The Young Investigators’ Day was established in 1978 to recognize student investigators who are trained at Johns Hopkins University School of Medicine and to provide them with a forum for their work. The awards are intended to recognize research undertaken by applicants while registered as students or postdoctoral fellows at the school of medicine.

The Johns Hopkins Medical and Surgical Association Awards for Postdoctoral Investigation were established in 1981 by the School of Medicine to recognize excellence in research by clinical or research fellows in the School of Medicine. These six awards are designated for clinical research, laboratory research with direct clinical relevance, and basic laboratory research. The awards are as follows:

- The A. McGehee Harvey Research Award
- The Helen B. Taussig Research Award
- The Alfred Blaock Research Award
- The W. Barry Wood, Jr. Research Award
- The Albert L. Lehninger Research Award
- The Daniel Nathans Research Award

The Michael A. Shanoff Research Award consisting of an honorarium and a certificate, is made annually to a candidate in the M.D., Ph.D., or M.D.-Ph.D. program in the Johns Hopkins University School of Medicine who, among all similarly eligible students, is considered to have made the most significant research contribution.

The award will be given in recognition of a substantial and sustained contribution to research, preferably undertaken over more than one elective quarter. Thoroughness and originality of research are to be primary considerations in the selection of awardees. Most of the research must have been undertaken during the candidates’ studies at the Johns Hopkins Medical Institutions. The award may be shared by two or more students who have collaborated on a research project. If the award committee finds no meaningful way to distinguish between the relative merit of the contribution and achievement of candidates who have worked on different research projects, then the award may be divided equally between such candidates. The awardees will be selected by a committee comprised of members of the Basic Science and Clinical faculties.

The David Israel Macht Research Award was established in 1982 through an endowment provided by the family of Dr. Macht to commemorate the centenary of his birth. Dr. Macht was a graduate of the Johns Hopkins School of Medicine, Class of 1906 and was a member of the faculty of the Departments of Pharmacology and Medicine from 1910 to the middle 1930’s. He was a versatile and pioneering investigator and had a special interest in opiate alkaloids, the absorption of drugs, and a number of other areas.

The award is intended to recognize excellence in investigation by a student in the School of Medicine, registered in M.D., Ph.D., or combined M.D.-Ph.D programs. The award will consist of an honorarium and a certificate.

The selection of the awardee will be made by a Committee composed of Basic Science and Clinical Faculty members. The award will be awarded annually to a single individual. If, in the opinion of the Committee, no meaningful distinction between the qualities of two essays can be made, the award may be divided among not more than two individuals.

The Martin and Carol Macht Research Award was established in 1993 to recognize outstanding investigation by an M.D. or Ph.D., or M.D.-Ph.D. student in the School of Medicine. Dr. Martin B. Macht received both M.D. and Ph.D. degrees from Johns Hopkins, and was a Trustee of the University for many years. Dr. Carol Macht received M.A. and Ph.D. degrees from Johns Hopkins in the History of Art and Archeology. The award was established through an endowment gift from the Macht family.

The selection of the awardee will be made by a committee composed of basic science and clinical faculty members. The award will be awarded annually to a single individual. If, in the opinion of the Committee, no meaningful distinction between the qualities of two essays can be made, the award may be divided among not more than two individuals. The award consists of an honorarium and certificate.

The Albert L. Lehninger Research Award consists of an honorarium and certificate.

The W. Barry Wood, Jr. Research Award consists of an honorarium and certificate.

The Helen B. Taussig Research Award consists of an honorarium and certificate.

The A. McGehee Harvey Research Award consists of an honorarium and certificate.

The Daniel Nathans Research Award consists of an honorarium and certificate.

The Michael A. Shanoff Research Award consists of an honorarium and certificate.

The Michael A. Shanoff Research Award consists of an honorarium and certificate.
The Physician Scientist Research Award was established in 2018 to recognize the outstanding research contributions by a Physician Scientist at Johns Hopkins School of Medicine. This award is supported by the Johns Hopkins School of Medicine Physician Scientist Training Program. The award consists of an honorarium and certificate.

The Post-baccalaureate Student Award was established in 2021 and is given to a candidate in a Post-baccalaureate program at the Johns Hopkins School of Medicine in recognition of their contributions to research.
