Doctor of Philosophy Degree Program

Doctor of Philosophy (PhD) degree program is a full-time degree program designed for students with at least two years of relevant work experience or relevant professional skills and requires at least two years of coursework, followed by an average of two years of research towards a doctoral dissertation (also referred to as a thesis on official forms and committees). The doctoral degree program targets students with specific career goals in public health research, teaching, and/or leadership.

PhD students focus on the creation of new and innovative knowledge through their research. Training is offered through a core methodologic sequence with the addition of more focused courses in specialized areas. Students are expected to tailor their curricula, working with their advisers to create a comprehensive plan of study and research. PhD theses must be based on original research, worthy of publication, and approved by the Department and a committee of thesis (dissertation) readers. PhD students must also be engaged in primary data collection as a component of their dissertation research or embedded in other research during their training here.

The PhD program requires that students:

- Complete at least 64 credits of coursework with a cumulative 3.0 GPA (B or higher average);
- Successfully pass the Department comprehensive examination;
- Complete the teaching assistantship (TA) curriculum, including serving as a TA in 3 departmental courses;
- Present a doctoral proposal seminar in the Department;
- Pass the Departmental Oral Examination;
- Pass the School-wide Preliminary Oral Examination;
- Fulfill the primary data collection requirement;
- Develop and conduct independent research culminating in a doctoral dissertation in an approved format;
- Present their dissertation research in a final seminar (open to the public);
- Successfully defend their dissertation during the Final Oral Examination.

Students work closely with their advisers and Thesis Advisory Committee to develop their research questions and design their projects to address those questions and to conduct the dissertation research.

Program Requirements

Course location and modality is found on the JHSPH website (https://www.jhsph.edu/courses/).

Doctoral students in the Department of Epidemiology are expected to train to be public health leaders and educators. By following an apprenticeship model, students take courses, learn to teach methods and concepts to a wide audience, conduct a rigorous examination of the existing science, and discover and contribute new knowledge to the field. Thus we require students to complete a residency, participate fully in journal clubs, research-in-progress meetings, programmatic activities, and scientific poster sessions and conferences. Doctoral students serve as teaching assistants, conduct research, and prepare a dissertation of the caliber expected of graduates of the Johns Hopkins University.

Residency

A minimum of 64 credits is required to complete a doctoral degree. The residency requirement (completed by maintaining full-time registration of four consecutive terms of at least 16 credits each) must be completed during the first year of the program. To broaden perspective and to enhance the student’s capabilities for work in public health or disease-related fields, at least 18 credits of coursework are required in courses from at least two other departments outside the student’s primary department. At least nine of these credits must be taken at JHSPH. Students who have completed a master’s degree at Johns Hopkins Bloomberg School of Public Health, and are continuing into the doctoral program, must complete 18 new credits outside of Epidemiology, in at least two different departments of the school and complete 18 credits within the Department of Epidemiology, to establish the grade point average. Of note: University and Schoolwide requirements do not count toward the 18 credits outside of the department.

Track Specific Activities

Each Track holds journal clubs, research-in-progress meetings, and other activities, which Track students are expected to attend. These activities are opportunities to engage and interact with Track faculty, fellow students, and post-doctoral fellows, and to participate and present in the topic area of the Track. All doctoral students are expected to participate in their Track. If a student for some reason wishes to switch tracks during the course of their degree, they must schedule a meeting with the Senior Academic Program Manager, Frances Burman (FranBurman@jhu.edu) to ascertain whether a switch is feasible to still meet graduation requirements in time and to complete a formal form.

Quarterly Doctoral Meetings

Doctoral students and the Doctoral Program Directors meet quarterly. The agenda is developed by the Epidemiology Student Organization (ESO) doctoral student representatives in consultation with the program co-directors. These meetings provide a forum to learn about academic policies and deadlines, and for students to raise questions and concerns, and for all to hear the answers. All doctoral students are expected to attend these meetings.

Doctoral Teaching Assistant (TA) Curriculum

PURPOSE OF THE DOCTORAL TA CURRICULUM

Learning how to be an effective teacher and communicator about epidemiologic principles and methods is an integral part of doctoral education in epidemiology. Teaching is an opportunity for students to meet several Departmental doctoral program core competencies, enabling students to:

- Interpret and critique epidemiological studies;
- Interpret epidemiologic data and make valid inferences from study findings;
- Communicate effectively in oral and written formats with students, professionals, and the public on issues related to epidemiology and public health; and
- Provide epidemiologic critique and advice through advising students and professionals on epidemiologic concepts and methods and conducting peer review activities.

Practicing these skills also prepare students for Department and Preliminary Oral Examinations and for their future careers, whether
School-wide Coursework

Academic & Research Ethics (and Avoiding Plagiarism)

Course Requirement

All doctoral students must enroll in PH.550.860 Academic & Research Ethics at JHSPH during the first term of doctoral enrollment at the School. The Avoiding Plagiarism at JHU training developed by JHU's Sheridan Libraries course material is contained within the PH.550.860 Academic & Research Ethics at JHSPH course. This online course, administered through CoursePlus. All students are required to complete this online course by the end of their first term enrolled. In the course, students are asked to upload two certificates to a CoursePlus DropBox showing completion of both parts of this course:

- Certificate from JHU for the Avoiding Plagiarism module
- Certificate from SPH for completion of the Responsible Conduct of Research module

Students must also send a copy of the certificates to the Senior Academic Program Manager, Frances Burman (FranBurman@jhu.edu) with their name and "Academic & Research Ethics Requirement" in the subject line of the e-mail.

Responsible Conduct of Research Course Requirement

All doctoral students must fulfill the Responsible Conduct of Research requirement. Please note, while there is a Responsible Conduct of Research module within the PH.550.860 Academic & Research Ethics at JHSPH, this is a separate requirement and is not fulfilled by that module contained within PH.550.860 Academic & Research Ethics at JHSPH.

Additionally, doctoral students who are supported by a National Institutes of Health (NIH) training grant, career development award (individual or institutional), research education grant, or dissertation research grant (including D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K39/R00, K11, K12, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TL2, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TL2, and U2R) must repeat this in-person requirement every four years.

This requirement can be met by completing either of the following two courses:

- PH.550.600 Living Science Ethics - Responsible Conduct of Research (1st term)
- PH.306.665 Research Ethics and integrity: U.S. and International Issues (3rd term)

CEPH Cells to Society Courses

The Council on Education in Public Health designates core knowledge for all public health professionals. The list of courses and term offerings is located online (https://www.jhsph.edu/course-directory/cells-to-society-courses.html). Epidemiology degree students are required to complete 8 of the 12 sessions as listed below. Each course is 0.5 credits and is offered only online. Many of these courses can be used as introductions to full-term courses offered in multiple modalities throughout the year.
PH.340.752 Epidemiologic Methods 2 5
PH.340.860 Current Topics in Epidemiologic Research 1
PH.550.865 Public Health Perspectives on Research 1
PH.340.853 First Year Epidemiology Doctoral Seminar 1
Select out-of-track, recommended, or elective courses to total 16 credits per term 3

Credits 16

Third Term
PH.140.623 Statistical Methods in Public Health III 4
or PH.140.653 Methods in Biostatistics III 5
PH.340.753 Epidemiologic Methods 3 5
PH.340.853 First Year Epidemiology Doctoral Seminar 1
Select out-of-track, recommended, or elective courses to total 16 credits per term 5

