual review is not completed by this date, the student’s funding may be jeopardized.

**Ph.D. Thesis Committee**

Every Ph.D. student must have a Thesis Committee of at least 3 faculty members. The advisor, in consultation with his/her student, selects the makeup of the committee, and this information is recorded in the student’s file. The student is encouraged to meet with this committee a minimum of once per year. The thesis committee also typically serves as a subset of the actual GBO examination committee and forms the final Ph.D. defense committee. This committee must consist of a minimum of 2 full-time faculty of the Civil and Systems Engineering Department.

**Responsible Conduct of Research**

Every Ph.D. student of the Whiting School of Engineering is required to take the Responsible Conduct of Research course (details on the requirement can be found on the WSE Policy on the Responsible Conduct of Research Training (http://engineering.jhu.edu/wse-research/resources-policies-forms/responsible-conduct-of-research/) webpage). For Civil Engineering students, this should be completed in the Fall or Spring of the first year of studies. Students who do not complete this requirement prior to Fall of their third year of studies may put their funding in jeopardy.

**GBO Examination**

The University maintains complete guidelines for the Graduate Board Orals here. (http://homewoodgrad.jhu.edu/academics/graduate-board/degree-candidacy/) The GBO committee consists of 5 members, (3 in department, 2 outside) with 2 alternates (1 in department, 1 outside) and is selected by the Department Chair and the Director of Graduate Studies, who will consult with the student’s advisor. The GBO in the Civil and Systems Engineering Department is a Final Exam and therefore held simultaneously with the student’s thesis defense. Both students and advisors should be aware that 4-8 weeks advance notice is needed in order to allow for scheduling the exam with the faculty and with the Graduate Board.

The student should provide a copy of the dissertation to the GBO committee at least 2 weeks prior to the exam. The exact format of each GBO examination is specified by the individual Chair of the GBO committee; however, a typical format is described here. The public thesis defense is conducted (see below) followed by a private examination conducted by the GBO committee. The examination questions may be on any topic of the committee members’ choosing, but many of the questions related to the student’s research. At the conclusion of the examination, the GBO committee will recommend one of the following outcomes: pass, conditional pass, fail with re-examination, fail (final).

**M.S.E. Degree for Ph.D. Students**

Ph.D. students may petition for a non-terminal M.S.E. degree following a passed DQE. If a student fails the DQE, he/she may petition for a terminal M.S.E. degree. In all instances, the student must have satisfied the M.S.E. degree course requirements as detailed here (https://engineering.jhu.edu/case/graduate-programs/masters-program/m-s-e-civil-engineering/).

In instances where the research is highly interdepartmental, the student, with permission of the advisor, may request that the M.S.E. degree be awarded by another department in the Whiting School of Engineering. In such cases, the student must have satisfied M.S.E. degree requirements and receive approval from the awarding department, as well as satisfied M.S.E. degree requirements of the Department of Civil and Systems Engineering and receive approval from our Department Chair. In all cases, the awarding of any JHU M.S.E. degree to a civil and systems engineering Ph.D. student may only occur after the student has completed the DQE.

**Thesis Defense**

The Thesis Defense, together with the GBO, is the final examination before the conferral of the Ph.D. degree. The student defends his/her thesis in a seminar setting that is open to the public. The seminar is followed by a comprehensive examination of the student by the GBO committee.

**Ethics:** The Department of Civil and Systems Engineering is dedicated to upholding the highest standards of academic and research integrity. Plagiarism, and other forms of unethical conduct, are not tolerated. Students are referred to the JHU Graduate Board Policy (http://homewoodgrad.jhu.edu/academics/policies/) webpage and the Whiting School of Engineering’s Responsible Conduct of Research Policy (https://engineering.jhu.edu/wp-content/uploads/2013/07/WSE_Research_Rules.pdf) for a discussion of ethics and university policies.
Thesis Readers: A committee of at least 3 members is required to read the candidate’s dissertation and sign the Readers Letter confirming that the dissertation meets the standards of a Ph.D. thesis. The letter may be signed at the time of the defense if the thesis is found satisfactory or may be signed at a later time if corrections are required. The Advisor in consultation with the department selects the committee members, at least 2 of whom must be full-time faculty of our department. The 3 readers are also expected to serve on the GBO committee. Selection of the readers should be done at the beginning of the semester in which the student plans to graduate. It is the student’s responsibility to keep the committee members apprised of all deadline dates.

Scheduling and Pre-Defense: The Defense should be scheduled, at least 4 weeks in advance through the department's Academic Program Coordinator. A complete written dissertation should be given to the GBO committee at least 14 days in advance of the exam. Failure to meet this 2-week deadline will result in rescheduling the Ph.D. defense and GBO exam. A thesis abstract suitable for advertising the defense should be delivered to the Academic Program Coordinator at least 14 days in advance. The date and place of the Defense, along with the thesis abstract, will be circulated by the department 5-7 days prior to the exam.

Post-Defense: Completion of the Ph.D. requirements typically takes 4-8 weeks after a successful defense examination. All data and source codes related to the thesis should be properly archived according to requirements set forth by the Advisor. Any changes or additions specifically requested by the reviewers before or during the defense seminar should be incorporated into the thesis in consultation with the Advisor. A final copy of the thesis must then be made available to the reviewers for inspection no less than 48 hours before the deadline date for filing set by the Graduate Board.

Additional Information: It is the responsibility of the student to be aware of requirements and deadlines. It is suggested that this information be obtained before the start of the semester of intended graduation. All students should plan the timing of the final defense accordingly (making sure to account for the 4-8 week period following the defense) to satisfy any deadlines related to upcoming graduation or exhaustion of funding.

University requirements for the thesis can be obtained from the Graduate Board website (https://homewoodgrad.jhu.edu/academics/graduate-board/). Information sheets entitled “Dissertation Requirements” are available to student and contain details on the form, cost, and timing for submitting the thesis. Doctoral Theses must be submitted to both the ETD (Library) and the department. The deadline date for filing is set by the Graduate Board Office. This date also applies to filing with the Whiting School Graduate Committee and with the department. A receipt of ETD approval email must be sent to the Academic Program Coordinator and the Graduate Board/WSE Office of Academic Affairs (for M.S.E students).
