Global Health Certificate Program

NOTE: Certificate program may be completed entirely online!

OVERVIEW

Global health is the study of the health of populations in a global context, considering its political, social, and economic impact. The certificate program is primarily intended for junior and mid-level professionals practicing or planning to practice in developing countries and interested in expanding their global health skills and knowledge.

The certificate program can be completed entirely with online courses or with a combination of online and on-campus courses.

EDUCATIONAL OBJECTIVES

Upon completion of the Global Health Certificate, individuals will be able to:

1. Describe individual, community, and organizational behaviors and change processes in cross-cultural and developing countries settings as a foundation for planning appropriate primary health care programs;
2. Apply relevant social and behavioral theories to diagnose and understand individual, social network, organizational, community, and policy-maker behaviors associated with the planning, implementation, evaluation, and maintenance of community-based primary health care programs;
3. Describe and critically evaluate the strengths, weaknesses, and sustainability of disease control programs and policies for major causes of death and disability in developing countries and discuss program and policy implementation obstacles and approaches to overcoming them;
4. Apply cultural competence and skills to global and diverse settings related to populations such as refugees, immigrants, and migrant workers;
5. Explain how to work effectively in countries and cultures with differing social and economic perspectives; and
6. Analyze the complexities of the social, economic, medical, political, and environmental factors that affect health.

REQUIREMENTS FOR SUCCESSFUL COMPLETION

The certificate program requires a minimum of 18 term credits. All certificate coursework must be taken for a letter grade, a minimum grade of C must be earned in all certificate coursework, and a 2.75 or better overall GPA for all certificate coursework is required. The certificate program length is flexible; it varies from student to student, however, the certificate must be completed within three years.

The student should review the section of the website that addresses completion (https://www.jhsph.edu/academics/certificate-programs/JHSPH_certificate_completion.html) before completing certificate program requirements. The student’s transcripts will not indicate that the certificate was earned until the Notification of Completion has been submitted, verified by the certificate program, and processed by the Registrar.

COURSE OF STUDY

Please note: The Global Health certificate program will not approve any course substitutions or waivers. The curriculum indicated below cannot be altered in any way for individual students.

Required Courses: Students must complete the following 3 required courses

- PH.220.601 Foundations of International Health (typically offered online in 1st and 4th term)
- PH.221.688 Social and Behavioral Foundations of Primary Health Care (typically offered online in 3rd and Summer terms)
- PH.223.680 Global Disease Control Programs and Policies (typically offered online in 4th term)

Elective Courses: Students must complete at least 6 credits of elective coursework

- PH.221.606 Training Methods and Continuing Education for Health Workers (typically offered online in Summer term)
- PH.221.612 Confronting the Burden of Injuries: A Global Perspective (typically offered onsite and online in 2nd term)

Complete certificate program admissions information is available on the certificate program page (https://www.jhsph.edu/academics/certificate-programs/certificates-for-hopkins-and-non-degree-students/global-health.html) on the JHSPH website.