Credits 16

Fourth Term
PH.140.624 Statistical Methods in Public Health IV 4
or PH.140.654 Methods in Biostatistics IV 5
PH.340.820 Thesis Research Epidemiology (varies) 1 - 3
PH.340.860 Current Topics in Epidemiologic Research 1
Select out-of-track, recommended, or elective courses to total 16 credits per term 10

Credits 16

Department Comprehensive Examination
Pass Parts A&B - immediately following Fourth Term

Credits 16-18

Second Year
First Term
PH.340.820 Thesis Research Epidemiology (with thesis adviser, credits variable) 1 - 5
PH.340.863 Doctoral Seminars in Epidemiology 3
PH.340.865 Teaching Epidemiologic Methods and Concepts At the Graduate Level (Select this course to coincide with TA positions fulfilling requirement) 1 - 3
Select recommended and elective courses to total 16 credits per term 11

Credits 16-22

Second Term
PH.340.820 Thesis Research Epidemiology (with thesis adviser, credits variable) 1 - 5
PH.340.863 Doctoral Seminars in Epidemiology 3
PH.340.865 Teaching Epidemiologic Methods and Concepts At the Graduate Level (Select this course to coincide with TA positions fulfilling requirement) 1 - 3
Select recommended and elective courses to total 16 credits per term 11

Credits 16-22

Third Term
PH.340.820 Thesis Research Epidemiology (with thesis adviser, credits variable) 1 - 5
PH.340.863 Doctoral Seminars in Epidemiology 3

Credits 16-22

PH.340.865 Teaching Epidemiologic Methods and Concepts At the Graduate Level (Select this course to coincide with TA positions fulfilling requirement) 1 - 3
Select recommended and elective courses to total 16 credits per term 11

Credits 16-22

Fourth Term
PH.340.820 Thesis Research Epidemiology (with thesis adviser, credits variable) 1 - 5
PH.340.865 Teaching Epidemiologic Methods and Concepts At the Graduate Level (Select this course to coincide with TA positions fulfilling requirement) 1 - 3
Select recommended and elective courses to total 16 credits per term 9

Credits 16-22

Total Credits 128-154

1 May be waived if student holds MPH from a CEPH accredited program in past 10 yrs

Courses approved for the "OUTSIDE OF TRACK" requirement
All students must complete one introductory topical epidemiology course outside of the chosen track. Courses approved by the Curriculum Committee to meet this requirement are listed below:

Track Course Requirements

In addition to the Department-wide Core Requirements, each track requires additional coursework specific to their fields to prepare students to conduct research and serve as leaders. Please see the track-specific requirements and recommended courses listed below. Additionally, the first-year course content is covered on the annual Comprehensive Exams. All students may take courses in any of the tracks listed and are encouraged to do so.

Course Required for Doctoral Students in Epidemiology of Aging

First Year

Term 1

PH.340.616 Epidemiology of Aging

Recommended Courses for Doctoral Students in Epidemiology of Aging

[Terms and offerings change each year. Always check the course directory for the most up-to-date offerings]

First Year

each term PH.330.802 Seminar on Aging, Cognition and Neurodegenerative Disorders 1

Term 1

PH.140.641 Survival Analysis 3

PH.380.604 Life Course Perspectives on Health 4

Term 2

PH.340.620 Principles of Clinical Epidemiology 2

PH.340.666 Foundations of Social Epidemiology 3

PH.380.603 Demographic Methods for Public Health 4

Term 3

PH.340.699 Epidemiology of Sensory Loss in Aging 3

PH.260.665 Biological Basis of Aging++ 3

General Epidemiology and Methodology

Courses Required for Doctoral Students in General Epidemiology and Methodology

First Year

Term 1

PH.340.731 Principles of Genetic Epidemiology 1 4 (recommended for year 1 but may be taken in year 2, satisfies the out-of-track requirement as well)

Term 2

PH.340.645 Introduction to Clinical Trials 3 (recommended for year 1 but may be taken in year 2)

Second Year Courses:

Term 1

PH.340.728 Advanced Methods for Design and Analysis of Cohort Studies 5

Term 2

PH.340.774 Advanced Theory and Methods in Epidemiology 4

Term 3
PH.140.664 Causal Inference in Medicine and Public Health I 4
PH.140.655 Analysis of Longitudinal Data 4
PH.340.606 Methods for Conducting Systematic Reviews and Meta-Analyses 4

**Recommended statistical programming computing courses:**
Term 1
PH.140.776 Statistical Computing 3

Term 4
PH.140.632 Introduction to the SAS Statistical Package 3
PH.340.600 Stata Programming 2

**Doctoral Students with a Pharmacoepidemiology and Drug Safety Focus:**

**Strongly Recommended courses for Doctoral Students with a Pharmacoepidemiology Focus:**
Term 1
PH.317.600 Introduction to the Risk Sciences and Public Policy 4
PH.390.631 Principles of Drug Development 2

Term 2
PH.317.610 Risk Policy, Management and Communication 3

Term 3
PH.140.664 Causal Inference in Medicine and Public Health I 4
PH.340.684 Pharmacoepidemiology: Drug Utilization 3 (alternate year format)
PH.221.610 Pharmaceuticals Management for Under-Served Populations 3

Term 4
PH.410.680 Social Ecological Approaches to Health Regimen Adherence in Chronic Conditions 3

**Recommended courses for Doctoral Students with a Pharmacoepidemiology Focus:**
Term 1
PH.317.605 Methods in Quantitative Risk Assessment 4

Term 4
PH.317.615 Topics in Risk Assessment 2

*the following courses are offered outside of JHSPH and require interdivisional registration and instructor permission*
AS.410.651 Clinical Development of Drugs and Biologics 4
AS.410.627 Translational Biotechnology: From Intellectual Property to Licensing 4
ME.330.809 Analytic Methods for Clinical Pharmacology variable
NR.110.508 Clinical Pharmacology 3

**Individualized Focus:**
Students designing their own educational programs should, in conjunction with their advisor, choose three to four graduate-level courses (taken for a letter grade) in their field from among the offerings of the University in addition to taking the GEM Required courses listed above.

**Genetic Epidemiology**

**Courses Required for Doctoral Students in Genetic Epidemiology**

**First Year**

**Term 1**
PH.340.731 Principles of Genetic Epidemiology 1 4

**Term 2**
PH.340.732 Principles of Genetic Epidemiology 2 3

**Term 3**
PH.340.733 Principles of Genetic Epidemiology 3 3

**Term 4**
PH.340.734 Principles of Genetic Epidemiology 4: Emerging and Advanced Methods 2

**Second Year**

**Term 1**
PH.120.602 Concepts of Molecular Biology (Pass/Fail, or Grade) 4

**Recommended Courses for Doctoral Students in Genetic Epidemiology**
[Terms and offerings change each year. Always check the course directory for the most up-to-date offerings]

**Analytic Methods Courses (ideal for year 2)**
**Term 1**
PH.140.641 Survival Analysis 3
PH.140.651 Methods in Biostatistics I* 4
PH.140.776 Statistical Computing 3

**Term 2**
PH.140.638 Analysis of Biological Sequences 3
PH.140.652 Methods in Biostatistics II 4
PH.140.778 Advanced Statistical Computing 3
PH.340.774 Advanced Theory and Methods in Epidemiology* 4

**Term 3**
PH.140.644 Statistical Machine Learning: Methods, Theory, and Applications 4
PH.140.653 Methods in Biostatistics III 4
PH.140.655 Analysis of Longitudinal Data 4

**Term 4**
PH.140.688 Statistics For Genomics 3

**Biology and Molecular Methods Courses**
**Term 1**
PH.260.611 Principles of Immunology I 4

**Term 2**
PH.260.612 Principles of Immunology II 4
PH.183.631 Fundamentals of Human Physiology 4 (*For non-physician trained students only)

Department Comprehensive Examination

A two-day written Department comprehensive examination is administered to all students enrolled in Department degree programs in late May of the first academic year. All students are required to sit for the exam on the scheduled dates—no alternate exams will be offered.

