

DEPARTMENT OF BIOCHEMISTRY AND MOLECULAR BIOLOGY

About

The Department of Biochemistry and Molecular Biology (<https://publichealth.jhu.edu/departments/biochemistry-and-molecular-biology/>) conducts research to discover and characterize the fundamental biological processes relevant to health and disease.

Faculty and students work together to increase knowledge of the biochemical and molecular bases of normal and abnormal cellular processes and to train highly qualified scientists who—through research, teaching, and service—continue to provide new insights into the biomedical issues that have a profound impact on public health.

Programs

- Biochemistry and Molecular Biology, MHS (<https://e-catalogue.jhu.edu/public-health/departments/biochemistry-molecular-biology/biochemistry-molecular-biology-mhs/>)
- Biochemistry and Molecular Biology, ScM (<https://e-catalogue.jhu.edu/public-health/departments/biochemistry-molecular-biology/biochemistry-molecular-biology-scm/>)
- Biochemistry and Molecular Biology, PhD (<https://e-catalogue.jhu.edu/public-health/departments/biochemistry-molecular-biology/biochemistry-molecular-biology-phd/>)
- Non-Degree Training (<https://e-catalogue.jhu.edu/public-health/departments/biochemistry-molecular-biology/non-degree-training/>)
