

# COMPLIANCE

---

## Compliance

All enrolled degree/certificate-seeking students must register for and complete a background check, drug screening, required medical compliance, as well as other requirements, regardless of program, online/on-site course attendance status, and clinical/non-clinical course status. The School of Nursing contracts with CastleBranch (<https://jhu.castlebranch.com/J078/package-selection/>) to track and approve all compliance requirements, subject to change. All enrolled degree/certificate-seeking students must provide all the required compliance documents, and must update documentation as required, in order to remain in compliance throughout the course of their program. A list of the current pre-enrollment Compliance Requirements can be found here. (<https://nursing.jhu.edu/student-experience/accepted-students/orientation-info/>)