By the time of the examination, students should have completed 64 credits (one full year of residence);
The first day of the exam (Part A) includes testing on the following topics:

- Knowledge and application of epidemiologic concepts and methods (and related biostatistics)
- History of epidemiology
- Contemporary issues in public health
- Research ethics

The second day of the exam (Part B) is Track-specific, and tests knowledge of concepts and methods presented in the required courses and activities for each Track, as well as the Department core courses as applied to the Track.

Students must pass both Part A and Part B of the comprehensive examination. Doctoral students must attain at least a 75% on each Part A and Part B to pass. A repeat examination may be allowed but is not guaranteed. If a repeat is granted, it must be completed before starting the second academic year.

Failure to pass one or both sections of the comps may result in dismissal from the doctoral program or from the Department.

Dissertation Steps

Timing of Activities / Milestones

1. Year one and two: Complete academic preparation for dissertation through coursework, special studies and research with the adviser, and attend seminars, journal clubs, and research-in-progress activities of interest.

2. Year two: Students develop their specific aims, add a co-adviser, and produce a working draft of their dissertation research proposal prior to or during the fourth term of the second year. Students in combination with their advisers select a third member for the

Thesis Advisory Committee and present their proposed research at a public seminar to the department during the fourth term of year two or the first term of year three. Students also begin to fulfill their Teaching Requirements during year two and begin assuming leadership roles within the department or school.

3. Year three: Students hold their departmental and preliminary oral exams and begin research. Many students continue their teaching requirements and begin submitting papers for publication in conjunction with their advisers or other faculty mentors. Students need a minimum of two weeks between the doctoral proposal seminar and the departmental oral exam and a minimum of four weeks between the departmental oral exam and the preliminary (school-wide) exam. Students may schedule all three activities simultaneously or wait to pass one before scheduling the next. Students may elect to take up to six months to prepare for each exam. Students must successfully pass their Preliminary Oral Exam within three academic years of enrollment in the doctoral degree program.

4. Year four: Students conclude data collection and analysis, complete their dissertation, and hold the defense of their research. This timeframe varies from student to student depending on a wide variety of factors.

5. Additional time is granted to complete the PhD (up to seven years or 28 terms of registration); however, the financial support granted PhD students by the Department of Epidemiology will not extend through additional years.

Thesis Advisory Committee

The role of the Thesis Advisory Committee is to provide continuity in the evaluation of the progress and development of the doctoral student. The Thesis Advisory Committee is assembled by the doctoral student and their adviser(s). For doctoral students, the Thesis Advisory Committee consists of the dissertation (thesis) adviser and at least two additional faculty members who hold either primary or joint appointments in Epidemiology. If the student has a co-adviser, the co-Adviser should serve on the Thesis Advisory Committee. Additional faculty within and outside of the School may also be recruited. Committee membership is permitted to change during the research period. The Thesis Advisory Committee is not the same as the Preliminary or Final Oral Examination Committees. The Thesis Advisory Committee decides when the student is ready to proceed through each of the milestones needed to complete the degree requirements, including the Doctoral Proposal Seminar, the Departmental and School-wide Preliminary Oral Examinations, and the Final Oral Examination ("defense"). Bi-annual formal meetings of the Thesis Advisory Committee are required, but meetings may and should occur more frequently. It is the student's responsibility to schedule meetings.

Tips for doctoral students for successful formal meetings of the Thesis Advisory Committee:

- Prior to each meeting, draft an agenda with advisor input and distribute a one-page description of progress, including any key results
- After each meeting, send a written report of the items discussed and decisions reached to the members for approval
- Maintain a log of the meetings to aid in writing the annual progress report and financial support documentation

Once the Thesis Advisory Committee is formed, submit the “Thesis Committee Approval Form” (on the Epi Intranet (https://my.jhsph.edu/sites/EPI/default.aspx)) to Ebony Moore (eamoore@jhu.edu) in W6508-C.

Dissertation Research Proposal

The 12-page single-spaced dissertation research proposal is developed during the second year, during terms 1 – 3 of PH.340.863 Doctoral Seminars in Epidemiology, and is the final project for the course PH.340.715 Problems in the Design of Epidemiologic Studies: Proposal Development and Critique. The dissertation proposal must be reviewed
and approved by the Thesis Advisory Committee prior to scheduling the Doctoral Proposal Seminar.

**Doctoral Research Proposal Seminar**

After the Thesis Advisory Committee has approved the student's 12-page dissertation research proposal, the student must orally present the proposal in a Doctoral Proposal Seminar to the Department. Students should present a prepared presentation (typically PowerPoint) of approximately 40-45 minutes in length, followed by approximately 15-20 minutes of questions and discussion. The Proposal Seminar is presented during the Department-wide Epidemiology Seminars (Current Topics in Epidemiologic Research) on Fridays during terms 1-4, from 12:15-1:20 pm, in Sheldon Hall W1214. Seminars are not permitted during the Summer. The dissertation (thesis) advisor must attend, and the Thesis Advisory Committee members and the Track Director are strongly encouraged to attend. Doctoral Proposal Seminars are advertised to the Department at large, and students and their advisor(s) should personally invite any other colleagues they would like to attend. The best ways to prepare for this seminar include attending Doctoral Research Proposal Seminars presented by peers and by presenting in a track research-in-progress meeting. Students should plan to conduct a 'dress rehearsal,' prior to the actual proposal, in the same room reserved for the defense, familiarizing with the surroundings, and testing all technology they will use in the Doctoral Research Proposal Seminar.

After the Thesis Advisory Committee has approved the student to present their Doctoral Proposal Seminar, the student should work with the adviser and Thesis Advisory Committee to select a seminar date. Once the Advisory Committee and adviser(s) have confirmed readiness, the student can proceed with reserving a date and room. To schedule a date, students should contact Laura Camarata, lcmamarata@jhu.edu, to discuss open dates and submit the “Doctoral Proposal Seminar Form” (on the Epi Intranet (https://my.jhsph.edu/sites/EPI/default.aspx)), which includes preferences for seminar dates (1st, 2nd, and 3rd choices). This form requires the signature of the adviser and the Track Director.

Tips to keep in mind:

- Students cannot schedule their doctoral proposal seminars without the approval of their adviser(s) and Advisory Committee.
- Doctoral students are required to propose during the academic year (Terms 1-4), in Department-wide Friday Epidemiology Seminars, and this seminar series additionally hosts annual events and outside speakers.
- Work with adviser(s) and Committee to have a timeline, and give as much lead time as possible (but no less than 3 months) to schedule.
- Seminars start at 12:15 pm, with an introduction by the student's adviser, that the student should arrange.
- Students should test their presentations prior, report early on the day of, and have their presentations saved in more than one place for back-up.
- Sheldon Hall is equipped with a dedicated laptop, projector, laser pointer, and microphone/audio system.

**Departmental Oral Examination**

**Purpose**

After the Thesis Advisory Committee has approved the Dissertation Research Proposal and the student has presented the Doctoral Proposal Seminar, the next step is sitting for the Departmental Oral Examination. The primary purpose of the Departmental Oral Examination is to prepare the student for the Preliminary Oral Examination. As such, the Departmental Oral Examination shares the purpose of the Preliminary Oral Examination:

To determine whether the student has both the ability and knowledge to undertake significant research in the general area of interest, including:

1. the student's capacity for logical thinking;
2. their breadth of knowledge in relevant areas; and
3. their ability to develop and conduct research leading to a completed dissertation (thesis).

Discussion of a specific research proposal, if available, may serve as a vehicle for determining the student's general knowledge and research capacity. However, this examination is not intended to be a defense of a specific research proposal.

**Meeting with the Senior Academic Program Manager**

In preparation for scheduling the Department Oral Examination, students should meet with the Senior Academic Program Manager, Frances Burman (FranBurman@jhu.edu), to confirm that the student has met all Track, Department, and Schoolwide course requirements and has assembled a valid set of proposed committee members for the Department and Preliminary Oral Examinations.

**Department Oral Examination Committee Membership**

For PhD and ScD students, the Department Oral Examination Committee should consist of: the adviser (primary); and two other members and one alternate member, all of whom have primary appointments in the Department of Epidemiology. Thesis committee members, including co-advisers, are not permitted to serve on the Departmental Oral Examination committee with the exception of the student's adviser, who must participate. All Professorial and Scientist Track faculty may serve on the Committee. Students are not required to meet with members of the Committee prior to the examination and should not expect that committee members will discuss what questions they will be asked.

While the above describes the necessary committee, in any case where the student or advising team wants to have an additional faculty member present, the examiners and student must decide in advance whether the extra faculty member may ask questions and if yes, whether the student's responses will count. In any case, the extra person may not vote but may contribute feedback to the student. Students considering this should first check in with the academic office.

**DEPARTMENT ORAL EXAMINATION FORM**

The "Department Oral Examination Form" (on the Epi Intranet (https://my.jhsph.edu/sites/EPI/default.aspx)), is due to the Senior Academic Program Coordinator, Ebony Moore (eamoore@jhu.edu), at least 14 days prior to the date of the proposed exam. With the approval of the Dissertation (thesis) Adviser, the form should be submitted after presenting the Doctoral Proposal Seminar and incorporating any key input from the Seminar into the Dissertation Research Proposal.

**SCHEDULING**

The Senior Academic Coordinator, Ebony Moore (eamoore@jhu.edu), will schedule the room and send a memo to examiners prior to the examination date.

**CONDUCT OF THE EXAMINATION**

Prior to the exam, students submit to the Department Oral Examination Committee members a single-page summary of the dissertation proposal, including the specific aims, hypotheses, and methods. Committee members may request the longer 12-page Dissertation Research Proposal. The examination should be scheduled for and completed in
one and a half hours but may be concluded earlier or later as determined by the Committee. At the start of the exam, students will present a brief talk of no more than 10 minutes that concisely summarizes the aims, hypothesis, methods, limitations, and significance of their proposed dissertation research. This presentation may be a distillation of the Doctoral Proposal Seminar.

**Department Oral Examination Outcome**
The possible outcomes of the oral examination are Unconditional Pass, Conditional Pass, or Failure (retake). Conditional Pass requires the student and Department Oral Examination Committee to agree on a remedial course of action designed to be completed within two weeks of the examination. Students who fail will be required to re-take the Department Oral Examination within six months. Two failures of the Departmental Oral Examination will result in dismissal from the degree program. For more information about the Departmental Oral Examination, please review the Department of Epidemiology Student Guidelines for the Departmental Oral Examination” (on the Epi Intranet [https://my.jhsph.edu/sites/EPH/default.aspx]).

**Preliminary Oral Examination (aka School-wide Exam)**
This is also colloquially known as the “Schoolwide Oral Examination.” Students and their adviser(s) are responsible for initiating arrangements for the preliminary doctoral examination. The University Graduate Board oversees these exams.

**Purpose**
After the student has passed the Departmental Oral Examination, the next step is the Preliminary Oral Examination. The purpose of the Preliminary Oral Examination is to determine whether the student has both the ability and knowledge to undertake significant research in their general area of interest, including:

1. the student’s capacity for logical thinking;
2. their breadth of knowledge in relevant areas; and
3. their ability to develop and conduct research leading to a completed dissertation.

Discussion of a specific research proposal, if available, may serve as a vehicle for determining the student’s general knowledge and research capacity. However, this examination is not intended to be a defense of a specific research proposal. The preliminary oral examination is two hours in duration.

**Preliminary Oral Examination Committee Membership**
- Must consist of five voting members
  - Two members must be from the epidemiology department; one of these is the adviser
  - A third member from the epidemiology department is optional
    - Limit of 3 members from sponsoring department
  - Thesis Advisory Committee members may serve on the Committee
  - The student’s adviser of record must serve as a member of the Committee.
    - The adviser must be among the members present; an alternate may not serve in place of the adviser.
  - The senior faculty member without a primary appointment in Epidemiology will serve as Chair of the Committee and must hold the rank of Associate or Full Professor.
  - All faculty members serving on the Committee must represent the department of their primary faculty appointment.
    - The only instance when the faculty member can serve in their joint appointment capacity is if they are the student’s adviser.

- Most often, the committee is comprised of duly appointed faculty members of a University department and must hold, at the time of selection, a faculty appointment at the rank of Assistant Professor or higher.
  - Occasionally, one adjunct or one scientist faculty member, but not both, may serve on the Committee; neither may serve as the Chair.
  - All members of the Committee must be present at the scheduled exam location; teleconference permitted on a case-by-case basis.
  - The committee must be comprised of three Departments of the University, two being from the Bloomberg School of Public Health.
  - The committee must have appropriate alternate members to serve on the committee.
    - The selection of alternates is very important for ensuring the exam can take place at the originally scheduled date/time. If a student has two members on their committee from epidemiology, the student should have one alternate from epidemiology and one from a non-sponsoring department.
    - If a student has three members on their committee from epidemiology, then two alternates should be selected from two different non-sponsoring departments.
  - At least two weeks prior to the exam, students submit to the Preliminary Oral Examination Committee members a single-page summary of the dissertation proposal, including the specific aims, hypotheses, and methods. Committee members may request the longer 12-page Dissertation Research Proposal.

**Preliminary Oral Examination Form**
- PhD or ScD form ([https://my.jhsph.edu/Offices/StudentAffairs/RecordsRegistration/DoctoralCandidateInfo/Documents/Forms/By%20Degree.aspx](https://my.jhsph.edu/Offices/StudentAffairs/RecordsRegistration/DoctoralCandidateInfo/Documents/Forms/By%20Degree.aspx))
- Students may not submit this form to the Registrar’s Office until after they have successfully passed the Departmental Oral Examination.
- The Registration Coordinator will not accept the form unless it is submitted to the Registrar’s Office a minimum of 30 days prior to the proposed examination date. There are no exceptions.
- This form requires signatures from the Senior Academic Program Manager, Frances Burman, the adviser, and the Department Chair or a Deputy Chair. The student is responsible for obtaining the required signatures in that order. The form should therefore be submitted to Frances Burman (Frances.Burman@jhu.edu) at least 3-4 days prior to the date of submission to the Registrar’s Office.

**Scheduling**
The student is responsible for scheduling the room ([https://my.jhsph.edu/Offices/InformationTechnology/forms/SETForm.aspx](https://my.jhsph.edu/Offices/InformationTechnology/forms/SETForm.aspx)) for the exam, requesting Multimedia support ([https://my.jhsph.edu/Offices/InformationTechnology/forms/Multimedia%20and%20Production%20Request%20Form.aspx](https://my.jhsph.edu/Offices/InformationTechnology/forms/Multimedia%20and%20Production%20Request%20Form.aspx)) if needed, and sending a memo to examiners confirming the date, time, and location of the exam prior to the exam date.

**Examination Outcome**
The outcome of the examination is Unconditional Pass, Conditional Pass, or Failure. Should the student receive a conditional pass, the Committee remains standing until the conditions, specified in writing, have been met.

The consequence of a failure is decided by the Committee:

1. no re-examination;
2. re-examination by the same committee;
3. re-examination in written form and conducted by the same committee; or
4. re-examination by a new committee.

**Primary Data Collection Requirement**

Primary data collection is defined as

1. instrument design;
2. data collection; or
3. data management, quality assurance, and quality control.

Primary data collection is required for all PhD students. This requirement may be met through dissertation research or is satisfied through work on projects distinct from the dissertation. It may be obtained through work with a single epidemiologic study or it can be a compilation of several experiences that together fulfill the requirement. Primary data collection may be obtained as part of paid work. Students must document their plan for obtaining experience with primary data collection and submit this plan to their Thesis Advisory Committee with their 12-page dissertation proposal.

The Thesis Advisory Committee may approve primary data collection that occurred prior to matriculation to the doctoral program, but this approval is not guaranteed. Any questions regarding primary data collection will be directed from the Thesis Advisory Committee to a Deputy Chair. Students are expected to demonstrate an understanding of primary data collection processes in the epidemiologic study (or studies) utilized for their dissertation. This includes knowledge of the forms, instruments, and measurement processes relevant to their research; knowledge of quality control/assurance procedures of the study (or studies); and an evaluation of the potential threats to validity in the processes extending from primary measurement to the analytic dataset. If primary data collection is not a direct component of the dissertation research, doctoral students should include their primary data collection experience as an appendix to the dissertation.

**Doctoral Dissertation**

Doctoral students must complete an original investigation presented in the form of a dissertation. The dissertation should be based on original research involving the generation of new knowledge by the student, worthy of publication, and acceptable to the Department of Epidemiology and to the Final Oral Examination Committee (Thesis Readers). Doctoral students have two options for the format of their dissertation, the traditional format, and the manuscript format. The Department recommends the manuscript format to accelerate the time to submission of manuscripts for publication in peer-reviewed journals.

**Manuscript Format**

The manuscript format must meet the following criteria:

1. The dissertation includes at least three manuscripts, linked by a common theme;
2. The doctoral student must be the first author on each of the manuscripts;
3. A manuscript will not be accepted as part of the dissertation if it was submitted before the student’s dissertation topic was approved by the Thesis Advisory Committee;
4. The manuscripts must be acceptable for publication based on usual substantive area peer review expectations; and
5. The dissertation should be organized as follows:

   a. The body of the dissertation should include a series of papers that are linked by a common theme (i.e., the student’s dissertation topic)
   b. The first chapter may be a comprehensive critical literature review suitable for publication. It should introduce the scientific hypothesis for the dissertation
   c. Chapters two and three (or more) are the manuscripts, possibly with a transitional short chapter between each relating one to the other
   d. A final chapter should integrate and discuss the findings reported in the manuscripts. It should include a discussion of the conclusions drawn from research, a synthesis of the findings, and should make recommendations for further studies
   e. The dissertation may include an appendix outlining the details of study methods and any accompanying data tables deemed necessary to fully understand the data

**Traditional Format**

The traditional format includes:

1. An introductory chapter, outlining the theme, hypotheses and/or goals of the dissertation coupled with a review of the literature;
2. Research chapters that are coherently structured for the research aims, each providing a reader enough detail to apply similar methods in another study; and
3. A concluding chapter with overall analysis and integration of the research and conclusions of the dissertation in light of current research in the field

Regardless of the format, it is expected that the student will work with their adviser and any co-advisers to develop drafts of their dissertation chapters and receive constructive substantive and editorial feedback. Together, they will decide when drafts are ready for wider distribution to other members of the Thesis Advisory Committee and, if necessary, to other project collaborators. Follow the School’s guidelines (https://www.library.jhu.edu/library-services/electronic-theses-dissertations/) for the preparation of the dissertation. The dissertation is a requirement for partial fulfillment of the PhD degree. Students may consult the School’s Policy and Procedures Memoranda (PPM) for the PhD program.

**Final Defense Seminar**

As a culminating experience for the doctoral student, the student will present a formal, public seminar. This requirement provides experience for the student in preparing a formal seminar; provides the faculty and Department with an opportunity to share in the student’s accomplishments; and gives the student a sense of finality to the doctoral experience. Students typically present a formal public seminar in conjunction with the Final Oral Examination. If possible, students are encouraged to give their Final Defense Seminars during the Department-wide Friday Epidemiology Seminars series (Current Topics; please contact Laura Camarata (lcamarata@jhu.edu) or Frances Burman (FranBurman@jhu.edu) regarding scheduling), but the seminar may be alternately scheduled during normal working hours.

The student is responsible for scheduling the room (https://my.jhsph.edu/Offices/InformationTechnology/forms/SETForm.aspx) for the defense, and requesting Multimedia support (https://my.jhsph.edu/Offices/InformationTechnology/forms/Multimedia%20and%20Production%20Request%20Form.aspx) if needed (unless they will be presenting as part of the Department-wide Friday Epidemiology Seminars series
Appointment of Thesis readers / final defense examination request form

Examination Purpose
The purpose of the Final Oral Examination is to ensure that the Candidate is able to present and defend the dissertation and its underlying assumptions, methodology, results, and conclusions in a manner consistent with the doctoral degree being sought.

The final oral examination is three hours total (one for seminar/presentation and two for exam by committee)

Committee Membership (Dissertation (Thesis) Readers) and Appointment of Thesis readers / final defense examination request form

- Must consist of four voting members:
  - Two members must have a primary faculty appointment in Epidemiology
  - The other two members must have appointments in two different departments other than Epidemiology
  - The student's adviser of record must serve as a Thesis Reader and a member of the Final Oral Examination Committee
  - Alternates are not permitted to serve in place of the adviser
  - If the adviser is unable to attend the Final Oral Examination, co-advisors may serve in this role
  - All faculty members must serve on the Committee representing the department of their primary faculty appointment
  - The only instance when the faculty member can serve in his/her joint appointment capacity is if they are the student's adviser
  - The senior faculty member without a primary appointment in the Epidemiology will serve as Chair of the Committee and must hold the rank of Associate or Full Professor
  - Co-advisors may not serve as Chair
  - The committee is comprised of duly appointed faculty members of a University department and must hold, at the time of selection, a JHU faculty appointment at the rank of Assistant Professor or higher
  - Either one scientist track or one adjunct faculty member may serve on the Exam Committee, but not both
  - The Committee of Thesis Readers may be increased to five members, provided that all other committee composition requirements are satisfied.
    - The fifth member may serve on the Final Oral Examination Committee but that individual does not have voting privileges.
  - All members of the Committee must be present at the scheduled exam location; teleconference/remote participation may be permitted on a case-by-case basis.
  - Must be comprised of three Departments of the University, two being from the Bloomberg School of Public Health
    - It is permissible to have three different JHSPH departments represented on the committee
  - Must have appropriate alternate members to serve on the committee
    - The selection of alternates is very important for ensuring the exam can take place at the originally scheduled date/time
    - Choose alternates that will fulfill the committee composition requirements, regardless of who is able to attend
    - One alternate should be from epidemiology; the other from a non-sponsoring department
  - The final oral examination is three hours total (one for seminar/presentation and two for exam by committee)

- The Registration Coordinator will not accept the form unless it is submitted to the Registrar's Office a minimum of 30 days prior to the proposed examination date. There are no exceptions.
- This form requires signatures from the Senior Academic Program Manager, Frances Burman, the adviser, and the Department Chair or a Deputy Chair. The student is responsible for obtaining the required signatures in that order. The form should therefore be submitted to Frances Burman (FranBurman@jhu.edu) at least 3-4 days prior to the date of submission to the Registrar's Office.

The student is responsible for scheduling the rooms for the Final Oral Examination. While the Defense Seminar is held in an auditorium or large classroom, the Final Oral Examination usually is held in a smaller classroom or conference room. The Department recommends scheduling the examination in E6130 or W6015. Please note that E6130 and W6015 are Department-controlled rooms and can be booked by contacting Nancy Leonard (Nancy.Leonard@jhu.edu). Alternate conference or seminar rooms may be requested through the Schoolwide room scheduling requests system (https://my.jhsph.edu/Offices/InformationTechnology/forms/SETForm.aspx).

Distribution of Dissertation to Dissertation (Thesis) Readers
Committee members are encouraged and expected to communicate to the student specific recommendations for changes in the dissertation prior to the Final Oral Examination. The student is, therefore, expected to distribute the dissertation to the Committee at least four weeks before the date of the Final Oral Examination. The Dissertation Approval Form signed by the student’s adviser should accompany the dissertation at the time it is distributed to the committee members.

Conduct of the Examination
If one of the officially appointed Committee members fails to appear on the Final Oral Examination date/time, the previously approved alternate will serve as an examiner. A Final Oral Examination may not be held with fewer than four officially approved faculty members present in the room. The adviser must be among the members present; an alternate may not serve in the place of the adviser. Only approved Committee members are permitted to participate as examiners. During the Final Oral Examination, the Committee will evaluate:

1. the originality and publication potential of the research;
2. the candidate's understanding of the details of the methodologic and analytic work; and
3. the final quality of the written dissertation document.

The examination committee chair along with the examiners will determine the details of how the Final Oral Examination is conducted.

Examination Outcome
The possible outcome of the Final Oral Examination based on the student's performance and written dissertation is determined by closed ballot as Acceptable, Conditionally Acceptable, or Unacceptable. If one or more members require substantive changes to the dissertation (Conditionally Acceptable), the specific nature of these changes and the time expected for the student to complete them will be provided to the student in writing. The appropriately revised dissertation must be submitted to each of the members for final approval. If one or more members feel that the candidate's understanding of the written dissertation is inadequate (Unacceptable), or that the dissertation in its present form is not acceptable, then the candidate has failed. Re-examination would be in order unless there is a unanimous recommendation to the contrary. Re-examination is normally conducted by the same committee, but a new committee may be selected by the
School’s Chair of the Committee on Academic Standards if petitioned by the student.

After the Final Defense
Please consult the Registrar’s Office portal site (https://my.jhsph.edu/offices/studentaffairs/recordsregistration/doctoralcandidatetraining/Pages/default.aspx) for dissertation format and submission, procedures to follow upon completion (https://my.jhsph.edu/offices/studentaffairs/recordsregistration/doctoralcandidatetraining/Documents/AFTER%20THE%20FINAL%20DEFENSE%20%20Revised%20March%202019.pdf) of the defense, and additional policy matters.

Graduation

The Policy and Procedures Manual for the Doctor of Philosophy
The Department of Epidemiology reserves the right to augment the PPM (https://my.jhsph.edu/Resources/PoliciesProcedures/ppm/PolicyProcedureMemoranda/Academic_Programs_03_Doctor_Of_Philosophy_Degree_071717.pdf) for JHSPH.

The Admissions and Credentials Committee handles most policy concerns as described above. The Curriculum Committee handles exceptions to requirements.

Policy Components for Metrics

Doctoral Teaching Assistant (TA) Curriculum Requirements

PURPOSE OF THE DOCTORAL TA CURRICULUM
Learning how to be an effective teacher and communicator about epidemiologic principles and methods is an integral part of doctoral education in epidemiology. Teaching is an opportunity for students to meet several Departmental doctoral program core competencies, enabling students to:

• Interpret and critique epidemiological studies;
• Interpret epidemiologic data and make valid inferences from study findings;
• Communicate effectively in oral and written formats with students, professionals and the public on issues related to epidemiology and public health; and
• Provide epidemiologic critique and advice though advising students and professionals on epidemiologic concepts and methods and conducting peer review activities
• Practicing these skills also prepare students for Department and Preliminary Oral Examinations and for their future careers, whether in academia or in other venues. (See the “Benefits of Teaching” from Former TAs section in this Student Handbook for additional benefits of teaching).

COMPONENTS OF THE DOCTORAL TA CURRICULUM
All doctoral students are required to complete the TA Curriculum after passing the Department Comprehensive Examination and before graduation. Training and feedback is an important part of this curriculum, which includes:

• Formal didactic training;
• In-classroom training through experience as a TA in Department courses; and
• Feedback from instructors

Students will share their goals for TA training with course instructors prior to the start of each course taught. After TAing a course, students will document their TA experience for their resume or CV.

Formal Didactic Training Elements:

1. Courses
2. Workshops
3. Teaching practicums
4. Teaching as research fellowship appointments
5. Individual consultation

Teaching Academy also offers a three-day teaching institute for students to advance the development of university-level educators by enhancing classroom teaching skills. This is a free institute and offered at the JHSPH campus early June. https://cer.jhu.edu/teaching-academy/ti (https://cer.jhu.edu/teaching-academy/ti/)

CTL’s “Teaching Assistantship Training” covers the learning objectives required to align with completion of Phase I of the Teaching Academy’s “Preparing Future Faculty Teaching (PFFT) Certificate Program (https://cer.jhu.edu/teaching-academy/pfft).”

• The following didactic trainings and activities are flexibly designed to give doctoral students the skills and tools necessary to be a successful TA and to meet teaching and learning goals. Please note, that while all students are welcome to attend the trainings and activities at any time, it may behoove to do after first year, but in advance/at the start of second, as that is when most doctoral students will begin the TA Curriculum.

Required: Department of Epidemiology Student-led In-Person Training Session
This student-led in-person 1.5-hour training covers the basics of TAing in the Department, including TA roles, benefits and expectations. This session is held during lunchtime at the beginning of 1st term. Information regarding the date and location is distributed via the Department’s student listserv.

Required: Teaching Assistantship Training (Online Course)
This online course offered through the JHSPH Center for Teaching and Learning (CTL) “orients Teaching Assistants to the roles and responsibilities of their position, relevant policies and regulations, technical tools, teaching tips, and other important information.”

Students can complete when time allows but must be complete in advance of starting In-classroom portion of the TA Curriculum. To sign up, visit: https://sites.google.com/site/ctltteachingtoolkit/teaching-assistants/ta-training (https://sites.google.com/site/ctltteachingtoolkit/teaching-assistants/ta-training/).

Recommended: Teaching Academy Activities
the TA Curriculum.

A student may TA for the Summer Institute prior to the completion of their TA training requirements. A student should be registered for in the following 1st term, to avoid additional tuition fees.

To document the in-classroom training on the academic transcript and to receive academic credit, doctoral students should register for PH.340.865 Teaching Epidemiologic Methods and Concepts At the Graduate Level.01 for up to 3 credit hours during the term that they are TAed. Credit hours depend on the level of TAship, and students will receive instructions prior to the start from the Academic Office as to the allowed number of credits. If the course is being TAed in the Summer term, the credit hour(s) should be registered for in the following 1st term, to avoid additional tuition fees.

**Department of Epidemiology epidemiologic methods courses are:**

*Summer Institute courses do not count towards the TA in-classroom training requirement. A student may TA for the Summer Institute prior to the completion of their TA training requirements.

To fulfill the 2 methods courses of the TA Curriculum, students are encouraged to TA: PH.340.751 Epidemiologic Methods 1, PH.340.752 Epidemiologic Methods 2, and/or PH.340.753 Epidemiologic Methods 3, although any of the courses listed above may be used to fulfill the requirement.

Students are eligible to TA as part of this curriculum once they have successfully passed the Department Comprehensive Examination. Students may TA PH.340.601 Principles of Epidemiology during the summer term immediately following completing the comps. Students are expected to complete the TA Curriculum during their second and third years of training. Students are responsible for coordinating with course administrators and/or course instructors for each course they wish to TA. The Department recommends students proactively, directly contact faculty once they have identified a course that they would like to TA as part of the Curriculum. Course faculty take many factors into consideration in selecting TAs for a course (sometimes including performance in the course), and some courses may have more TA requests than can be accommodated. Students may not always be able to serve as a TA for their first choice of courses, so should keep several courses in mind and be flexible. TA responsibilities vary by course, and students are expected to work with course faculty to understand their responsibilities prior to the start of the course. Responsibilities may include but are not limited to: preparing for lab/activities and office hours, attending instructors’ meetings, attending lectures and lab/activities, holding office hours, and assisting with assessment writing and piloting. TAs are expected to devote 5-19 hours per week for each course; the wide range reflects the variability in responsibilities by course.

Prior to the start of each course TAed as part of the TA Curriculum, students are required to provide to course instructor(s) 3 goals for the TA experience in writing via email. The purpose of these goals is to provide a basis for reflection by TAs on their current skills and knowledge, as well as their future professional teaching/communication goals, in order to improve student achievement. Progress toward achieving goals over the term will be evaluated by course instructor(s) as part of the feedback process.

**Feedback from Instructors**

As part of the TA Curriculum, students will receive standardized, individualized feedback from course and/or lab instructors (see below Feedback form). If applicable, TAs will also receive student feedback recorded as part of the School’s online course evaluation system. Students are responsible for sending the feedback form complete with student’s goals from the start of the term to course instructor(s) no later than 2 weeks following the end of the term. Faculty are not obligated to honor requests for feedback that occur more than 2 weeks after the end of the course. TAs are encouraged to document feedback from instructors and from students (if applicable) in their CV or resume.

**Compensated TA Positions**

Additional TA opportunities may be available for a pre-specified fixed payment after the TA Curriculum has been completed. As with the TA Curriculum, students are responsible for coordinating with course administrators and/or course instructors for each course they wish to TA for pay. Students should proactively, contact faculty directly once they have identified a course that they would like to TA. Course faculty take many factors into consideration in selecting TAs for a course and students should be aware that some courses may have more TA requests than can be accommodated.

Students holding a Departmental TA position should expect that there will be approximately two weeks of light preparatory work in advance of...
the course start date, and light conclusory work in excess of the course start and end dates. Please note that State of Maryland law sets student hourly work limitations, at 20 hours per week maximum. Exception: 40 hours over Thanksgiving, winter, and spring breaks, and during the summer.

**Benefits of Teaching (from Former TAs)**

- Improve oral and written communication skills
- Develop an ability to articulate complex epidemiologic concepts to audiences with varying degrees of research experience
- Preparation for oral exams/defense
- Experience with educational technology (e.g., CoursePlus, VoiceThread)
- Experience in nuts and bolts of graduate courses (e.g., design of assessments and feedback)
- Opportunity to provide essential input that can influence the ongoing development of the department’s core courses
- Ability to progress to more independent instructor roles (e.g., Gordis Fellows, TA training seminars/modules, Lab instructors)
- Management skills (managing up to faculty instructors and leading teams of TAs)
- Mentorship from, and relationships with, faculty instructors
- Builds a sense of community with TA colleagues
- Allows students to gauge interest in academic/teaching roles post-graduation
- Development of a teaching portfolio that can be used in CV development, job searches, and interviews
- Getting to know diverse groups of students/mentoring new students

**DOCUMENTATION OF TEACHING EXPERIENCE FOR A RESUME OR CURRICULUM VITAE**

Doctoral students are encouraged to document their TA experience, including teaching responsibilities and feedback, using the below “Guide to Documentation for a Resume or Curriculum Vitae” template.

**WAIVERS**

A written request for a waiver to any aspect of the TA Curriculum due to exceptional circumstances, including the in-classroom training (i.e., being a TA), should be submitted to the Academic Core office (JHSPH.epiasc@jhu.edu) and will be reviewed by the Department of Epidemiology Curriculum Committee and decided upon by the Admissions and Credentials Committee. Matriculating doctoral students are eligible to apply (with the support of their adviser) for a waiver to the requirement of passing the Department Comprehensive Examination before beginning in the TA curriculum if the student has completed a JHSPH master’s degree program in the 2 years immediately prior to matriculation; and has completed the following courses as part of that JHSPH master’s degree program. Students must meet with the faculty mentor before or during add/drop to discuss their learning objectives.

**Comprehensive Examination Grading Policy**

The completed Comprehensive Examination is graded by the Department of Epidemiology faculty according to a rubric determined by the Comprehensive Examination Committee. Final results are distributed to students via CoursePlus by mid-July. Students who wish to view their exam should set up an appointment with the Senior Academic Coordinator, Ebony Moore (eamoore@jhu.edu).

Master’s students whose results fall below 70% are allowed to formally request in writing a re-grade of specific questions. Re-grade requests must include a justification for a change in points allocated for each question being contested; requests without appropriate justification will not be considered. Re-grade requests must have the adviser’s endorsement, and that they need to have reviewed and approved the student’s request. Re-grade requests are handled by the faculty on the Comprehensive Examination Committee. Adviser-approved requests can be e-mailed to the current year’s Comprehensive Examination Committee Chair and must include a cc to the adviser. For approved requests, a new score will be assigned for each question that is re-graded. This score may be equal to, greater than, or less than, the original score awarded and cannot be contested a second time.

Master’s students planning to matriculate into our doctoral program need to have passed at the doctoral level (75%) in order to not sit for comps a second time, should they matriculate within the three years following graduating from a Johns Hopkins Bloomberg School of Public Health Epidemiology Master’s Degree.

**Comprehensive Examination Retake Policy**

Students who do not pass the Comprehensive Exam at the appropriate level for their degree program may be granted an opportunity for a retake in August following the May Exam. Students who do not pass the Comprehensive Exam at the appropriate level are not automatically granted a retake. To request a retake, students must submit an official request within two weeks of notification of the not passing grade. This request should include a detailed timeline and study plan, to make the case for passing a retake. This request and plan must be endorsed by and developed with the adviser. Retake requests are reviewed via the Department’s Admissions and Credentials Committee. Adviser-approved requests can be e-mailed to the current year’s Admissions and Credentials Committee Chairs and must include a cc to the adviser and Senior Academic Program Manager (Frances Burman). For approved requests, students are granted one retake only, and it must be in August following the May Exam. A student cannot continue in the degree program without passing the Comprehensive Examination at the appropriate level, prior to the start of the second year.
**Recommendations for Special Studies versus Thesis Research**

Special Studies and Research in Epidemiology, PH.340.840.xx, is offered during terms 1, 2, 3, and 4. Thesis Research, PH.340.820.XX is offered terms S, 1, 2, 3, and 4.

**SPECIAL STUDIES AND RESEARCH: PH.340.840.XX**

All first year MHS and ScM students should take 1 credit special studies and research each term during terms 1-3.

What activities count for independent study or special studies and research? This is the time to be creative. The following are some of the kinds of uses of the time:

- Directed readings and discussion leading up to preparing for the research proposal,
- Literature searches and meta-analyses
- Secondary data analysis,
- Self-guided focused study on a particular methodology or a disease of interest

**THESIS RESEARCH: PH.340.820.XX**

Masters students take 340.820 once they begin working on their research thesis. Students should begin registering for thesis research during fourth term of the first year once their adviser selection is confirmed.

**CALCULATING CREDITS FOR A VARIABLE CREDIT COURSE**

- Students must remember that the 1 – in class, 2 hours – outside of class still apply, e.g. Students should think about the time the faculty member will be involved in guiding them (see faculty contact hours below) as well as how much time the student uses to conduct outside readings and work.

**What constitutes Faculty Contact Hours**

- Individual one-on-one meetings
- Faculty revisions of writing projects (Faculty members spend a lot of time editing, proofreading, and otherwise providing written feedback to students.)
- Mentoring and networking preparation and discussion.
- Time spent in group settings with faculty mentor e.g. journal clubs or weekly “lab/group” meetings. Students should make every effort to attend the group meetings for their track and adviser.

**HOW TO REGISTER**

- Students must communicate intent to register with the faculty mentor in writing, prior to registering for credits and receive confirmation of the fact of the special studies, the content/activities to be conducted, and the number of credits.
- Students may take 1-3 credits while taking a full load of courses.
- Students may take up to 8 credits per term while taking partial load of courses with approval of the faculty mentor.

**Adviser / Advisee Manual**

Each student in the Department is assigned an adviser and selects co-adviser(s) as they move through the program; Adviser(s) have the responsibility of serving as a guide and mentor. This manual is intended to guide the student and the faculty member(s) in making the adviser/advisee relationship as successful as possible.

This manual has two goals:

- To provide answers to questions that students frequently ask and,
- To provide guidance on how the student and adviser can interact most effectively

**Academic Advisers should:**

- Provide oversight of the student’s academic progress by:
  - Assisting in the selection of courses
  - Ensuring the student is meeting degree milestones in a timely manner
  - Being available for regular meetings with the student
  - Assessing and developing the student’s interests and abilities
  - Monitoring student progress in academic coursework through periodic examination of transcripts
  - Monitoring student progress in field work
  - Writing letters of reference
  - Assisting with grant preparation (doctoral students)
  - Referring students to the appropriate individuals or offices that provide academic support and/or resources
- Provide leadership in matters of academic integrity.
  - Being knowledgeable about ethical issues that pertain to academics, research, and practice
  - Helping students interpret and understand institutional policies and procedures regarding the responsible conduct of research
  - Discouraging students from circumventing institutional policies and procedures, and when confronted with such issues, directing students to appropriate institutional resources or contacts, avoiding actual or appearance of conflicts of interest
  - Respecting the confidentiality of students
- Encourage active participation in the greater community (department, school, university, local, state, national, international)

**STUDENTS MAY EXPECT THE FOLLOWING FROM THEIR ADVISER(S):**

- Advisers’ approval for course registrations, course changes, and pass/fail agreements, and on all reasonable petitions to the Admissions and Credentials Committee
- At least one meeting per term with the advisers
- Oversight of the student’s overall academic program and a sensitivity to any academic difficulties
- Knowledge of and interest in the student’s career objectives
- Review of required and recommended courses for the track
- Assistance in designing a plan for the fulfillment of required courses and assistance with planning the course schedule for the year

Advising students is an integral part of faculty members’ responsibilities. Thus, students should not feel that they are imposing by asking for advice. Faculty members expect to be available to students, although the students should be respectful of the faculty’s time by scheduling and respecting appointments. The responsibility for arranging meetings lies with the student. Students should not expect advisers to seek them out for needed appointments. The student remains obligated to schedule a meeting in order to assure that the adviser has reviewed the student’s schedule and to plan any special studies projects or thesis research as needed with the adviser before the registration period deadline.
RIGHTS AND RESPONSIBILITIES OF THE ADVISER(S):

- To assist in determining the advisee's educational goals and needs upon starting the program
- To serve as an educational and/or professional mentor for the student
- To maintain awareness of and sensitivity to the level of compatibility between the student advisee and the advisers in terms of academic, professional, and personal interests
- To facilitate a change of adviser or program, if deemed appropriate for the student
- To monitor the advisee's overall academic program and be sensitive to signs of academic difficulty
- To provide guidance throughout the academic program
- To be sensitive to cultural, medical, legal, housing, visa, language, financial, or other personal problems experienced by the advisee and to be aware, sensitive, understanding, and supportive
- Advisers have the right to expect be treated with respect and courtesy, to be notified in writing when a meeting must be cancelled or rescheduled, to be consulted when students have questions or concerns about the research focus or progress, and to serve as team leader on the research team

RIGHTS AND RESPONSIBILITIES OF THE ADVISEE:

- To arrange to meet with the adviser at least once each term, and observe registration and administrative deadlines
- To identify and develop professional career goals and interests
- To understand administrative policies and procedures and be familiar with the Student Handbook
- To maintain the academic checklist and review it at meetings with the advisers
- Advisees have the right to expect be treated with respect and courtesy, to be notified in writing when a meeting must be cancelled or rescheduled, to be notified when advisers have questions or concerns about the research focus or progress, and to be granted the role of team member on the research team

Please review the CEPH Competencies located: https://e-nextcatalog.jhu.edu/public-health/ceph-requirements/index.html
